Surface Statement of Basis

The Berry Tribal 9-23-54 well site is proposed approximately 21.0 miles +/- south of Myton, Utah. Access is by the Right Fork of Antelope road and existing oil field development roads to the road planned for the Berry Tribal 15-23-54 well. This well is along that road requiring 0.5 miles of road yet to be constructed.

The location is on the east slope of a N-S running secondary ridge of Nutters Ridge. To construct the location the top of the ridge will be cut with the fill being placed on the east slope. Terrain is broken in the area but no drainage problems exist.

Nutters Canyon lies about 3/4 mile to the west and Right Fork of Antelope about 1 mile to the southeast. General topography in the area is main ridges with numerous lateral ridges that slope to the west or east. Side slopes on most ridges are steep which confines suitable well locations to the ridge tops or less steep side hills. Both Nutters Canyon and the Right Fork of Antelope Canyon are ephemeral drainages. Antelope Creek below its confluence with the Left Fork becomes a perennial stream, which drains into the Duchesne River near Bridgeland, UT.

The surface for this location is owned by Berry Petroleum Co. and the minerals are owned by the US Government and held in trust for the Ute Indian Tribe. Melissa Hawk represented the BLM who represents the Ute Indian Tribe. She had no comments regarding the location or drilling the well.

The selected location appears to be the best site for drilling and operating a well in the immediate area.

6. This proposed well is located in an area for which drilling units (well spacing patterns) have not been established through an order of the Board of Oil, Gas and Mining (the "Board"). In order to avoid the possibility of waste or injury to correlative rights, the operator is requested, once the well has been drilled, completed, and has produced, to analyze geological and engineering data generated therefrom, as well as any similar data from surrounding areas if available. As soon as is practicable after completion of its analysis, and if the analysis suggests an area larger than the quarter-quarter section upon which the well is located is being drained, the operator is requested to seek an appropriate order from the Board establishing drilling and spacing units in conformance with such analysis by filing a Request for Agency Action with the Board.
