Dear Sir:

A joint field examination was made on February 11, 1981, of the above referenced well site locations and proposed access roads. We feel that the surface use and operating plans are adequate with the following revisions and stipulations:

1. Construction and maintenance of roads, rehabilitation of disturbed areas and construction of pipeline routes, shall be in accordance with surface use standards as set forth in the brochure, "Surface Operating Standards for Oil and Gas Exploration and Development."
2. Traveling off access road right-of-ways will not be allowed. The maximum width of access pads (both existing and planned) will be 30 feet total disturbed area. Roads will be crowned and properly maintained. Turn-outs will not be required.
3. The BLM will be notified at least 24 hours prior to any construction.
4. Burn pits will not be constructed. There will be no burning or burying of trash or garbage at the well sites. Refuse must be contained in trash cages and hauled to an approved disposal site.

5. A wire mesh or net type of fence, topped with at least one strand of barbed wire, will be used around the reserve pits.
6. The BLM will be contacted at least 24 hours prior to any rehabilitation activities. The operator may be informed of any additional needed seeding and restoration requirements.
7. PR Spring may not be used as a water source.
8. Live trees that must be removed may be pushed over and stockpiled separately from the topsoil. Large pieces of dead wood should also be stockpiled separately from the topsoil.
9. It was agreed to by all parties present that the applied for dimensions are adequate to handle all drilling and fracturing operations.
10. These wells will be in winter shut down locations. In order to minimize watershed damage at these sites will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells.
11. Topsoil will be stockpiled as addressed in the applicants I3 Point Plan. The BLM recommends the to (6 to 8) inches of soil material be stockpiled at all but Well #13-25-14-23. At this location the top 4-6 inches should be gathered and stored between reference points #1 and #8.
12. All pad dimensions were changed to 350 feet by 175 feet. All pit sizes were changed to 40 feet by 350 feet.

An archaeological clearance was done by the Gordan and Kranzush company. No cultural resources were found.

The proposed activities do not jeopardize listed, threatened, or endangered flora/fauna or their habitats as long as the above stipulations are adhered to.

The BLM representative will be Cory Bodman, 789-1362.

PROPOSED ACTION:

Coseka Resources proposes to drill the Coseka 3-26-14-23 well, a 9174 foot depth gas test of the Mancos "B" and Dakota Formations. About .5 miles of existing jeep trail will be upgraded to an 18' crown road with drainage ditches where needed. A pad 175 feet by 350 feet and a pit 40 feet by 350 feet are proposed for the location. Part of the pit would be used for a blooie pit and the remainder for reserve pits.

RECOMMENDED APPROVAL CONDITIONS:

Drilling should be permitted provided the operator agrees to accept the following additional measures into the APD and operating plans and adhere to them:

1. BLM Stipulations
2. Lease Stipulations
3. Furnish adequate logs of other potentially valuable minerals as requested in the Mineral Evaluation Report and Mining Report.

According to our records, A "Well Completion Report" Filed with this office 8912981, from above referred to well, indicates the following electric logs were run: DIL, FDC-CNL-GR, CBL-VDL-GR. As of today's date, this office has not received the CBL-VDL-GR log.

Rule C-5, General Rules and Regulations and Rules of Practice and Procedure, requires that a well log shall be filed with the commission together with a copy of the electric and radioactivity logs.

Your prompt attention to the above will be greatly appreciated.

onse to State of Utah letter dated 2/19/99A20: SI/TA Well Compliance Review. Subject well is currently shut-in waiting for pipeline connection and improved gas marketing conditions. Last IP test was 191 MCFD. BFC requests an extension of the current well status until gas market conditions improve. BFC offers the following explanation and supporting data to show the well has mechanical integrity: 1) Base of "Moderately Saline Ground Water" is approximately 3357' (Tech Pub 92--State of Utah, Dept of Natural Resources). This water is protected by Surface Casing (9-5/8" @ 318' w/ 200 Sx Cement), Intermediate Casing (7" @ 5170' w/ 110 Sx Cement) and Production Casing (4-1/2" @ 9360' w/ 135 Sx Cement) 2) Surface equipment has been inspected and is in sound working condition with no detectable leaks. 3) Offset wells have exhibited no visible corrosion in downhole equipment when pulled. 4) Wellhead pressure is 1700 psig and has been stable, indicating no underground leakage. BFC hereby states that the well is not a risk to public health and safety or to the environment and respectfully requests an extension of the current well status.

Carbon Energy Corporation (USA) : Oil and Gas Leases  
1700 Broadway, Suite 1150 :  
Denver, Colorado 80290 :

#### Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Bonneville Fuels Corporation to Carbon Energy Corporation (USA) on Federal oil and gas leases. For our purposes, the name change is recognized effective July 11, 2002, the date of acceptance by the Secretary of State of Colorado.

The oil and gas lease files identified on the enclosed exhibit have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our automated records system. We have not abstracted the lease files to determine if the entity affected by the name change holds an interest in the leases identified nor have we attempted to identify leases where the entity is the operator on the ground maintaining no vested record title or operating rights interests. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

Due to the name change, the name of the principal on the statewide oil and gas bonds BLM Bond Nos. CO0743, MT1085, NM1755, and UT0604 automatically changed by operation of law from Bonneville Fuels Corporation to Carbon Energy Corporation (USA).

If you identify additional leases affected by the name change, please contact this office and we will document the files under our jurisdiction with a copy of this notice. If the leases are under the jurisdiction of another State Office, we will notify them.
