Attention: Mr. Cleon B. Feight

Dear Sir:

The attached USGS Form No. 9-331b with accompanying plat is submitted for your approval to drill Phillips Petroleum Company Navajo "A" No. 32 at a location 1650' FS, 1980' FE lines, Section 15-T41S-R24E, San Juan County, Utah.

The proposed location is off-pattern and does not meet requirements of Rule C-3 General Well Spacing Requirements. The proposed location is 990' north of the regular pattern location; is 1980' west of the nearest offset operator's lease line, and approximately 1035' SW of the nearest producing well. This location is approximately 330' north of nearest governmental quarter-quarter section lines.

It is the understanding of this office that approval of the proposed location was granted by the Utah Commission at regular scheduled hearing held May 24, 1960, Cause No. 30, and that official order is forthcoming.

Your early approval of the attached application is respectfully requested.

Very truly yours,

Attention: Mr. P. T. McGrath

Dear Sir:

The attached USGS Form No. 9-331b with accompanying plat is submitted for your approval to drill Phillips Petroleum Company Navajo "A" No. 32 at a location 1650' FS, 1980' FE lines Section 15-T41S-R24E, San Juan County, Utah.

The proposed location is off-pattern and does not meet requirements of Rule C-3 General Well Spacing Requirements. The proposed location is 990' north of the regular pattern location; is 1980' west of nearest offset operator's lease line, and approximately 1035' SW of the nearest producing well. This location is approximately 330' north of nearest governmental quarter-quarter section lines.

Proposal to drill the off-pattern location is based on the following Phillips' contentions:

1. The entire 80-acre unit is oil productive, but with varying degrees of productivity and net pay thickness.
2. A well drilled at the regular pattern location would produce oil, but could not be expected to produce oil in commercial quantity.
3. A well drilled at the proposed location should encounter an average net pay thickness for the area and be capable of commercial production.

Request for exception to regular spacing rules of the Oil & Gas Conservation Commission of the State of Utah was made at regularly scheduled hearing Cause No. 30 at Salt Lake City, Utah, May 24, 1960. It is the understanding of this office that the Utah Commission approved the proposed location and official order is forthcoming.

Your early approval is respectfully requested.

Very truly yours,

C. M. Boles

SUPERIOR OIL COMPANY MERGER

Dear Mr. Firth:

On September 20, 1984, The Superior Oil Company (Superior) became a wholly owned subsidiary of Mobil Corporation. Since January 1, 1985, Mobil Oil Corporation (MOC), another wholly owned subsidiary of Mobil Corporation, has acted as agent for Superior and has operated the Superior-owned properties.

On April 24, 1986, Superior was merged with Mobil Exploration and Producing North America Inc. (MEPNA), which is also a wholly owned subsidiary of Mobil Corporation. MEPNA is the surviving company of the merger.

This letter is to advise you that all properties held in the name of Superior will now be held in the name of MEPNA; and that these properties will continue to be operated by MOC as agent for MEPNA.

Attached is a listing of all wells and a separate listing of injection-disposal wells, Designation of Agent and an organization chart illustrating the relationships of the various companies. If you have any questions or require additional documentation of this merger, please feel free to contact me at the above address or (303) 298-2577.

Very truly yours,

R. D. Baker

Please note the change of name of MOC to ExxonMobil Oil Corporation in your records pertaining to any MOC permits.

The Federal Identification Number for MOC (13-5401570) will remain the same for EMOC.

A copy of the Certification, Bond Rider and a list of wells are attached.

As current operator, we would like to temporarily abandon this wellbore and test it for mechanical integrity. The BLM has recently requested an MIT be performed in order to extend SI status, but the well cannot be tested without a plug in place. If it passes, we would like to leave it TA'd. The well is being transferred to a new operator effective June 1, 2006.
