Gentlemen:

On October 20, 1959, seven Notices of Intention to Drill were filed with the Utah Oil and Gas Commission on locations in the San Juan River bed embraced within ML-11328.

Said well locations were named as follows: FL 1-12, FL 2, 12, FL 3-12, FL 4-11, FL 5-11, FL 6-11, and FL 7-2.

This is to advise with regard to these locations that consultations and negotiations have been conducted with a drilling contractor. Surveying in and staking of locations has proceeded, equipment has been moved to the FL 1-12 location and drilling operations on the FL 1-12 location have been commenced and are proceeding. The well was spudded January 18, 1960.

Due to presently rugged weather conditions, having other equipment snow bound in the Dove Creek area of Colorado, and due to other problems, it was impossible to commence operations on more than one well prior to now. Accordingly, it is respectfully requested that an extension of time in which to spud the following locations be granted: FL 2-12, FL 3-12, FL 4-11, FL 5-11, FL 6-11, and FL 7-2.

Your favorable consideration of this request will be appreciated.

Yours very truly,

Joe Lyon, Jr.
