DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

- Will drill 9" Surface hole to 30'.
- Will run one joint of 7" J-55 Casing.
- Will cement, circulate and pump plug down.
- Will drill 6 1/4" hole to approximately 200'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Re: Notice of Intention to Drill Well
No. UTI Federal #4-1, 2359' FSL &
300' PKL, of Section 4, T. 21 S., R.
24 E., Grand County, Utah

Gentlemen:

Insofar as this office is concerned, approval to drill the above mentioned well is hereby granted. However, this approval is conditional upon a Bond being filed with the U. S. Geological Survey, and two strings of surface casing or an equivalent of 60' being set. This is contradictory to the 30' stipulated on your notice of intention to drill.

We understand that you have discussed this matter with the U. S. Geological Survey, and their tentative approval was given. However, after reviewing the matter with our engineer in Moab, it is the opinion of both this office and the U.S.G.S. that 60' should be the minimum casing set.

The results from drilling this well will be the criteria for the amount of surface casing to be set in the proposed Well No. 4-2. Before spudding in the 4-2 Well, please consult with the U. S. Geological Survey or our office as to the amount of surface casing that will be necessary.

Before any operations can be conducted regarding the cementing of surface casing or plugging of the well, it will be necessary to notify the following personnel so that at least one member may be present to witness the program:

PAUL W. BURCHELL, Chief Petroleum Engineer
Office: DA 8-5771 or DA 8-5772
Home: CR 7-2890 - Salt Lake City, Utah

HARVEY L. COONTS, Petroleum Engineer
Office: AL 3-3161
Home: AL 3-9076 - Moab, Utah
Mobil Phone No. 52 - Out of Monticello

U. S. GEOLOGICAL SURVEY
Office: 524-5650 - Salt Lake City, Utah

April 27, 1964

This approval terminates within 90 days if this well has not been spudded within said period.

Enclosed please find Form OGCC-8-X, which is to be completed if water sands (aquifers) are encountered while drilling, particularly assessable near surface water sands. Your cooperation with respect to completing this form will be greatly appreciated.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

CLEON B. FEIGHT
EXECUTIVE DIRECTOR

Re: Well No. UTI Federal #4-1
Sec. 4, T. 21 S., R. 24 E.,
Grand County, Utah

Gentlemen:

Approval to drill the above mentioned well, which was granted in our letter of April 28, 1964, is hereby terminated, for failure to spud in within the time prescribed.

If and when you should decide to drill this well, it will be necessary for you to again obtain the approval of this Commission.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

CLEON B. FEIGHT
EXECUTIVE DIRECTOR
