Dear Mr. Gynn:

A joint field examination was made on April 7, 1981, of the above referenced well site locations and proposed access roads. We feel that the surface use operating plans are adequate with the following stipulations:

1. Construction and maintenance of roads, rehabilitation of disturbed areas, and construction of pipeline routes, shall be in accordance with surface use standards as set forth in the brochure, "Surface Operating Standards for Oil and Gas Exploration and Development."
2. Traveling off access road rights-of-way will not be allowed. The maximum width of access roads (both existing and planned) will be 30 feet total disturbed area, except where backslope and fills require additional area. Turn-outs will not be required. The access road will be crowned and bar ditched where needed.

Continued

3. Topsoil will be stockpiled as addressed in the applicant's 13 Point Plan with the following exceptions: Well #7-29-13-23 will have its topsoil stockpiled on the east side of the pad. The following amounts of topsoil are the minimum amounts to be stripped off the pads and stockpiled:

#7-29-13-23	3"	#8-17-15-23	6"
#11-4-14-24	6"	#2-18-15-22	6"
#14-9-14-24	6"	#6-13-14-23	6"
#8-20-14-22	6"		

4. The BLM must be contacted at least 24 hours prior to any construction activities.
5. The BLM will be contacted at least 24 hours prior to any rehabilitation activities. The operator may be informed of any additional needed seeding and restoration requirements.
6. Burn pits will not be constructed. There will be no burning or burying of trash or garbage at the well site. Refuse must be contained and hauled to an approved disposal site. Litter along access roads will be collected and disposed of properly.
7. A wire mesh or web type of fence will be used around the reserve pits. At least two strands of barbed wire will top this fence.
8. If oil storage tanks are installed, a retaining dike will be constructed around the tanks of sufficient height to contain the oil in the event of tank failure.
9. Reserve pits will be at least 4 feet of their depths below the natural ground surface.
10. Production facilities will be painted with colors which blend in with the natural background. Various earth tones can accomplish this.
11. The drilling pad for Well #8-20-14-22 will be built as described in the submitted APD and not how it is actually staked.
12. The access roads for Well #8-20-14-22 and Well #2-18-15-22 require a right-of-way permit. Right-of-ways are required for access from the lease or unit agreement boundary to a county maintained road.

13. Water may not be obtained from any stock watering ponds on BLM administered lands. The water source in South Canyon has been recognized as an acceptable location for obtaining water. Any other sources of water from BLM lands will require our prior approval and acceptable documentation showing water rights.

All of the wells except #8-20-14-22 require cultural resource clearances. No surface disturbances will be permitted until this is accomplished.

The proposed activities do not jeopardize listed, threatened, or endangered flora/fauna or their habitats.

The BLM representative will be Ron Rogers, 789-1362.

Sincerely,

Dean L. Evans

Response to State of Utah letter dated 2/19/99: SI/TA Well Compliance Review. Subject well is currently shut-in waiting for pipeline connection and improved gas marketing conditions. Last IP test was 415 MCFD. BFC requests an extension of the current well status until gas market conditions improve. BFC offers the following explanation and supporting data to show the well has mechanical integrity: 1) Base of "Moderately Saline Ground Water" is approximately 3295' (Tech Pub 92--State of Utah, Dept of Natural Resources). This water is protected by Surface Casing (8-5/8" @ 370' w/unknown amount of Cement, and Production Casing (4-1/2" @ 7010' w/ 450 Sx Cement) 2) Surface equipment has been inspected and is in sound working condition with no detectable leaks. 3) Offset wells have exhibited no visible corrosion in downhole equipment when pulled. 4) Wellhead pressure is 1380 psig and has been stable, indicating no underground leakage. BFC hereby states that the well is not a risk to public health and safety or to the environment and respectfully requests an extension of the current well status.

NOTICE

Carbon Energy Corporation (USA) : Oil and Gas Leases
1700 Broadway, Suite 1150 :
Denver, Colorado 80290 :

Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Bonneville Fuels Corporation to Carbon Energy Corporation (USA) on Federal oil and gas leases. For our purposes, the name change is recognized effective July 11, 2002, the date of acceptance by the Secretary of State of Colorado.

The oil and gas lease files identified on the enclosed exhibit have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our automated records system. We have not abstracted the lease files to determine if the entity affected by the name change holds an interest in the leases identified nor have we attempted to identify leases where the entity is the operator on the ground maintaining no vested record title or operating rights interests. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

Due to the name change, the name of the principal on the statewide oil and gas bonds BLM Bond Nos. CO0743, MT1085, NM1755, and UT0604 automatically changed by operation of law from Bonneville Fuels Corporation to Carbon Energy Corporation (USA).

If you identify additional leases affected by the name change, please contact this office and we will document the files under our jurisdiction with a copy of this notice. If the leases are under the jurisdiction of another State Office, we will notify them.
