PROPOSED ACTION:

Coseka Resources proposes to drill the Coseka 7-15-15-21 well, a 10,488' gas test of the Dakota and Mancos "B" formations. A new access road of .7 miles length is planned. An area of operations 215' by 350' is requested for the pad and will include the reserve pit.

RECOMMENDED APPROVAL CONDITIONS:

The operator agrees to accept and adhere to the following conditions in addition to the plans outlined in the APD:

1. BLM Stipulations
2. Lease Stipulations
3. Provide adequate logs for the identification of other minerals as requested in the Mineral Evaluation Report and Mining Report.

Dear Mr. Guynn:

A joint examination was made on March 12, 1981, of the above referenced well site locations and proposed access roads. We feel that the surface use and operating plans are adequate with the following stipulations:

1. Construction and maintenance of roads, rehabilitation of disturbed areas, and construction of pipeline routes, shall be in accordance with surface use standards as set forth in the brochure, "Surface Operating Standards for Oil and Gas Exploration and Development."
2. Traveling off access road rights-of-way will not be allowed. The maximum width of access road (both existing and planned) will be 30 feet total disturbed area, except where backslopes and fills require additional area. Turnouts will not be required.
3. It was agreed upon by all parties present that the applied for pad sizes are of adequate size to handle all drilling and fracturing operations.
4. The BLM must be contacted at least 24 hours prior to any construction activities.
5. The BLM will be contacted at least 24 hours prior to any rehabilitation activities. The operator may be informed of any additional needed seeding and restoration requirements.

Continuad. . . .

6. Burn pits will not be constructed. There will be no burning or burying of trash or garbage at the well sites. Refuse must be contained and hauled to an approved disposal site.
7. PR Spring may not be used as a water source.
8. A wire mesh or net type of fence, topped with at least one strand of barbed wire, will be used around the reserve pits.
9. Live trees that must be removed may be pushed over and stockpiled separately from the topsoil. Large pieces of dead wood should also be stockpiled separately from the topsoil.

All the locations are located in a Winter shut down location. Exploration, drilling and other development activity will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells. Exceptions to their limitation in any year may be specifically authorized in writing by the District Engineer, Geological Survey, with concurrence of the District Manager, Bureau of Land Management.

#### Site Specific

Wells # 7-15-15-21 and 5-13-15-21

- T The top 6-8 inches of topsoil will be gathered and stockpiled between corners # 7 and 8.

Well # 6-14815-21 6-8.

- The top 6 inches of topsoil will be gathered and stockpiled between corners # 2 and 3.

Well # 3-34-15½-25

- The top 4-6 inches of topsoil will be gathered and stockpiled between corners # 2 and 3.

We have received cultural reports on wells # 6-14-15-21 and # 7-15-15-21. No cultural material was found. We have not received any cultural reports on wells # 3-34-15½-25 and # 5-13-15-21. No surface disturbance should occur until we have and review the required report.

The proposed activities do not jeopardize listed, threatened or endangered flora/fauna or their habitats.

Gentlemen:

According to our records, a "Well Completion Report" filed with this office November 6, 1981, from above referred to wells, indicates the following electric logs were run: #9-3-15-23, DIL, FDC-CNL-GR, CBL-VDL-GR-- #7-15-15-21, Same. As of todays date, this office has not received these logs.

Rule C-5, General Rules and Regulations and Rules of Practice and Procedure, requires that a well log shall be filed with the Commission together with a copy of the electric and radioactivity logs.

Your prompt attention to the above will be greatly appreciated.

Sincerely,

DIVISION OF OIL, GAS AND MINING

Well Completion Data:

Perforations: Dakota 9553' - 9789'  
Buckhorn-Morrison 9804' - 10,026'

The subject well was completed through the above mentioned perfs. and fracture treated. All of the completed zones are very similar in that they are low permeability (0.02 md - 0.10 md) lenticular sands with pressure gradients of about 0.21 psi/ft. and nearly equal reservoir pressures. Gas and liquid compositions are nearly identical.

To avoid the operational problems associated with an attempt to isolate the zones for production, it is requested that downhole commingling granted.

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

*Response to State of Utah letter dated 2/19/99: SI/TA Well Compliance Review. Subject well is currently shut-in waiting for pipeline connection and improved gas marketing conditions. Last IP test was 287 MCFD. BFC requests an extension of the current well status until gas market conditions improve. BFC offers the following explanation and supporting data to show the well has mechanical integrity: 1) Base of "Moderately Saline Ground Water" is approximately 4498' (Tech Pub 92--State of Utah, Dept of Natural Resources). This water is protected by Surface Casing (9-5/8" @ 436' w/ 300 Sx Cement), Intermediate Casing (7" @ 6178' w/ 185 Sx Cement) and Production Casing (4-1/2" @ 10178' w/ 150 Sx Cement) 2) Surface equipment has been inspected and is in sound working condition with no detectable leaks. 3) Offset wells have exhibited no visible corrosion in downhole equipment when pulled. 4) Wellhead pressure is 2200 psig and has been stable, indicating no underground leakage. BFC hereby states that the well is not a risk to public health and safety or to the environment and respectfully requests an extension of the current well status.*

14. I hereby certify that the foregoing is true and correct.

### NOTICE

Carbon Energy Corporation (USA) : Oil and Gas Leases  
1700 Broadway, Suite 1150 :  
Denver, Colorado 80290 :

#### Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Bonneville Fuels Corporation to Carbon Energy Corporation (USA) on Federal oil and gas leases. For our purposes, the name change is recognized effective July 11, 2002, the date of acceptance by the Secretary of State of Colorado.

The oil and gas lease files identified on the enclosed exhibit have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our automated records system. We have not abstracted the lease files to determine if the entity affected by the name change holds an interest in the leases identified nor have we attempted to identify leases where the entity is the operator on the ground maintaining no vested record title or operating rights interests. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

Due to the name change, the name of the principal on the statewide oil and gas bonds BLM Bond Nos. CO0743, MT1085, NM1755, and UT0604 automatically changed by operation of law from Bonneville Fuels Corporation to Carbon Energy Corporation (USA).

If you identify additional leases affected by the name change, please contact this office and we will document the files under our jurisdiction with a copy of this notice. If the leases are under the jurisdiction of another State Office, we will notify them.
