White River

Well No. 9 is located 2400 ft. from N line and 2400 ft. from W line of sec. 34
NE/SW Sec. 34 8 S 22 E Salt Lake
(¼ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
White River Unit Uintah Utah
(Field) (County or Subdivision) (State or Territory)

~~ground~~ ingraded

The elevation of the derrick ~~floor~~ above sea level is 4919 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

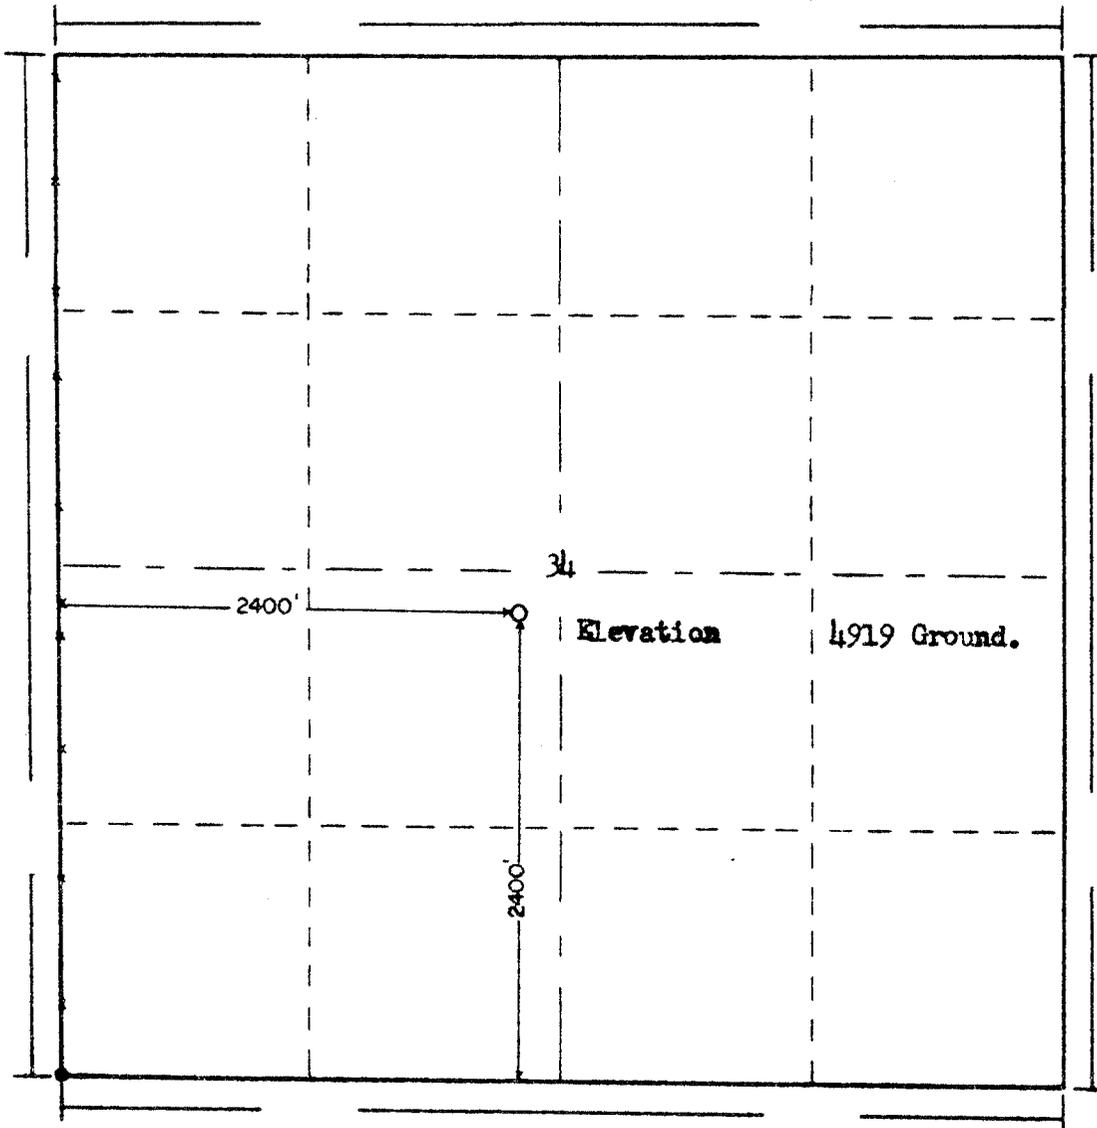

We propose to drill a well on the above location to test the Wasatch formation to 6500'. Surface casing will consist of 9-5/8" 32.30# H-40 set at 200' and cemented to surface. A 8-5/8" hole will be drilled to 2500' where 7" 20# J-55 will be set as intermediate casing if water flows or lost circulation is excessive. A 7-7/8" hole will be drilled to T. D. and electric logs will be run.

If commercial production is encountered, production casing consisting of 4-1/2" 11.6# J-55 ST&C will be run and cemented with sufficient cement to protect all productive zones. Anticipated spud date - October 15, 1961.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
