Re: Well No. Lansdale - Government  
#18, Sec. 27, T. 18 S., R. 25 E.,  
Grand County, Utah.

Dear Mrs. Lansdale:

Insofar as this office is concerned, approval to drill the above mentioned well is hereby granted in accordance with the Order issued in Cause No. 102-6 on April 10, 1968.

Incidentally, it is recommended that a minimum of 100' surface casing be set with sufficient cement to circulate to surface and proper blowout equipment installed.

Should you determine that it will be necessary to plug and abandon this well, you are hereby requested to immediately notify the following:

PAUL W. BURCHELL, Chief Petroleum Engineer  
OFFICE: 328-5771  
HOME: 277-2890 - Salt Lake City, Utah

This approval terminates within 90 days if the well has not been spudded-in within said period.

Enclosed please find Form OGC-8-X, Report of Water Encountered During Drilling, which is to be completed whether or not water sands (aquifers) are encountered while drilling. Your cooperation with respect to completing this form will be greatly appreciated.

A. Lansdale

October 10, 1968

9-17-82

Charles Bartholomew requested by telecon to re-enter Fandale FED-18, based upon his report that the newly drilled Bookcliff FED 27-44 has been plugged. We do not even have a completion report for FED-18, let alone plugging reports for either well. There should probably be a change of operator notice for the FED-18, also. Both wells are located 27, 18S, 25E - Grand, and FED-18 was allegedly plugged to permit FED 27-44.

Bartholomew left a (over)

number to return approval  
after I had time to research.  
(Steve Hall 303-858-9862)

The msg I left was denial  
until records were put in  
order, and that he should  
call me. - Yvonne 9-17-82

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

An attempt was made to complete this well in the Dakota Formation through perms 550-562', 2 jspf. No gas recovery was obtained after treating with 500 gals. acid due to formation damage caused by a suspected loss circulation zone in the Dakota that contaminated the zone with mud and cement. It is proposed to abandon this well and replace it by drilling a 50' offset, West Bitter Creek #18A. The plans are to abandon this well by setting a cast iron bridge plug at 500' with 1sx cmt on top and a 10 sx plug at surface. The casing will be cut off below ground level so that it will not interfere with the operations in drilling the new well.
