9-7/8"	7-5/8"	29.70	7850'	600 Sx

We propose to drill a 13-3/4" hole to approximately 800' and set 10-3/4" casing cemented to surface, and drill a 9-7/8" hole to 7850' and run 7-5/8" casing. We will drill a 6-3/4" hole to penetrate 1000' of the Wasatch Formation estimated at 8850' TD. Electric logs will be run to total depth and all shows and important zones will be tested after logging and running casing. If commercial production is found in the Wasatch Formation a 5" liner will be run from above the 7-5/8" casing to total depth. If the well results in a dry hole it will be plugged and abandoned per USGS and State of Utah regulations. Strict safety procedures and sound oilfield operating practices will be followed during the drilling and completing of the well. Blowout prevention equipment as follows will be used on the well:

- 10" 900 Series Type B Shaffer Double BOP, 3000# WP
- 10" 900 Series Model GK Hydril BOP, 3000# WP
- 10" 900 Series Shaffer Rotating Drilling Head, 3000# WP

Equipment will be manually operated every 2 1/2 hours and pressure tested to the maximum working pressure once every 14 days.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

Gentlemen:

Insofar as this office is concerned, approval to drill the above referred to wells is hereby granted as follows:

- A. Wells #29-1, 3-1B and 4-1B are approved in accordance with Rule C-3 of the General Rules and Regulations. Although these wells are located within the area under Cause No. 139-5 now before the Board, they do conform to the Gulf Oil Corporation's application should it be granted at the hearing to be held November 17, 1971.
- B. Wells #12-1 and 10-1 which are located outside the proposed spaced area to not conform to the spacing requirements of this Division and, therefore, are considered unorthodox. However, approval is granted due to the topography around the locations.

Should you determine that it will be necessary to plug and abandon these wells, you are hereby requested to immediately notify the following:

PAUL W. BURCHELL-Chief Petroleum Engineer
HOME: 277-2890
OFFICE: 328-5771

This approval terminates within 90 days if the wells have not been spudded-in within said period.

Enclosed please find Form OGC-8-X, which is to be completed whether or not water sands are encountered during drilling.

The API numbers for said wells are as follows:

Ute Tribal - #29-1:	43-013-30087
Ute Tribal - #10-1:	43-013-30088
