

On May 13th, 2000 while in Mexican Hat Field Mike Hebertson and Chris Kierst were made aware of this well by the current owner of the Field. GPS shot points were collected and the wells researched. There was no record of them in the Wells Database, and the wells were added in January 2001. There is no known original operator, Spud Date, depth of the well, size of the hole, cement tops, or formations penetrated. The casings are old and heavy and the wells are well hidden in the weeds and brush along the San Juan River.
