RE: Recompletion Report

While preparing the November 1985 Production Report for entry, it was noted that Utex indicated this well is now producing from the GRRV formation. In reviewing the file, I was unable to locate a recompletion report. I called Barbara Rex at Utex and confirmed that this well is indeed now producing from the GRRV and requested that she contact the land department and have a recompletion notice sent ASAP. The GRRV formation was added to the automated system to enable us to enter the production; however, Barbara was told that the WSTC would be left as a producing zone until we received the recompletion indicating the procedures followed.

Jennefer called and said that she had sent in the reports on December 27, 1985 and had received a transmittal letter back from this office. She is going to send a copy to my attention today.

Ms. Searing:

This letter is to confirm our telephone conversation of July 30, 1987, regarding the name change from Pennzoil Exploration & Production Co. to Pennzoil Company.

Please change your records to reflect this name change effective August 1, 1987.

Your contact for drilling operations will continue to be Will Luna at our Neola office. The contact for the monthly production reports will be myself at our Houston address. All affected properties, except the drilling activity, are listed on the attached production report for June, 1987. The bonding is in the name of Pennzoil Company.

This is a change in name only, the company and personnel have remained the same. If you need additional information, please call me at (713)-546-8104.

On review this file, its obvious that a WCR for re-completion has not been submitted, however there might be adequate info to update the records without one.

Please determine:

No info needed.

1- Is a request for WCR - GRRV necessary, or can one be administratively completed from the existing record?

2. Should the zone be ~~GRWS~~ or GRRV?

Even production history, 2 years, is not accurate as to the proper zone:

Pump failures and solids in produced fluids prior to this workover indicated possible casing leak. RU pulling unit and removed all production tbg from well. Tested 7" casing from surface to 8995' using packer and RBP. Held 2000 psi OK. Swab tested casing at 2500' and 3480', had very little entry. Acidized perms 9009-10,451' with 5000 g 15% HCL to remove any damage. Reinstalled hydraulic pumping equipment and RD pulling unit.

Merger Recognized

Acceptable evidence has been filed in this office concerning the merger of Pennzoil Exploration and Production Company into PennzEnergy Exploration and Production L.L.C. with PennzEnergy Exploration and Production L.L.C. being the surviving entity.

For our purposes, the merger is recognized effective December 28, 1998, (Secretary of State's approval date).

Oil and gas lease files U-4377 and UTU-66485 have been noted as to the merger. The lease file numbers were obtained from a list of leases drawn from our Automated Land and Mineral Record System (ALMRS). We have not abstracted the lease files to determine if the entity affected by the merger holds an interest in the leases identified nor have we attempted to identify leases where the entity is the operator on the ground maintaining no vested record title or operating rights interests. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

By recognition of the merger, the principal/obligor is automatically changed by operation of law from Pennzoil Exploration and Production Company to PennzEnergy Exploration and Production L.L.C. on Bond No. 8023 29 91 (BLM Bond No. NM0043). The principal/obligor is also automatically changed from Pennzoil Exploration and Production Company to PennzEnergy Exploration and Production L.L.C. on Bond No. 8134-90-99 (BLM Bond No. NM2142).
