STATE OF UTAH
OIL AND GAS CONSERVATION COMMISSION
NOTICE OF INTENTION TO DRILL

October 10, 1956

OIL AND GAS CONSERVATION COMMISSION

In compliance with Rule C-4, notice is hereby given that it is our intention to commence work of drilling Well No. 52X-22B, which is located 1040 ft from N line and 2310 ft from E line of Sec. 22, Twp. 9S, R. 20 E, SLM, Ute Trail Unit, Uintah County, on or about 13th day of October, 1956.

LAND: Fee and Patented () Name of Owner of Patent or lease SUN OIL COMPANY
State () Address P.O.Box 1798
Lease No. _____
Public Domain (#) Denver, Colorado
Lease No. U-0577

Is location a regular or exception to spacing rule? Regular Has a surety bond been filed? Yes With whom? Federal Area in drilling unit 640 acres. Elevation of ground above sea level is 4820 ft. All depth measurements taken from top of derrick floor, which is 10 ft. above ground. Type of tools to be used Rotary. Proposed drilling depth 6400 ft. Objective formation is Wasatch.

PROPOSED CASING PROGRAM

Size of Casing Inches A.P. I.	Weight Per Foot	Grade and Type	Amount Ft.	Top Bottom In.	Cementing Depths
13-3/8"	54#	J55	300'	500	sacks to surface
9-5/8"	36#	J55	To 3700'		Cement sufficient to protect zone 3500-3600
7"	20# & 23#	J55	3600' to 6400'		Cement sufficient to protect zone

AFFIDAVIT

I hereby certify under the penalty of perjury, that the information contained and statements herein made are to the best of my knowledge and belief, true, correct and complete

INSTRUCTIONS:

1. Complete this form in duplicate and mail both copies to the Oil and Gas Conservation Commission, Room 105, Capitol Building, Salt Lake City 14, Utah.
2. A plat or map must be attached to this form showing the location of all leases, property lines, drilling and producing wells within an area of sufficient size so that the Commission may determine whether the location of the well conforms to applicable rules, regulations and orders.
3. Any information required by this form that cannot be furnished at the time said form is submitted must be forwarded to the commission as soon as available.
4. Use back of form for remarks.

Vernal Utah
Oct. 25, 1956

Havenstrite Oil Company
Los Angeles, Calif.

Att: Mr. John Gillham

Gentlemen:

Please be advised that the original elevation of well No. 72-22B Federal located in Section 22, T9S. R20E of Uintah County Utah, reported by Powers Elevation service to be Gr.- 4837' and KB- 4848' has proven to be false.

A reurvey of the wells by the county surveyor, tied into Sun's Unit No. 1 shows the elevation to be Gr.- 4820' and KB- 4831'. It would be advisable to change this information on all copies of logs, reports, etc. so that the records will be straight.

Elevation of No. 52X-22B according to the same survey is-

Gr.- 4835'
KB - 4846'

Very truly yours,

Carl H. Browall

DRILL STEM TESTS

All tests run with jars, safety joint and circulating sub.

No. 1 - Johnson Testers, Single Packer 3365, TD 3402. Open 1½ hrs. Strong blow diminishing slightly, Shut in 30 minutes, recovered 1805 ft. of salt water, 24,100 ppm NaCl. Hydrostatic- 1620#, Initial flow- 75#, Final flow- 750#, Shut-in- 1510# Bottom hole temperature- 114° F.

No. 2 - Halliburton single packer- 4096, TD- 4115, open 1½ hrs., fairly strong blow diminishing slightly. Shut in 30 minutes. Recovered 910' fluid. Top 270' very well salt out mud, probably 70% oil. Next 640' salt water, 60,000 ppm NaCl. Initial Hydro- 2090#, initial flow- 50#, final flow- 395#, Shut-in- 1900#, final hydro- 2090#.

No. 3 - Johnson Testers double packer- 4748', TD- 4770', open 1½ hrs. Strong blow for one hour and then decreased. Dead in 1½ hrs. Shut in 30 min. Recovered 30 ft. rat hole mud with about 10% heavy, dead, high pour-point oil. No gas. Oil locked granular. Hydro- 2500#, Initial flow- 10#, final flow- 10#, shut in- 190#. Bottom hole temp.- 126° F

No. 4 - Halliburton double packer- 6151', TD-6201', open 1½ hrs., gas to surface in 15 min. Gauged 95 MCF per day throughout duration of flow. Shut in 30 min. Recovered 295' of gas out mud. No visible water. Initial hydro- 3280#, Initial flow- 90#, final flow- 135#, shut in- 1520#, Final hydro- 3260#.

No. 5 - Johnson Testers double packer- 6353', TD-6405', open one hour, gas to surface in 15 min. Strong blow. Gauged 208 MCF after being open 30 min. and 230 MCF after being open one hour. Recovered 200 ft. of gas out mud with no visible water. Hydro- 3090, Initial flow- 60#, final flow- 80#, shut in- 3100#. Bottom hole temp.- 134° F.

REMARKS

Solid gilsonite was drilled between 1050' and 1145' and between 1150 ft. and 1145'; with scattered gilsonite from 1225' to 1255'.

The zone 4096-4108, DST No. 2, although apparently non-commercial in this well due to short section and presence of water, should be watched in future wells for better sand development.

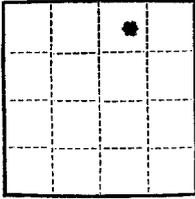

E log shows fair locking sand from 4810 to 4830 that was not tested. Mud log did not show this zone to be as good as zone 4748-4770 which was tested and was no good.

At depth of 6470', the operation was turned over to the Sun Oil Co. for running 7" casing and completing.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

DST No. 1- Johnson Testers- TD-3402, Packer at 3365. Open 1½ hrs., Shut in 30 min. Strong blow diminishing slightly. Recovered 1805 ft. of salty water with some rat-hole mud on top. Water had a salt content of 24,100 PPM. Hydrostatic pressure- 1620#, Initial flow- 75#, final flow- 750#, Shut in pressure- 1510#. Hole temperature at bottom- 114° F.

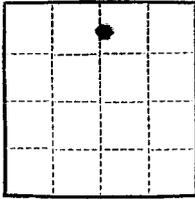

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

NOTICE OF INTENTION TO PULL OR ALTER CASING.....	SUPPLEMENTARY WELL HISTORY.....	
NOTICE OF INTENTION TO ABANDON WELL.....	Report of casing	X

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Nov. 13, 196

Well No. 52X-223 is located 1050 ft. from N line and 2310 ft. from E line of sec. 22

SW-1/4-NE Sec. 22 T9S R20E SL
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Couray Uintah Utah
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4346 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Cored from 3562-3619 (57') Recovered 56'-7"

- 3' 8" Gray-green slightly sandy shale
- 3' 6" fine, tight, calc., shaly sandstone No show
- 8' 3" shale, as above
- 1' 6" fine, tight, calc., sandstone No stain
- 4' 8" shale w/ thin sandstone laminations
- 6' 0" fine, tight, calc., sandstone- spotted to fair staining
- 9' 0" shale
- 0' 6" very shaly sandstone- no stain
- 18' 0" shale with thin sandstone laminations
- 1' 6" fine, tight, sandstone- no stain

Plan to drill to around 4000' and run E. log for correlation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

*Notes
 1-15-57*

The asterisked foot exhibits extremely low permeability and if any fluid is produced a small amount of water may be expected. The permeable feet in the interval from 6184.5 to 6200.5' are interpreted to be gas productive although the water saturations are higher than normal for water free Wasatch gas production and indicate a water cut. Owing to the characteristic low permeability of this zone only very low capacity gas returns should be expected.

NOTE:
 (*) REFER TO ATTACHED LETTER. (2) OFF LOCATION ANALYSES—NO INTERPRETATION OF RESULTS.
 (1) INCOMPLETE CORE RECOVERY—INTERPRETATION RESERVED.

These analyses, opinions or interpretations are based on observations and materials supplied by the client to whom, and for whose exclusive and confidential use, this report is made. The interpretations or opinions expressed represent the best judgment of Core Laboratories, Inc. (all errors and omissions excepted); but Core Laboratories, Inc. and its officers and employees, assume no responsibility and make no warranty or representations, as to the productivity, proper operation, or profitability of any oil, gas or other mineral well or sand in connection with which such report is used or relied upon.

PRESSURE HOLDUP SURVEY
7/3/62

A flowing pressure gradient was run with Amerada RFG 3 pressure gage #16815H (0 to 2000 psi) with a three hour clock at 10:00 AM, 7/3/62. The following steps were made:

<u>RF DEPTH</u>	<u>EXTENSION Inches</u>	<u>PRESSURE psi</u>	<u>GRA DIENT psi/ft</u>
0	.296	510032
1000	.314	572055
2000	.314	627060
3000	.377	687068
4000	.410	747068
5000	.447	815068
5750	.475	866068
6000	.488	888068
6250	.492	897102
6360	.503	927	

The above gradient shows some fluid in the bottom 100' of the hole. The gage was on bottom at 10:00 AM, 7/3/62.

<u>Time & Date</u>	<u>Hours Flowing</u>	<u>Extension Inches</u>	<u>Pressure @ 6360' RF psi</u>
10:00 AM, 7/3/62	0	.503	927
	1/12	.503	927
	1/6	.503	927
	1/4	.503 5	928
	1/3	.504	929

The well was shut in at 10:20 AM and the following buildup recorded.

<u>Time & Date</u>	<u>Hours Shut In</u>	<u>Extension Inches</u>	<u>Pressure @ 6360' RF psi</u>
10:20 AM, 7/3/62	0	.504	929
	1/12	.475	1087
	1/6	.470	1210
	1/4	.457	1334
	1/3	.444	1458
	1/2	.435	1583
	2/3	.428	1707
	1	.425	1830
	1 1/3	.423	1950

Tried to pull gage, but stuck. Started well flowing and left gage hanging in hole. Finally recovered on 7/24/62.

PRESSURE BUILDUP SURVEY
8/1/62 to 8/8/62

Approved RFG-3 pressure gage #15752N (0-4000 psi) was run to 5800' RB at 3:00 PM, 8/1/62 with a 180 hour clock. The well was left flowing until the gage was landed and immediately shut in for a pressure buildup survey. Due to hole conditions the gage was not run to bottom. The following pressure buildup was recorded:

<u>Time & Date</u>	<u>Hours Shut in</u>	<u>Extension inches</u>	<u>Pressure @ 5800' RB psig</u>
3:00 PM, 8/1/62	0	.308	685
	1	.678	1521
	2	.741	1652
	3	.750	1694

	96	.925	2061
	104	.9275	2067
	112	.931	2075
	120	.931	2082
	13	.937	2089
	144	.942	2092
10:00 AM, 8/8/62	15	.943	2102

gage landed at 5815 RB, 8/1/62.

This buildup was recorded during the first eight hours after shut in, it does not appear to be the effect of any well condition in the well.

This application is to request approval to dispose of produced waters in an unlined pit. The subject well produces less than 3 barrels of water per day. The attached water analysis gives the composition of produced waters. Water is produced from the Wasatch-Mesaverde formation. The evaporation rate for the area compensated for annual rainfall is 70 inches per year. The percolation rate is 2-6 inches per hour for the area. The pit itself is 30 square feet at the surface, tapering down to a total depth of 25 square feet on bottom, having a depth of 6½ feet. See the attached maps for location of well site and data on usable water aquifers.

Attachments: (1) Water analysis
(2) Topo map

In the Natural Buttes Unit, electric logs are not run above 2000-2500'. While drilling the surface holes on all of the wells in the unit, various stringers of sand are encountered which contain a small amount of water. No water flows are encountered while drilling at these depths. No major water aquifers are known to exist down to depth of 2500'. The small sand stringers encountered while drilling are not correlative from well to well.

This application is to request approval to dispose of produced waters in an unlined pit with a bentonite seal. The subject well produces less than two BWPB. The attached water analysis gives the composition of produced waters. Water is produced from the Wasatch formation. The evaporation rate for the area compensated for annual rainfall is 70 inches per year. The percolation rate is 2-6 inches per hour for the area. The pit itself is 30' x 30' at the surface, tapering down to 25' x 25', having a depth of 6-1/2 feet. See the attached map for location of well site. The pit is located at the well site.

The areal extent and depth of waters containing less than 10,000 ppm TDS is unknown. The cement for the 4-1/2" casing is brought back near surface which protects all surface waters.

NOTICE

Westport Oil and Gas Company L.P. : Oil and Gas
410 Seventeenth Street, #2300 :
Denver Colorado 80215-7093 :

Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Westport Oil and Gas Company, Inc. into Westport Oil and Gas Company, L.P. with Westport Oil and Gas Company, L.P. being the surviving entity.

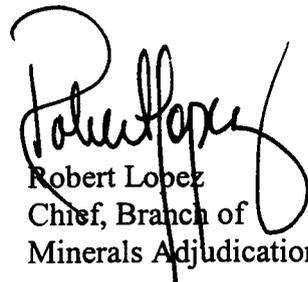

For our purposes, the name change is recognized effective December 31, 2001.

The oil and gas lease files identified have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our computer program. We have not abstracted the lease files to determine if the entities affected by this name change hold an interest in the leases identified nor have we attempted to identify leases where the entities are the operator on the ground maintaining no vested recorded title or operating rights interests. We will be notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

If you identify additional leases in which the entities maintain an interest, please contact this office and we will appropriately document those files with a copy of this Notice.

Due to the name change, the name of the principal/obligor on the bond is required to be changed from Westport Oil and Gas Company, Inc. to Westport Oil and Gas Company, L.P.. You may accomplish this either by consent of surety rider on the original bond or a rider to the original bond. The bonds are held in Colorado.

memorandum

Branch of Real Estate Services
Uintah & Ouray Agency

Date: 5 December, 2002

Reply to
Attn of: Supervisory Petroleum Engineer

Subject: Modification of Utah Division of Oil, Gas and Mining Regulations

To: Director, Utah Division of Oil, Gas and Mining Division: John Baza

We have been advised of changes occurring with the operation of your database for Change of Operator. You will be modifying your records to reflect Change of Operator once you have received all necessary documentation from the companies involved, and perhaps in advance of our Notice of Concurrence/Approval of Change of Operator where Indian leases are involved.

We have no objection.

With further comment to Rulemaking, I wish to comment concerning the provision of Exhibits for upcoming Hearings. I would like to see the Uintah & Ouray Agency, BIA, and the Ute Indian Tribe, Energy & Mineral Resources Department added to the list of those parties that receive advance Exhibits so as to allow us to have research time prior to Hearing dates. We will be able to provide a more informed recommendation to the Oil, Gas and Mining Board. It would be best if we would receive only those Exhibits that concern Indian lands, specifically on or adjacent to Indian lands. This may be a difficult situation to attain, as it is not always clear where 'on or adjacent' occurs.

I am aware that you have gone to extra effort to correct this matter already, and I fully appreciate it. My request is intended only to allow the addition of Uintah & Ouray Agency and Ute Indian Tribe to the official listing.

We appreciate your concern, and hope that these comments are timely enough for consideration in the revision process.

FEB 10 2003

Carroll A. Wilson
Principal Landman
Westport Oil and Gas Company, L.P.
1368 South 1200 East
Vernal, Utah 84078

Dear Mr. Wilson:

This is in response to your request for approval of RLI Insurance Company's Nationwide Oil and Gas Lease Bond No. RLB0005239 executed effective December 17, 2002, (\$150,000 coverage) with Westport Oil and Gas Company, L. P., as principal.

This bond is hereby approved as of the date of this correspondence and will be retained in the Bureau of Indian Affairs' Division of Real Estate Services, 1849 C Street, NW, MS-4512-MIB, Washington, D.C. 20240. All Bureau oil and gas regional offices and the surety are being informed of this action.

In cases where you have existing individual and/or collective bonds on file with one or more of our regional offices, you may now request those offices, directly, to terminate in lieu of coverage under this Nationwide Bond.

Enclosed is a copy of the approved bond for your files. If we may be of further assistance in this matter, please advise.

Sincerely,

A handwritten signature in cursive script, appearing to read "Perry E. Brown".

COC017387 et. al.

March 23, 2006

NOTICE

Kerr-McGee Oil & Gas Onshore L.P. :
1999 Broadway, Suite 3700 : Oil & Gas
Denver, CO 80202 :

Merger/Name Change - Recognized

On February 28, 2006 this office received acceptable evidence of the following mergers and name conversion:

Kerr-McGee Oil & Gas Onshore L.P., a Delaware Limited Partnership, and Kerr-McGee Oil & Gas Onshore LLC, a Delaware Limited Partnership merger with and into Westport Oil and Gas Company L.P., a Delaware Limited Partnership, and subsequent Westport Oil & Gas Company L.P. name conversion to Kerr-McGee Oil & Gas Onshore L.P.

For our purposes the merger and name conversion was effective January 4, 2006, the date the Secretary of State of Delaware authenticated the mergers and name conversion.

Kerr-McGee Oil & Gas Onshore L.P. provided a list of oil and gas leases held by the merging parties with the request that the Bureau of Land Management change all their lease records from the named entities to the new entity, Kerr-McGee Oil & Gas Onshore L.P. In response to this request each state is asked to retrieve their own list of leases in the names of these entities from the Bureau of Land Management's (BLM) automated LR2000 data base.

The oil and gas lease files identified on the list provided by Kerr-McGee Oil & Gas Onshore L.P. have been updated as to the merger and name conversion. We have not abstracted the lease files to determine if the entities affected by the acceptance of these documents holds an interest in the lease, nor have we attempt to identify leases where the entity is the operator on the ground that maintains vested record title or operating rights interests. If additional documentation, for change of operator, is required you will be contacted directly by the appropriate Field Office. The Mineral Management Services (MMS) and other applicable BLM offices were notified of the merger with a copy of this notice

Please contact this office if you identify additional leases where the merging party maintains an interest, under our jurisdiction, and we will document the case files with a copy of this notice. If the leases are under the jurisdiction of another State Office that information will be forwarded to them for their action.

Three riders accompanied the merger/name conversion documents which will add Kerr-McGee Oil and Gas Onshore LLC as a principal to the 3 Kerr-McGee bonds maintained by the Wyoming State Office. These riders will be forward to them for their acceptance.

The Nationwide Oil & Gas Continental Casualty Company Bond #158626364 (BLM Bond #CO1203), maintained by the Colorado State Office, will remain in full force and effect until an assumption rider is accepted by the Wyoming State Office that conditions their Nationwide Safeco bond to accept all outstanding liability on the oil and gas leases attached to the Colorado bond.

If you have questions about this action you may call me at 303.239.3768.
