Re: Well No. So. Ismay #2,
Sec. 32, T. 40 S., R. 26 E.,
San Juan County, Utah

Gentlemen:

Insofar as this office is concerned, approval to drill the above mentioned well on said unorthodox location is hereby granted in accordance with the Order issued in Cause No. 54, on December 9, 1957. However, this approval is conditional upon this office receiving a letter showing consent from the operators of all established drilling units which adjoin or corner the drilling unit upon which said well is to be drilled.

Should you determine that it will be necessary to plug and abandon this well, you are hereby requested to immediately notify the following:

PAUL W. BURCHELL, Chief Petroleum Engineer
HOME: 277-2890 - Salt Lake City, Utah
OFFICE: 328-5771 - 328-5772 - 328-5773

This approval terminates within 90 days if the well has not been spudded-in within said period.

Enclosed please find Form OCCC-8-X, which is to be completed if water sands (aquifers) are encountered while drilling, particularly accessible

AIR MAIL

Utah Oil and Gas Commission
348 E. South Temple
Salt Lake City, Utah

ATTENTION: Mr. Cleon Feight

Gentlemen:

Kimbark Exploration Company has advised that it has become necessary to move the location of their S. Ismay Well No. 2 from the approximate center of the SW/4 SW/4 Section 32 to a location 1,077 feet from the west line and 793 feet from the south line of Section 32-40S-26E. It is our understanding that such change was necessitated by topographic conditions.

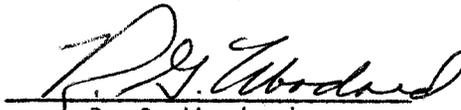

Since this well is offsetting leases owned by Pan American, this is to advise that we have no objection to this change in location.

Very truly yours,

PAN AMERICAN PETROLEUM CORPORATION

INSTRUCTIONS

General: This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary specific instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 33, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample, and core analysis, all types electric, etc.), formation and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be listed on this form, see item 35.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments.

Items 22 and 24: If this well is completed for separate production from more than one interval zone (multiple completions), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement". Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool.

Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

37. SUMMARY OF POROUS ZONES:

July 28, 1966

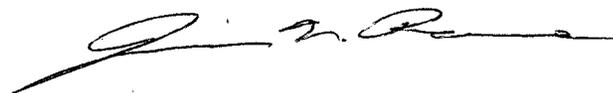

Mr. Paul W. Burchell
Utah Oil & Gas Conservation Commission
348 East South Temple, Suite 301
Salt Lake City, Utah

Dear Mr. Burchell:

As I mentioned in our meeting in Denver July 12, I recently noticed that one of the dikes forming the mud pit at the site of Kimbark Exploration Company's South Ismay No. 2, located in the SW $\frac{1}{4}$, SW $\frac{1}{4}$, Sec. 32, T40S, R26E, shows evidence of seepage through the toe of the dike. Of more concern is the fact that part of this dike has slid away. Although this is an abandoned well, the pit was full of mud which, if the pit were to break, would flow to McElmo Creek.

Please call this condition to the attention of the driller. If you need additional information please feel free to give me a call.

Sincerely yours,

Jim V. Rouse
Assistant Chief

Memorandum

To: Oil and Gas Supervisor, Roswell, New Mexico

From: Petroleum Regulatory Engineer, Farmington, New Mexico

Subject: Kimbark Exploration No. 2 So. Ismay, San Juan Co., Utah

On August 11, 1966, I made an inspection of Kimbark Exploration Company's No. 2 South Ismay in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 32, T. 40 S., R. 26 E. The location was leveled and cleaned up. The mud pits have been filled or leveled. There was no indication of any mud having run off from the pits. I talked with the Monsanto pumper who comes by the well every day and he stated that it had been cleaned up for at least a month. Abandonment was approved on August 11, 1966.

Mr. Paul W. Burchell
Utah Oil & Gas Conservation Commission
348 East South Temple, Suite 301
Salt Lake City, Utah

Dear Mr. Burchell:

A copy of a letter of July 28 to you from Mr. Jim V. Rouse, Assistant Chief, Colorado River Basin Project Field Station, Phoenix, Arizona, was received by this office on August 10. This letter advises that remedial work may be necessary on the mud pit at the South Ismay No. 2 well in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 32, T. 40 S., R. 26 E., in order to prevent a possible source of contamination to McElmo Creek.

Inasmuch as this well is on Navajo tribal lease No. 14-20-603-708, which is under our supervision, we requested our Farmington office to make a field inspection and require the necessary remedial work to prevent any possible contamination. A copy of a memorandum of August 12 from our Farmington office is attached stating that the location at the above described well has been cleaned up and that the mud pits are filled or leveled.

Sincerely yours,

JOHN A. ANDERSON
Regional Oil and Gas Supervisor
