Well No. Navajo B-9 is located 500 ft. from S line and 209.7 ft. from E line of sec. 20  
SE 1/4 Sec. 20 41S 24E S.L.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
White Mesa San Juan County Utah  
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~ground~~ ground above sea level is 4995 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an estimated depth of 5700' to test the Paradox formation. Approximately 175' of 13 3/8" surface casing will be run and cemented and if water flows or unconsolidated sands are encountered, approximately 1400' of 8 5/8" intermediate casing will be run and cemented. If commercial production is found, a string of 5 1/2" production casing will be run and cemented and the well completed.

The well location described above and shown on the attached plat is upon land held under lease by Continental. This location is on pattern and is in conformity with the recognized drilling and spacing units but is near the boundary of Continental's lease because such lease covers only a portion of the lands within the drilling unit. Continental has applied (over)

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Continental Oil Company  
P. O. Box 3312  
Durango, Colorado

Attention: Burton Hall, District Superintendent

Gentlemen:

This is to acknowledge receipt of your notices of intention to drill Well No. Navajo B-8, which is to be located 500 feet from the south line and 660 feet from the west line of Section 20, and Well No. Navajo B-9, which is to be located 500 feet from the south line and 2097 feet from the east line of Section 20, Township 41 South, Range 24 East, SLIM, San Juan County, Utah.

The above notices of intention to drill create somewhat of a problem now that the Commission is cognizant of the fact that there is a dispute to the ownership of the oil and gas rights in this area.

If the contention of the Continental Oil Company is correct, these proposed locations are within 500 feet from a lease line, and without the written approval of Phillips-Aztec, would be in direct conflict with Rule C-3 of the rules and regulations.

Therefore, if it will not result in any undue hardship, the Commission would like to forego approving or disapproving these notices of intention to drill until such time as it has had the opportunity to take up the matter of your application for pooling.

The next regular meeting of the Commission is June 2.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION

CLEON B. FRIGHT  
SECRETARY

Re: Application of Continental Oil  
For An Order Providing For Pooling  
In Certain Drilling and Spacing  
Units Covering the Upper Paradox  
Section of the Hermosa Formation,  
Desert Creek Area, San Juan County,  
Utah - Cause No. 14

Gentlemen:

With reference to our letter of May 13, 1958, relative to the  
above mentioned cause, please be advised that the Commission will  
decide this matter on June 13, 1958.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION
