Well No. 2 is located 660 ft. from N line and 1980 ft. from E line of sec. 15

C NW 1/4 (Section No.) 218 (Twp.) 23E (Range) S1M (Meridian)
Grand (County or Subdivision) Utah (State or Territory)

The elevation of the derrick floor above sea level is 3850 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The well will be drilled to and through the Dakota formation, expected at 700 feet. Will either set 8 or 10 inch surface casing. There is a rumor that there is a gravel bed around 45 feet, which of course will be cased through. This condition will determine the size of surface casing, if one string can be used for the job, which will be cemented. A large hole will be carried on down to the Dakota, if possible, if not, will have to reduce the size. Probably a joints of surface will shut off the gravel and surface water, if not more will have to be run for shut off.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Care Loney
Address P.O. Box 418
Fruta, Colorado
By Care Loney
Title Owner

January 8, 1960

Mr. Carl Losey
P. O. Box 418
Fruits, Colorado

Dear Mr. Losey:

This is to acknowledge receipt of your notice of intention to drill Well No. Federal 2, which is to be located 660 feet from the north line and 1980 feet from the east line of Section 15, Township 21 South, Range 23 East, SLEM, Grand County, Utah.

Please be advised that insofar as this office is concerned approval to drill said well is hereby granted. However, this approval is conditional upon a plat being submitted in accordance with Rule C-6 of our rules and regulations.

This approval terminates within 90 days if the above mentioned well is not spudded in within said period.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION
