ONSHORE ORDER NO. 1

MULTI POINT SURFACE USE & OPERATIONS PLAN

1 Existing Roads

To reach the Barrett Resources well, Ute Tribal 3-28-54 location, in Section 28-T5S-R4W:

Start in Myton, Utah. Proceed west on US Highway 40, 8.8 miles to the Antelope Creek/Sowers Canyon Road at the Bridgeland turnoff. Turn south and proceed 8.4 miles to the Nutters Ridge turnoff. Turn south and proceed 4.6 miles to Ute Tribal 3-28-54 access road. Turn west and proceed 0.15 miles to the Ute Tribal 3-28-54 location.

The existing oilfield service road may need some surface material to prevent or repair holes in the road due to heavy truck traffic during the drilling and completion operation. If repairs are made the operator will secure material from private sources.

Please see the attached map for additional details.

2 Planned Access Road

See Topographic Map "B" for the location of the proposed access road.

3 Location of Existing Wells

See Topographic Map "C" for the location of existing wells within a 1 mile radius.

4 Location of Tank Batteries, Production Facilities and Production Gathering and Service Lines

PLEASE REFER TO BARRETT RESOURCES CORPORATION STANDARD OPERATING PROCEDURE (SOP VERSION: FEBRUARY 01, 2001).

5 Location and Type of Water Supply

Water for both drilling and completion of the well will be hauled from Petroglyph Operatings Antelope Creek Facility. A water use agreement is also in place with the Ute Tribe.

**Produced Wtr. per op. 6-7-01. Jc*

13 Operator's Representative and Certification

A) Representative

NAME: Debbie L. Wisener
ADDRESS: Barrett Resources Corporation
30 West 425 South (330-5)
Roosevelt, Utah 84066
PHONE: 435-722-1325

All lease and/or unit operations will be conducted in such a manner that full compliance is made with all applicable laws, regulations and onshore oil and gas orders. The operator is fully responsible for the actions of its subcontractors. A copy of these conditions will be furnished to the field representative to ensure compliance.

The drilling permit will be valid for a period of one year from the date of approval. After permit termination, a new application will be filed for approval for any future operations.

B) Certification:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge and belief, true and correct; and that the work associated with the operations proposed herein will be performed by Barrett Resources Corporation and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved. This statement is subject to the provisions of 18 U.S.C. 1001 for the filing of a false statement.

APPLICATION FOR GRANT OF CORRIDOR RIGHT-OF-WAY

BARRETT RESOURCES CORPORATION, having a resident or principal place of business at 30 West 425 South (330-5), Roosevelt, Utah, 84066, hereby files an application with the Bureau of Indian Affairs, pursuant to the terms and provisions of the Act of February 5, 1948 (62 Stat. 17; 25 U.S.C. 323), and to the regulations of the Department of the Interior contained in Title 25, Code of Federal Regulations, Part 169, for the grant of a Right-of-Way for the following purposes and reasons:

To construct a Pipeline Corridor for the UTE TRIBAL #3-28-54

Across the following described Indian Lands NE 1/4 NW 1/4 & NW 1/4 NE 1/4 OF SECTION 28, T5S, R4W, U.S.B.&M.

Corridor R-O-W = 0.621 Ac.
(Pipeline)

Total Acreage = 0.621 Acres

Said Access Road & Pipeline Right-of-Way to be approximately 901.82 feet in length, 30 feet in width, and 0.621 Acres, and more particularly described and shown on the map of definite location to be attached and made a part hereof.

The applicant understands and hereby expressly agrees to the following stipulations:

- (a) To construct and maintain the Right-of-Way in a workmanlike manner.
- (b) To pay promptly all damages and compensation, in addition to the deposit made pursuant to 169.4 determined by the Secretary to be due the landowners and authorized users and occupants of the land on account of the survey, granting, construction and maintenance of the Right-of-Way.
- (c) To indemnify the landowners and authorized users and occupants against any liability for loss of life, personal injury and property damage arising from the construction, maintenance, occupancy or use of the lands by the applicant, his employees, contractors and their employees or subcontractors and their employees.
- (d) To restore the lands as nearly as may be possible to their original condition upon the completion of the construction to the extent compatible with the purpose for which the Right-of-Way was granted.
- (e) To clear and keep clear the lands within the Right-of-Way to the extent compatible with the purpose of the Right-of-Way; and to dispose of all vegetative and other material cut, uprooted, or otherwise accumulated during the construction and maintenance of the project.
- (f) To take soil and resource conservation and protection measures, including weed control, on the land covered by the Right-of-Way.
- (g) To do everything reasonable within its power to prevent and suppress fires on or near the lands to be occupied under the Right-of-Way.

- (h) To build and repair such roads, fences, and trails as may be destroyed or injured by construction work and to build and maintain necessary and suitable crossings for all roads and trails that intersect the works constructed, maintained, or operated under the Right-of-Way.
- (I) That upon revocation or termination of the Right-of-Way, the applicant shall, so far as is reasonably possible, restore the land to its original condition.
- (j) To at all times keep the Secretary informed of its address, and in case of corporations of the address of its principal officers.
- (k) That the applicant will not interfere with the use of the lands by or under the authority of the landowners for any purpose not inconsistent with the primary purpose for which the Right-of-Way is granted.

IN WITNESS THEREOF, BARRETT RESOURCES CORPORATION, has caused this instrument to be executed this 22 day of May, 2001.

ABSTRACT

An intensive cultural resource evaluation has been conducted for Barrett Resources Corporation of six proposed well locations (Units 15-17, 14-18, 3-27, 3-28, 3-29, and 14-23), with their associated access routes and various pipeline segments (including a segment into Unit 15-24), all situated on Ute Tribal lands located in the Brundage Canyon/Sowers canyon locality of Duchesne County, Utah. This evaluation involved 29 acres associated with the six proposed well pads and an additional 54.7 acres associated with the access routes and pipeline, for a total of 83.7 acres. These evaluations were conducted by F.R. Hauck, Richard Beatty and Glade V Hadden of AERC on March 26 and 27, and April 1, 2, 3, 9, 10 and 11, 1996.

No previously recorded significant or National Register eligible cultural resources will be adversely affected by the proposed developments.

Four newly identified cultural resource activity loci were discovered and recorded during the examinations. Sites **42DC 989**, **42DC 990**, **42DC 991** and **42DC 992** are open occupation and/or lithic scatter sites. They are situated on the original well pad for Unit 3-29 (42DC 989) and along the access routes into Units 14-18 (42DC 990) and 14-24 (42DC 991 & 992). In order to avoid these sites, Unit 3-29 was moved to the northwest of its original location and the proposed access routes into Units 14-18 and 14-24 were re-routed away from the sites.

AERC recommends project clearance based on adherence to the stipulations noted in the final section of this report.

GENERAL INFORMATION

On March 26 and 27, and April 1, 2, 3, 9, 10 and 11, 1996, AERC archaeologists F.R. Hauck, Richard Beatty and Glade Hadden conducted intensive cultural resource evaluations for Barrett Resources Corporation in the Brundage Canyon/Sowers Canyon locality south of Duchesne, Utah (see Map 1). This examination involved six proposed well pad locations including Units 15-17, 14-18, 3-27, 3-28, 3-29 and 14-24 (see Maps 2 through 5). The six proposed wells were inventoried within a four to six acre well pad buffer zone. In addition to these wells, access routes into these locations were examined within a 100 foot-wide corridor zone and a variety of pipeline right-of-way corridors were inventoried within either a 50 foot-wide or a 100 foot-wide corridor. In addition to pipeline corridors associated with certain designated well pads, i.e., 14-18 and 3-28, an additional pipeline corridor was examined for Unit 15-24; this unit was being redrilled after having been constructed at an earlier date. A total of 83.7 acres was examined during this project. The entire project area is situated on Ute Tribal Lands, or, as the case of Unit 3-27, on private lands with Tribal minerals. Mr. Lonnie Nephi, a representative of the Ute Tribe accompanied the evaluations.

The purpose of the field study and this report is to identify and document cultural site presence and assess National Register potential significance relative to established criteria (cf., Title 36 CFR 60.6). The proposed development of these well locations requires archaeological evaluations in compliance with U.C.A. 9-8-404, the Federal Antiquities Act of 1906, the Reservoir Salvage Act of 1960-as amended by P.L. 93-291, Section 106 of the National Historic Preservation Act of 1966-as amended, the National Environmental Policy Act of 1969, the Federal Land Policy and Management Act of 1979, the Archaeological Resources Protection Act of 1979, the Native American Religious Freedom Act of 1978, the Historic Preservation Act of 1980, and Executive Order 11593.

In addition to documenting cultural identity and significance, mitigation recommendations relative to the preservation of cultural data and materials can be directed to the Bureau of Indian Affairs, and to the Utah State Antiquities Section. This work was done under U.S. Department of Interior Permit for Utah UT-96-54937 which expires on 1-31-97.

Project Location

The project location is in the Brundage Canyon/Sowers Canyon locality of Duchesne County, Utah. It is situated on the Duchesne SE and Duchesne SW 7.5 minute topographic quads.

The proposed well locations are situated in the following Sections:

Unit No. 15-17, along with .8 mile of associated access route is in the SW quarter of the SE quarter of Section 17, Township 5 South, Range 4 West, Uintah Special Base and

Pipeline Corridor ↗

Meridian. The access route for this location extends northward from the northwest quarter of adjacent Section 20 (see Map 2). A total of 13.7 acres was examined in association with this location and its access (4 acres for the pad area and 9.7 acres for the access corridor).

Unit No. 14-18, along with .7 mile of associated access route and .4 mile of pipeline is located in the SE quarter of the SW quarter of Section 18, Township 5 South, Range 4 West, USBM. The pipeline corridor and the beginning of the access route are situated in the northern half of adjacent Section 19 (see Map 3). A total of 14.5 acres was examined in association with this location and its corridors (4 acres for the pad area, 2.42 acres for the .4 mile-long (50 foot-wide) pipeline, and 8.48 acres for the access corridor).

The pipeline for existing Unit 15-24 (reentry) is ca. .7 mile-long and is situated in Sections 24 and 25 of Township 5 South, Range 5 West (see Map 3). The 50 foot-wide corridor was associated with ca. 4.25 acres; it begins at existing Unit 1-25 in the NE quarter of the NE quarter of Section 25.

Unit No. 14-24, along with .6 mile of associated access route is located in the SE quarter of the SW quarter of Section 24, Township 5 South, Range 5 West, USBM (see Map 3). The access route begins in the NE quarter of adjacent Section 25 and extends in a northerly direction to the well location. A total of 12.25 acres was examined in association with this location and its access (5 acres for the pad area and 7.25 acres for the access corridor).

Unit No. 3-27, along with .5 mile of associated access route is located in the NE quarter of the NW quarter of Section 27, Township 5 South, Range 4 West, USBM (see Map 4). The access for this location actually extends from the NW quarter of the NW quarter of Section 27 a short distance into adjacent Section 28 and then goes in an easterly direction down the ridge to the staked well location. A total of 11.06 acres was examined in association with this location and its access (5 acres for the pad area and 6.06 acres for the access corridor).

Unit No. 3-28, along with .4 miles of associated access route and .2 miles of pipeline corridor (100 feet-wide), is in the NE of the NW quarter of Section 28, Township 5 South, Range 4 West, USBM (see Map 4). Both the access route and the pipeline begin in the tip of the ridge to the east of the staked location in the NE quarter of Section 28. A total of 12.25 acres was examined in association with this location and its corridors (5 acres for the pad area, 2.42 acres for the pipeline and 4.84 acres for the access corridor).

Unit No. 3-29, along with .8 miles of associated access route is located in the NE quarter of the NW quarter of Section 29, Township 5 South, Range 4 West, USBM (see Map 5). The access begins in the NE quarter of adjacent Section 30 and extends in an easterly direction to the staked well pad. A total of 15.7 acres was examined in association with this location and its access (6 acres for the pad area and 9.7 acres for the access corridor).

Environmental Description

The project area is within the 6400 to 6900 foot elevation zone above sea level. Pinyon-Juniper woodland is associated with most of the project area benches while valley bottoms are dominated by greasewood and sagebrush communities.

The vegetation in the project area includes Pinyon (*Pinus edulis*), *Juniperus* spp., *Chrysothamnus* spp., *Artemisia* spp., *Eriogonum* spp., *Sarcobatus vermiculatus*, *Ephedra viridis*, *Atriplex canescens*, and a variety of grasses. Isolated stands of Willow (*Salix*) and Cottonwood (*Populus*) are rare within the floodplain zones of the valley floors.

The geological associations within the project area consist of fluvial and lake deposits which correlate with the Uinta Formation which are of Tertiary age.

PREVIOUS RESEARCH IN THE LOCALITY

File Search

A records search of the site files and maps at the Antiquities Section of the State Historic Preservation Office in Salt Lake City was conducted on March 21, 1996. The National Register of Historic Places has been consulted and no registered historic or prehistoric properties will be affected by the proposed developments.

Few known cultural sites are situated in the Brundage Canyon/Sowers Canyon locality. Known sites, as located and recorded by archaeological consultants during oil and gas exploration inventories, tend to be mainly limited to lithic scatters or surface indications of open occupation areas. Some historic sites associated with the late 19th and early 20th centuries are located in the valley bottoms.

AERC's experience in this project area began in 1983 during the evaluations of a variety of proposed locations for Ironwood Exploration (Hauck 1983, 1984, 1987, 1988). Prehistoric sites identified and recorded during these evaluations include 42DC 512 (Hauck 1983a and 1983b), 42DC 513 and 42DC 514 (Hauck 1983c), and more recently 42DC 988 (Hauck and Hadden 1996). These resources generally are short-term open campsites. Sites and isolated artifacts observed within this locality frequently contain or consist of grinding tools, possible evidence of pinyon nut subsistence activities. The uplands contain very little water; a condition that may have existed for the last 2,000 years. If this assumption is correct, much of the prehistoric activity observed in these highlands is associated with Archaic occupations. Lithic material quarries also exist; the mottled cherts associated with the Parachute Creek member of the Green River Formation are frequently found in the uplands as float remnants residing on the least eroded upper members of the dominant Uinta Formation.

Prehistory and History of the Cultural Region

Currently available information indicates that the Northern Colorado Plateau Cultural Region has been occupied by a variety of cultures beginning perhaps as early as 10,000 B.C. These cultures, as identified by their material remains, demonstrate a cultural developmental process that begins with the earliest identified Paleoindian peoples (10,000 -- 7,000 B.C.) and extends through the Archaic (ca. 7,000 B.C. -- A.D. 300), and Formative (ca. A.D. 400 -- 1100) Stages, and the Late Prehistoric-Protohistoric periods (ca. A.D. 1200 -- 1850) to conclude in the Historic-Modern period which was initiated with the incursion of the Euro-American trappers, explorers, and settlers. Basically, each cultural stage -- with the possible exception of the Late Prehistoric hunting and gathering Shoshonean bands -- features a more complex life-way and social order than occurred during the earlier stage of development (Hauck 1991:53). For a more comprehensive treatment of the prehistory and history of this region see Archaeological Evaluations in the Northern Colorado Plateau Cultural Area (Hauck 1991).

Site Potential in the Project Development Zone

Previous archaeological evaluations in the general project area have resulted in the identification and recording of a variety of cultural resource sites having eligibility for potential nomination to the National Register of Historic Places (NRHP). These sites include resource procurement sites, ceramic scatters and lithic scatters containing cobble reduction materials. Open occupations are also identified in this locality. Sites associated with the open rangeland and benches generally appear to have been occupied during the Middle Plains Archaic Stage with occasional indications of Paleoindian activity based on the recovery of isolated Plano style projectile points. The north-south drainage canyons appear to contain the majority of Late Prehistoric (Numa) sites probably because those canyon floors were transportation corridors and convenient pastures for the Ute horse herds. Evidence of Formative Stage occupation, i.e., Fremont, is rarely observed in this locality, but is common within the river valleys and their primary tributary canyons to the north and east.

Site density in certain portions of the region appears to range from one to four sites per section. These densities increase in the canyon bottoms due to rock art loci and formative period occupations. Recent evaluations indicate that the site densities may reach 8 to 12 sites per section in certain localities on the upper benches which were apparently favored for hunting, lithic resource procurement, and camping. Prehistoric sites on the rangeland benches appear to be associated with water courses and aeolian deposits. Previous inventories in the present project area suggest a site density of less than one site per section, though this may be due more to the limited extent of inventories rather than an actual paucity of cultural sites.

FIELD EVALUATIONS

Methodology

Intensive evaluations consisted of the archaeologists walking a series of parallel 15 to 20 meter-wide transects across the various parcels associated with the staked well locations. In addition, the archaeologists walked a series of 10 to 15 meter wide transects to cover the various 50 and 100 foot-wide corridors associated with the flagged access routes and pipeline corridors.

Observation of cultural materials results in intensive examinations to determine the nature of the resource (isolate or activity locus). The analysis of each specific cultural site results in its subsequently being sketched, photographed, and appropriately recorded on standard IMACS forms. Cultural sites are then evaluated for significance utilizing the standards described below and mitigation recommendations are considered as a means of preserving significant resources which may be situated within the development zone.

Site Significance Criteria

Prehistoric and historic cultural sites which can be considered as eligible for nomination to the National Register of Historic Places have been outlined as follows in the National Register's Criteria for Evaluation as established in Title 36 CFR 60.6:

The quality of significance in American ... archaeology ... and culture is present in ... sites ... that possess integrity of location, design, setting, materials, workmanship, feeling, and association and:

- a. That are associated with events that have made a significant contribution to the broad patterns of our history; or*
- b. that are associated with the lives of persons significant in our past; or*
- c. that embody the distinctive characteristics of a type, period, or method of construction ... ; or*
- d. that have yielded, or may be likely to yield, information important in prehistory or history.*

In addition to satisfying one or more of these general conditions, a significant cultural resource site in Utah will generally be considered as being eligible for inclusion in the National Register if it should advance our current state of knowledge relating to chronology, cultural relationships, origins, and cultural life ways of prehistoric or historic groups in the area.

In a final review of any site's cultural significance, the site must possess integrity and at least one of the above criteria to be considered eligible for nomination to the National Register of Historic Places.

Results of the Inventory

Four prehistoric cultural resource activity loci were observed and recorded during the archaeological evaluations. These sites include 42DC 989, 42DC 990, 42DC 991, and 42DC 992. Short descriptions of these sites, their cultural significance, and the efforts made to avoid the resources are provided in the following section:

Site 42DC 989 consists of an open occupation that is situated on the ridge top in association with the originally staked location for Unit 3-29 (see Maps 5 and 6). It contains a scatter of debitage covering a general area of ca. 34 x 100 meters in size. Diagnostic projectile points mapped on the site, include a Duncan and a Hanna dart points, both associated with the Plains Middle Archaic McKean Complex. Hence the site appears to date from 3500 to 4500 years old. No grinding tools were observed on the site although scattered oxidized sandstone fragments provide some indication that the site once contained hearths and thus served as a short-term occupation possibly for a hunting party. Additional cultural material probably exist on the site buried within the duff associated with the pinyon trees that cover most of the site area. No artifacts were collected from this site.

This site is a significant resource; it contains sufficient depth potential to qualify for National Register inclusion under criterion d of Title 36 CFR 60.6.

The site is associated with the original staked location for Unit 3-29 (see Map 5). Adverse effect to the site from the proposed well location was mitigated by moving the well pad to the northwest ca. 150 feet.

Site 42DC 990 consists of an open occupation that is situated on the canyon floor in association with the originally flagged access route for Unit 14-18 (see Maps 3 and 7). It contains a very sparse scatter of debitage and the remnants of a hearth feature eroding out of the shallow drainage channel. The entire site covers a general area of ca. 15 x 15 meters in size. An Elko Corner-notch dart point fragment observed on the site indicates this site was possibly occupied during the Late Archaic stage. No grinding tools were observed on the site. The depth of the hearth in the arroyo (- 15 to 25 cm. below present surface) suggests that this site, like 42DC 989, is possibly an Archaic occupation. A radiocarbon date of the carbons in the hearth soils would provide a better assessment of this site's age. Additional cultural material probably exist buried within the site area. No artifacts were collected from this site.

This site is a significant resource; it contains sufficient depth and research potential to qualify for National Register inclusion under criterion d of Title 36 CFR 60.6.

MAP 7: SITE MAP FOR 42DC990

Legend

- ▲ Site Datum
- ◆ Dart Point
- ⊕ Core Fragment
- ◇ Primary Flake
- ◇ Secondary Flake
- - - Original Access Route
- New Access Route
- Drainage Channel

Site 42DC 990 is associated with the original access route flagged into Unit 14-18 (see Map 3). Adverse effect to the site from the proposed access route was mitigated by moving the access corridor to the west and upslope from the site ca. 30 meters.

Site 42DC 991 is a moderate size lithic scatter that may have been used as a short-term open occupation, however, the degree of surface erosion on the ridge and its slope have seriously modified any exposed hearths that may have been present. This site is situated on the top of the ridge in association with the originally flagged access route for Unit 14-24 (see Maps 3 and 8). It contains a scatter of debitage associated with the core preparation and reduction of the Parachute Creek Cherts that appear to have been gathered from the slope below the site. In addition to the core fragments, a large amount of interior thinning flakes were observed indicating the site was also the locus of biface blade preparation and possibly blank manufacture. The entire site covers a general area of ca. 25 x 25 meters in size. The only tool observed on the site was a scraper. No grinding tools were observed on the site. Additional cultural material and possibly features may be buried under the duff within the site area. No artifacts were collected from this site.

This site is a significant resource; it contains sufficient depth and research potential to qualify for National Register inclusion under criterion d of Title 36 CFR 60.6.

Site 42DC 991 is associated with the original access route flagged into Unit 14-24 (see Map 3). Adverse effect to the site from the proposed access route was mitigated by moving the access corridor to the east and downslope from the site ca. 20 meters.

Site 42DC 992 also consists of a lithic scatter situated in association with the originally flagged access route for Unit 14-24 (see Maps 3 and 9). It contains a sparse scatter of debitage associated with the core reduction and biface preparation of the local Parachute Creek Cherts that were probably gathered from the slope below the site area. The entire site covers a general area of ca. 20 x 30 meters in size. A biface blank constructed from dense sandstone and exhibiting marginal preparation on both ends was observed on the site. It may have been used as a two-handed digging tool before being discarded on the site. Like 42DC 991, no grinding tools were observed on this site. Additional cultural material possibly exists buried under the duff within the site area. No artifacts were collected from this site.

This site is a significant resource; it contains sufficient depth and research potential to qualify for National Register inclusion under criterion d of Title 36 CFR 60.6.

Site 42DC 992 is associated with the original access route flagged into Unit 14-24 (see Map 3). Adverse effect to the site from the proposed access route was mitigated by moving the access corridor to the east and downslope from the site ca. 15 meters.

--- Site Periphery

--- Original Access Route

--- New Access Route

No previously recorded sites are located within the proposed development zone.

No previously recorded significant or National Register sites were noted or rerecorded during the survey.

One isolated artifact, a complete slab metate was observed on the access route into Unit 14-18 (see Map 3). This artifact was moved out of the disturbance zone. No isolated artifacts were recorded or collected during the evaluation.

No paleontological loci were observed or recorded during the evaluation.

CONCLUSION AND RECOMMENDATIONS

No known significant cultural or paleontological resources will be adversely impacted during the development and operation of the Barrett Resource Corporation well locations and associated access and pipeline corridors evaluated during this project. The four significant prehistoric cultural sites located within the project area (42DC 989, 42DC 990, 42DC 991, and 42DC 992) have been avoided by relocating Unit 3-29 to avoid 42DC 989 and by moving the centerline of the proposed access routes into Units 14-18 and 14-24 away from sites 42DC 990, 42DC 991, and 42DC 992.

AERC recommends that a cultural resource clearance be granted to Barrett Resources relative to the proposed development of well pads, access routes, and pipeline corridors for Units 15-17, 14-18, 15-24, 14-24, 3-27, 3-28, and 3-29 (see Maps 2 through 5) based upon adherence to the following stipulations:

1. All vehicular traffic, personnel movement, construction and restoration operations should be confined to the flagged areas and corridors examined as referenced in this report, and to the existing roadways;
2. All personnel should refrain from collecting artifacts and from disturbing any cultural resources in the area; and
3. The authorized Bureau of Indian Affairs and Ute Tribal officials should be consulted should cultural remains from subsurface deposits be exposed during construction work or if the need arises to relocate or otherwise alter the locations within the exploration area.

Re: Ute Tribal 3-28-54 Well, 660' FNL, 1980' FWL, NE NW, Sec. 28, T. 5 South, R. 4 West,
Duchesne County, Utah

Gentlemen:

Pursuant to the provisions and requirements of Utah Code Ann. § 40-6-1 *et seq.*, Utah Administrative Code R649-3-1 *et seq.*, and the attached Conditions of Approval, approval to drill the referenced well is granted.

This approval shall expire one year from the above date unless substantial and continuous operation is underway, or a request for extension is made prior to the expiration date. The API identification number assigned to this well is 43-013-32261.

Sincerely,

A handwritten signature in black ink, appearing to read "John R. Baza".

Conditions of Approval

1. General

Compliance with the requirements of Utah Admin. R. 649-1 *et seq.*, the Oil and Gas Conservation General Rules, and the applicable terms and provisions of the approved Application for permit to drill.

2. Notification Requirements

Notify the Division within 24 hours of spudding the well.

- Contact Carol Daniels at (801) 538-5284.

Notify the Division prior to commencing operations to plug and abandon the well.

- Contact Dan Jarvis at (801) 538-5338

3. Reporting Requirements

All required reports, forms and submittals will be promptly filed with the Division, including but not limited to the Entity Action Form (Form 6), Report of Water Encountered During Drilling (Form 7), Weekly Progress Reports for drilling and completion operations, and Sundry Notices and Reports on Wells requesting approval of change of plans or other operational actions.

4. State approval of this well does not supersede the required federal approval, which must be obtained prior to drilling.

CONDITIONS OF APPROVAL
APPLICATION FOR PERMIT TO DRILL

Company/Operator: Barrett Resources Corp.

Well Name & Number: Ute Tribal 3-28-54

API Number: 43-013-32261

Lease Number: 14-20-H62-4740

Location: NENW Sec. 28 T.5S R.4W

Agreement: N/A

For more specific details on notification requirements, please check the Conditions of Approval for Notice to Drill and Surface Use Program.

CONDITIONS OF APPROVAL

Approval of this application does not warrant or certify that the applicant holds legal or equitable title to those rights in the subject lease which would entitle the applicant to conduct operations thereon.

Be aware fire restrictions may be in effect when location is being constructed and/or when well is being drilled. Contact the appropriate Surface Management Agency for information.

A. DRILLING PROGRAM

1. Estimated Depth at Which Oil, Gas, Water, or Other Mineral Bearing Zones are Expected to be Encountered

None

2. Pressure Control Equipment

None

3. Casing Program and Auxiliary Equipment

None

4. Mud Program and Circulating Medium

None

5. Coring, Logging and Testing Program

A cement bond log (CBL) will be run from the production casing shoe to the surface casing shoe and shall be utilized to determine the bond quality for the production casing. Submit a field copy of the CBL to this office.

6. Notifications of Operations

If a replacement rig is contemplated for completion operations, a "Sundry Notice" (Form 3160-5) to that effect will be filed, for prior approval of the AO, and all conditions of this approved plan are applicable during all operations conducted with the replacement rig.

Should gas be vented or flared without approval beyond the authorized test period, the operator may be directed to shut-in the well until the gas can be captured or approval to continue venting or flaring as uneconomic is granted and the operator shall be required to compensate the lessor for that portion of the gas vented or flared without approval which is determined to have been avoidably lost.

7. Other Information

In the event after-hours approvals are necessary, you must contact one of the following individuals:

EPA'S LIST OF NONEXEMPT EXPLORATION AND PRODUCTION WASTES

While the following wastes are nonexempt, they are not necessarily hazardous.

Unused fracturing fluids or acids

Gas plant cooling tower cleaning wastes

Painting wastes

Oil and gas service company wastes, such as empty drums, drum rinsate, vacuum truck rinsate, sandblast media, painting wastes, spent solvents, spilled chemicals, and waste acids

Vacuum truck and drum rinsate from trucks and drums, transporting or containing nonexempt waste

Refinery wastes

Liquid and solid wastes generated by crude oil and tank bottom reclaimers

Used equipment lubrication oils

Waste compressor oil, filters, and blowdown

Used hydraulic fluids

Waste solvents

Waste in transportation pipeline-related pits

Caustic or acid cleaners

Boiler cleaning wastes

Boiler refractory bricks

Incinerator ash

Laboratory wastes

Sanitary wastes

Pesticide wastes

Radioactive tracer wastes

Drums, insulation and miscellaneous solids.

**SURFACE USE PROGRAM
CONDITIONS OF APPROVAL (COAs)**

Barrett Resources Corporation (Barrett) will assure the Ute Tribe that any/all contractors and subcontractors have acquired a current Tribal Business License and have updated "Access Permits" prior to construction. All Barrett personnel, contractors and subcontractors will have these permits in their vehicles at all times. Companies that have not complied with this COA will be in violation of the Ute Tribal Business License Ordinance, and will be subject to fines and penalties.

Barrett employees, representatives, and/or authorized personnel (subcontractors) shall not carry firearms on their person or in their vehicles while working on the Uintah and Ouray Indian Reservation.

Barrett employees and/or authorized personnel (subcontractors) in the field will have approved applicable APDs and/or ROW permits/authorizations on their person(s) during all phases of construction.

Barrett will notify the Ute Tribe and Bureau of Indian Affairs (BIA) in writing of any requested modification of APDs or Rights-Of Way (ROW). Barrett shall receive written notification of authorization or denial of the requested modification. Without authorization, Barrett will be subject to fines and penalties.

The Ute Tribe Energy & Minerals Department shall be notified in writing 48 hours in advance of any construction activity. The Ute Tribal office is open Monday through Thursday. A Tribal Technician is to routinely monitor construction. Barrett shall make arrangements with the Ute Energy & Minerals Department for all monitoring that will exceed regular working hours for Tribal Technicians.

A qualified archaeologist accompanied by a Tribal technician will monitor any trenching construction involved in the pipeline construction.

A ROW, 30 feet wide, shall be granted for the pipeline and a ROW, 30 feet wide, shall be granted for the access road. Upon authorization by the Ute Tribe Energy & Minerals Department, the ROW may be wider where sharp curves; deep cuts and fills occur; or, where intersections with other roads are required.

Upon completion of the pertinent APD and ROWs construction, Barrett will notify the Ute Tribe Energy & Minerals Department for a Tribal Technician to verify the Affidavit of Completion.

Production waters, oil, and other byproducts shall not be placed on access roads or the well pad.

All vehicular traffic, personnel movement, construction and restoration operations will be confined to the areas examined and approved and to the existing roadways and/or evaluated access routes.

Barrett will implement "Safety and Emergency Plan" and ensure plan compliance.

Barrett shall stop construction activities and notify personnel from the Ute Tribe Energy & Minerals Department and BIA if cultural remains including paleontologic resources (vertebrate fossils) are exposed or identified during construction. The Ute Tribe Department of Cultural Rights and Protection and the BIA will provide mitigation measures prior to allowing construction.

Barrett employees and/or authorized personnel (subcontractors) will not be allowed to collect artifacts and paleontologic fossils. No significant cultural resources shall be disturbed.

Barrett will control noxious weeds on the well site and ROWs. Barrett will be responsible for noxious weed control if weeds spread from the project area onto adjoining land.

Reserve pits will be lined with an impervious synthetic liner. Prior to backfilling the reserve pit, all fluids will be pumped from the pit into trucks and hauled to approved disposal sites or shall be used to drill other wells. When the reserve pits are backfilled, the pit liner remnants, the surplus oil and mud, etc., will be buried a minimum of 3.0 feet below the surface of the soil.

A closed system will be used during production. This means that production fluids will be contained in leak-proof tanks. All production fluids will be disposed of at approved disposal sites.

Surface pipelines will be constructed to lay on the soil surface. The pipeline ROW will not be bladed or cleared of vegetation without authorization of the BIA. Where surface pipelines do not parallel rads but cross country with their route between stations, they shall be welded in place at well sites or on access roads. Then they shall be pulled into place between stations with suitable equipment. Vehicles shall not use pipeline ROWs as access roads unless specifically authorized.

Buried pipelines shall be buried a minimum of 3 feet below the soil surface. After construction is completed the disturbed area shall be contoured to blend into the natural landscape and be reseeded between September 15 and November 1 of the year following construction with perennial vegetation seed mixture provided by the BIA or Ute Tribe.

Before the site is abandoned, Barrett will be required to restore the well site and ROWs to near their original state. The disturbed areas will be reseeded with desirable perennial vegetation.

Soil erosion will be mitigated by reseeded all disturbed areas.

UNITED STATES DEPARTMENT OF THE INTERIOR BUREAU OF LAND MANAGEMENT

NOTICE

Williams Production RMT Co. : Oil and Gas
Tower 3, Suite 1000 :
1515 Arapahoe Street :
Denver, Colorado 80202 :

Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Barrett Resources Corporation into Williams Production RMT Company with Williams Production RMT Company being the surviving entity.

For our purposes, the name change is recognized effective August 2, 2001.

The oil and gas lease files identified on the enclosed exhibit have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our computer program. We have not abstracted the lease files to determine if the entities affected by this name change hold an interest in the leases identified nor have we attempted to identify leases where the entities are the operator on the ground maintaining no vested recorded title or operating rights interests. We will be notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

If you identify additional leases in which the entities maintain an interest, please contact this office and we will appropriately document those files with a copy of this Notice.

Due to the name change, the name of the principal/obligor on the bond is required to be changed from Barrett Resources Corporation to Williams Production RMT Company. You may accomplish this either by consent of surety rider on the original bond or a rider to the original bond. The bonds are held in New Mexico.

Robert Lopez
Chief, Branch of
Minerals Adjudication

13. Describe Proposed or Completed Operation (clearly state all pertinent details including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths or pertinent markers and sands. Attach the Bond under which the work be will performed or provide the Bond No. on file with the BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final abandonment Notice shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BARRETT RESOURCES CORPORATION RECEIVED APPROVAL OF THEIR REVISED STANDARD OPERATING PRACTICES COVERING DRILLING PLANS FOR ALL FUTURE UTE TRIBAL WELLS ON FEBRUARY 2, 2001. EFFECTIVE AUGUST 2, 2001 WILLIAMS PRODUCTION RMT COMPANY ASSUMED OPERATORSHIP OF ALL UTE TRIBAL WELLS DUE TO A MERGER OF WILLIAMS ENERGY SERVICES AND BARRETT RESOURCES CORPORATION. BOND COVERAGE PURSUANT TO 43 CFR 3104 FOR OPERATION ACTIVITIES WILL CONTINUE TO BE PROVIDED BY FLOOD AND PETERSON INSURANCE, INC. UNDER NATIONWIDE BLM BOND NO. 6101757342. WILLIAMS PRODUCTION RMT COMPANY WILL BE RESPONSIBLE FOR COMPLIANCE UNDER THE TERMS AND CONDITIONS OF THIS STANDARD OPERATING PRACTICES DOCUMENT.

Williams Production RMT Company
Attn: Fritts Rosenberger
1515 Arapahoe St., T3-1000
Denver, CO 80202

Dear Mr. Rosenberger:

We are in receipt of the corporate documentation for the merger of Barrett Resources Corporation with and into Williams Production RMT Company.

All documents appear to be in order, and the approval is hereby authorized to change all records, including change of operator of certain oil and gas wells, Rights-of-Way, Communitization Agreements, Oil and Gas Leases; and Exploration and Development Agreements from Barrett Resources Corporation with and into Williams Production RMT Company.

Approval of this name change is the date of this letter, but effective on August 2, 2001. If you have any questions, please do not hesitate to contact this office.

Respectfully,

Acting Superintendent

**CERTIFICATE OF MERGER
OF
BARRETT RESOURCES CORPORATION
INTO
RESOURCES ACQUISITION CORP.**

Pursuant to Section 251 of the General
Corporation Law of the State of Delaware

Resources Acquisition Corp., a Delaware corporation ("Acquisition"), pursuant to Section 251 of the General Corporation Law of the State of Delaware (the "DGCL"), hereby certifies as follows:

FIRST: The name and state of incorporation of each of the constituent corporations to the merger are as follows:

Barrett Resources Corporation	-	Delaware
Resources Acquisition Corp.	-	Delaware

SECOND: An Agreement and Plan of Merger (the "Merger Agreement"), dated as of May 7, 2001, by and among The Williams Companies, Inc., Acquisition and Barrett Resources Corporation ("Barrett") has been approved, adopted, certified, executed and acknowledged by each of the constituent corporations in accordance with Section 251 of the DGCL.

THIRD: Acquisition shall be the corporation surviving the merger (the "Surviving Corporation").

FOURTH: The Certificate of Incorporation of Acquisition shall be the Certificate of Incorporation of the Surviving Corporation until thereafter changed or amended as provided therein or by applicable law; provided, however, that the following changes to the Certificate of Incorporation of Acquisition shall be effected as a result of the merger:

02/02/01

12:08

SKADEN ARPS → D

C

NO. 184

023

1. Article FIRST shall be amended and restated to read as follows:

"The name of the corporation is Williams Production RMT Company."; and

2. Article SIXTH, paragraph 4, shall be amended and restated to read as follows:

"No director shall be personally liable to the Corporation or any of its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability (i) for any breach of the director's duty of loyalty to the Corporation or its stockholders, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) pursuant to Section 174 of the GCL or (iv) for any transaction from which the director derived an improper personal benefit. If the GCL is amended to authorize corporate action further eliminating or limiting the personal liability of directors, then the liability of directors of the Corporation shall be eliminated or limited to the fullest extent permitted by the GCL, as so amended. Any repeal or modification of this Article SIXTH by the stockholders of the Corporation shall not adversely affect any right or protection of a director of the Corporation existing at the time of such repeal or modification with respect to acts or omissions occurring prior to such repeal or modification."

3. The following paragraph shall be added to Article Sixth as paragraph 6 thereto:

"The Corporation shall fully honor and abide by the provisions set forth in Section 7.9 of the Agreement and Plan of Merger dated as of May 7, 2001 (the "Merger Agreement") by and among the The Williams Companies, Inc., the Corporation and Barrott Resources Corporation. Any repeal or modification of this paragraph 6 of this Article SIXTH by the stockholders of the Corporation shall not adversely affect any rights or protections afforded to the Indemnified Persons (as defined in the Merger Agreement) pursuant to this paragraph and Section 7.9 of the Merger Agreement."

FIFTH: The executed Merger Agreement is on file at the office of the Surviving Corporation, 1515 Arapahoe Street, Tower 3 Suite 1000, Denver, Colorado 80202.

3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Verbal approval was received from Ed Forsman of the BLM on 9/15/2003 to modify the BOP stack from the design in the Standard Operating Practices used for drilling at Brundage Canyon. The rig used for drilling this well (Union Drilling Rig #14) is set up for a 2,000# double ram system with out a Hydril. The Standard Operating Practice previously submitted included the use of a Hydril Annular Preventer. This modification complies with the requirements of Onshore Oil and Gas Order No. 2 for a 2,000# BOP system and is commonly used for drilling in the area. See attached diagram which shows the modification.

Correlate Depths to the Halliburton Spectral Density / Dual Spaced Neutron log, dated 9/24/03.

PROGRAM:

- 1) Install surface production equipment and pumping unit.
- 2) NU frachead & BOPE. Load hole & test csg to 2000 psi.
- 3) MIRU wireline w/ mast pole. Run GR/CCL/CBL from PBTd to TOC. Verify PBTd & acceptable cmt bond across zones to be completed. Contact Denver if unsatisfactory. If acceptable, proceed and perf the following **Castle Peak** intervals @ 2 jspf w/ 19.5 gm charges, 0.51" dia. holes:
 - 5,521' - 34' (13', 26 holes)
 - 5,548' - 50' (2', 4 holes)
 - 5,554' - 58' (4', 8 holes)
 - 5,571' - 73' (2', 4 holes)
 - 5,582' - 84' (2', 4 holes)
 - 5,640' - 44' (4', 8 holes)
 - (Total 27', 54 holes)
- 4) RU Halliburton & frac down csg per Halliburton design f/ Interval 1. Tail-in +/- 250 gals. 7 1/2% HCl acid in flush to cover next perf interval. SD & record ISIP. RD frac equip f/ wellhead.
- 5) RU wireline. RIH w/ 5 1/2" solid composite plug; run in tandem w/ 4" csg gun(s). Set plug @ +/- 5,350'. Perf the following **Lower Black Shale** intervals @ 2 jspf, w/ 19.5 gm charges, 0.51" dia. holes:
 - 5,221' - 22' (1', 2 holes)
 - 5,235' - 36' (1', 2 holes)
 - 5,244' - 45' (1', 2 holes)
 - 5,252' - 53' (1', 2 holes)
 - 5,262' - 64' (2', 4 holes)
 - 5,276' - 84' (8', 16 holes)
 - 5,287' - 91' (4', 8 holes)
 - (Total 18', 36 holes)
- 6) RU Halliburton & frac down csg per Halliburton design f/ Interval 2. Tail-in +/- 250 gals. 7 1/2% HCl acid in flush to cover next perf interval. SD & record ISIP. RD frac equip f/ wellhead.

- 7) RU wireline. RIH w/ 5 1/2" solid composite plug; run in tandem w/ 4" csg gun(s). Set plug @ +/- 4,750'. Perf the following **Douglas Creek I4 & I4.5** intervals @ 2 jspf, w/ 19.5 gm charges, 0.51" dia. holes:
 - 4,572' - 81' (9', 18 holes)
 - 4,666' - 72' (6', 12 holes)
 - 4,676' - 80' (4', 8 holes)
 - (Total 19', 38 holes)

- 8) RU Halliburton & frac down csg per Halliburton design f/ Interval 3. Tail-in +/- 250 gals. 7 1/2% HCl acid in flush to cover next perf interval. SD & record ISIP. RD frac equip f/ wellhead.

- 9) RU wireline. RIH w/ 5 1/2" solid composite plug; run in tandem w/ 4" csg gun(s). Set plug @ +/- 4,500'. Perf the following **Douglas Creek I2** intervals @ 4 jspf w/ 19.5 gm charges, 0.51" dia. holes:
 - 4,425' - 31' (6', 24 holes)
 - 4,443' - 46' (3', 12 holes)
 - (Total 9', 36 holes)

- 10) RU Halliburton & frac down csg per Halliburton design f/ Interval 4. SD, record ISIP, and RD frac equip. Open well to pit ASAP and force close frac. Leave well flowing to pit.

- 11) MIRU. PU 2 7/8" tbg w/ bit & scraper. RIH w/ tbg to top of 1st plug. Drill out plug. Repeat for 2nd and 3rd plug. CO to PBTD & circ hole clean. POH & LD bit & scraper.

- 12) PU NC & SN and RIH to mid-perf. RU swab. Swab until hole clean of sand. Verify hole clean to PBTD. POH w/ tbg.

- 13) PU 5 1/2 anchor catcher & RIH w/ NC & SN. Set anchor catcher. ND BOPE & frac head. NU tbg head & flow tee. RIH w/ pump & rod string. Seat pump & space out. Fill tbg & test to 500psi. Hang on clamps. Start well pumping. RD & MO.

Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please see the attached recompletion procedure for the 3-28-54

OPERATOR CHANGES DOCUMENTATION

Enter date after each listed item is completed

- (R649-8-10) Sundry or legal documentation was received from the **FORMER** operator on: 6/13/2014
- (R649-8-10) Sundry or legal documentation was received from the **NEW** operator on: 6/13/2014
- The new company was checked on the **Department of Commerce, Division of Corporations Database** on: 6/17/2014
- 4a. Is the new operator registered in the State of Utah: _____ Business Number: 9031632-0143
- 5a. (R649-9-2) Waste Management Plan has been received on: N/A
- 5b. Inspections of LA PA state/fee well sites complete on: Yes
- 5c. Reports current for Production/Disposition & Sundries on: 6/17/2014
- Federal and Indian Lease Wells:** The BLM and or the BIA has approved the merger, name change, or operator change for all wells listed on Federal or Indian leases on: BLM Not Yet BIA Not Yet
- Federal and Indian Units:**
The BLM or BIA has approved the successor of unit operator for wells listed on: Not Yet
- Federal and Indian Communization Agreements ("CA"):**
The BLM or BIA has approved the operator for all wells listed within a CA on: N/A
- Underground Injection Control ("UIC")** Division has approved UIC Form 5 Transfer of Authority to **Inject**, for the enhanced/secondary recovery unit/project for the water disposal well(s) listed on: N/A

DATA ENTRY:

- Changes entered in the **Oil and Gas Database** on: 6/18/2014
- Changes have been entered on the **Monthly Operator Change Spread Sheet** on: 6/18/2014
- Bond information entered in RBDMS on: 6/23/2014
- Fee/State wells attached to bond in RBDMS on: 6/23/2014
- Injection Projects to new operator in RBDMS on: N/A
- Receipt of Acceptance of Drilling Procedures for APD/New on: 6/18/2014
- Surface Agreement Sundry from **NEW** operator on Fee Surface wells received on: Yes

BOND VERIFICATION:

- Federal well(s) covered by Bond Number: NMB000501
- Indian well(s) covered by Bond Number: NMB000501
- 3a. (R649-3-1) The **NEW** operator of any state/fee well(s) listed covered by Bond Number LPM9149893
- 3b. The **FORMER** operator has requested a release of liability from their bond on: N/A

LEASE INTEREST OWNER NOTIFICATION:

- (R649-2-10) The **NEW** operator of the fee wells has been contacted and informed by a letter from the Division of their responsibility to notify all interest owners of this change on: 6/23/2014

Notice of Change of Operator from Berry Petroleum Company, LLC to Linn Operating, Inc., effective June 1, 2014. On December 16, 2013, Berry Petroleum Company became an indirect subsidiary of Linn Energy, LLC. As a result, Berry Petroleum Company converted into a limited liability company named, "Berry Petroleum Company, LLC". On March 5, 2014, Berry Petroleum Company, LLC authorized and empowered Linn Operating, Inc. to act as operator on its behalf. I have attached a copy of the original declaration amending the name change along with a copy of the agency agreement and power of attorney for the operator change.

12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

On December 16th, 2013 Berry Petroleum Company and Linn Energy merged. As a result of this merger the companies name has changed to "Berry Petroleum Company, LLC". On March 5th, 2014 Berry Petroleum Company, LLC agreed that Linn Operating, Inc would become the operator of record effective June 1, 2014. I have attached a copy of the original declaration amending the name change along with a copy of the agency agreement and power of attorney for the operator change.

Should you have any questions please don't hesitate to contact me.

Request to Transfer Application or Permit to Drill

(This form should accompany a Sundry Notice, Form 9, requesting APD transfer)

Well name:	See Attached
API number:	
Location:	Qtr-Qtr: Section Township Range:
Company that filed original application:	Berry Petroleum Company LLC
Date original permit was issued:	
Company that permit was issued to:	Linn Operating, Inc

Check one	Desired Action:
<input type="checkbox"/>	Transfer pending (unapproved) Application for Permit to Drill to new operator
	The undersigned as owner with legal rights to drill on the property, hereby verifies that the information as submitted in the pending Application for Permit to Drill, remains valid and does not require revision. The new owner of the application accepts and agrees to the information and procedures as stated in the application.
<input checked="" type="checkbox"/>	Transfer approved Application for Permit to Drill to new operator
	The undersigned as owner with legal rights to drill on the property as permitted, hereby verifies that the information as submitted in the previously approved application to drill, remains valid and does not require revision.

Following is a checklist of some items related to the application, which should be verified.	Yes	No
If located on private land, has the ownership changed?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/> If so, has the surface agreement been updated?	<input type="checkbox"/>	<input type="checkbox"/>
Have any wells been drilled in the vicinity of the proposed well which would affect the spacing or siting requirements for this location?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have there been any unit or other agreements put in place that could affect the permitting or operation of this proposed well?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have there been any changes to the access route including ownership or right-of-way, which could affect the proposed location?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Has the approved source of water for drilling changed?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have there been any physical changes to the surface location or access route which will require a change in plans from what was discussed at the onsite evaluation?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Is bonding still in place, which covers this proposed well? Bond No. <u>LPM9149893</u>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Any desired or necessary changes to either a pending or approved Application for Permit to Drill that is being transferred, should be filed on a Sundry Notice, Form 9, or amended Application for Permit to Drill, Form 3, as appropriate, with necessary supporting information as required.
