Gentlemen:

We received U. S. Geological Survey Form 9-331, Sundry Notices and Reports on Wells", which indicates that you have spudded-in the Navajo 1-A Well, Section 8, T. 42 S, R. 25 E. You are hereby requested to file a Notice of Intention to Drill and Location plat for this well as soon as possible. We would like to point out that the notice of intention to drill should have been filed with this Commission before any operations were commenced.

Also, in order that we may keep our files complete, it will be appreciated if you would submit a final well log and any electric and/or radioactivity logs that were run on Well No. Navajo #1, 268' FNL & 1229' FZL of Section 8, T. 42 S, R. 25 E.

Very truly yours,

ATTENTION: Mr. Cleon B. Feight

Dear Mr. Feight:

Thank you very much for your letter of November 18, 1963.
We assumed that our Sundry Notices dated November 13, 1963 reporting
the lost hole (No. 1 Navajo) and skidding the rig to the new location
(No. 1-A Navajo) would be sufficient for record purposes. However,
we enclose herewith:

Well Completion Log re abandonment of No. 1 Navajo
(2 copies)
Application for Permit to Drill, No. 1-A Navajo (2 copies)
Well Location Plat (2 copies).

Yours very truly,

WALTER DUNCAN

If water flow is encountered, will run 8-5/8 intermediate string. Will drill to sufficient depth to test Desert Creek formation, 8-1/2 casing will be run if commercial production is encountered.

This location results from lost hole on No. 1 Navajo (268' S/12; 1229' W/12) as previously reported on Sundry Notice submitted November 11, 1961. Designation of Operator covering this location from Humble Oil and Refining Company to Walter Duncan and Southland Royalty was submitted under date of October 16, 1963.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

INSTRUCTIONS

General: This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 33, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample and core analysis, all types electric, etc.), formation and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be listed on this form, see item 35.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments.

Items 22 and 24: If this well is completed for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement": Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool.

Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)
