The seeding of the reserve pit shall be done in the same manner as the seeding of the topsoil pile, however, seeding of the pipeline disturbance and the location after final abandonment could be completed by drilling the seed, broadcasting the seed and dragging the disturbed area to cover the seed, or by broadcasting the seed then walking it in with a dozer.

All seeding shall be done immediately after the dirt work has been completed.

The reserve pit shall be lined with a plastic nylon reinforced liner. It will be a minimum of 12 mil thickness with sufficient bedding (either straw or dirt) to cover any rocks. The liner will overlap the pit walls and be covered with dirt and/or rocks to hold it in place. No trash, scrap pipe, etc., that could puncture the liner will be disposed of in the pit.

Construction/upgrading shall include ditching, draining, and crowning (2 to 3%). Graveling or capping the roadbed will be required as necessary to provide a well constructed safe road. Prior to construction/upgrading, the proposed road surface or existing road shall be cleared of any snow cover and allowed to dry completely. Traveling off the 30 foot right-of-way will not be allowed. Should mud holes develop, they shall be filled in to prevent detours. Road drainage crossings shall be of the typical dry creek drainage crossing type. Crossings shall be designed so they will not cause siltation or accumulation of debris in the drainage crossing nor shall the drainage be blocked by the roadbed. Erosion of drainage ditches by runoff water shall be prevented by diverting water off at frequent intervals by means of cutouts. Upgrading shall not be allowed during muddy conditions. When snow is removed from the road during the winter months, the snow should be pushed outside of the burrow ditches and the turn outs should be kept clear so that when the snow melts the water will be channeled away from the road.

Shenandoah Energy will control noxious weeds along the right-of-way for roads, pipelines, well sites or other applicable facilities. If noxious weeds spread from disturbed areas onto adjoining lands, Shenandoah shall be responsible for control of the infestation. A list of noxious weeds may be obtained from the BLM, or the appropriate County Extension Office. On BLM administered land it is required that a Pesticide Use Proposal shall be submitted, and given approval, prior to the application of herbicides or other pesticides or possible hazardous chemicals.

4 to 6 inches of topsoil shall be stripped from the location and windowed on both the west and east ends of the location as shown on the cut sheet. This topsoil shall be seeded as described in the standard operating plan with the recommended seed mix shown below.

The pipeline disturbance will be kept to a 30' width. The topsoil shall be stripped and windowed along the edge of the cleared area, then replaced prior to seeding the disturbed area. Care should be taken not to mix the topsoil with the subsoil from the trench.

-The following seed mix should be used to seed the topsoil pile, pipeline disturbance, reserve pit and for final abandonment:

Fourwing saltbush	Atriplex canescens	4 lbs./acre
Needle and thread grass	Stipa comata	4 lbs./acre
Western wheatgrass	Agropyron smithii	4 lbs./acre

All poundages are in pure live seed.

Narrative:

This well was drilled and completed in August 2000 and completed in October 2000 with IP production via rod pump of 86 BOD; 29 BWD and 9 MCFD. The wellbore consists of perms.in the Eu6; Ev5; Ly2 and Mesa zones. The proposal to convert this well into an injection well will be performed by squeezing the Eagle zones and running a packer and tbg.and initiate injection into the Ly2 and Mesa zones. Re: Red Wash Unit
Uintah County, Utah

Gentlemen:

On April 12, 2007, we received an indenture dated April 6, 2007, whereby QEP Uinta Basin, Inc. resigned as Unit Operator and Questar Exploration and Production Company was designated as Successor Unit Operator for the Red Wash Unit, Uintah County, Utah.

This indenture was executed by all required parties and the signatory parties have complied with Sections 5 and 6 of the unit agreement. The instrument is hereby approved effective April 23, 2007. In approving this designation, the Authorized Officer neither warrants nor certifies that the designated party has obtained all required approval that would entitle it to conduct operations under the Red Wash Unit Agreement.

Your nationwide oil and gas bond No. ESB000024 will be used to cover all federal operations within the Red Wash Unit.

It is requested that you notify all interested parties of the change in unit operator. Copies of the approved instruments are being distributed to the appropriate federal offices, with one copy returned herewith.

Sincerely,

/s/ Greg J. Noble

Dear Ms. Anderson:

On January 12, 2011, EPA received information from QEP Energy Company on the above referenced well concerning the mechanical integrity test (MIT) conducted on December 29, 2010. This well has been in a state of temporary abandonment. The data submitted shows that the well passed the required MIT. Therefore, pursuant to Title 40 of the Code of Federal Regulations Section 144.51(q)(2) (40 C.F.R. §144.51(q)(2)), permission to resume injection is granted. Under continuous service, the next MIT will be due on or before December 29, 2015.

In reviewing the file for the well referenced above, EPA determined that QEP Energy Company has failed to timely conduct a required mechanical integrity test (MIT). Our records show that the last MIT was conducted on July 17, 2007. The well entered a state of temporary abandonment in October 2008. QEP was required to conduct an MIT no later than October 2010, two years after the temporary abandonment status began. Pursuant to Title 40 of the Code of Federal Regulations Section 146.23(b)(3) (40 C.F.R. §146.23(b)(3)) and the Part II of the UIC permit for this well, QEP is required to demonstrate mechanical integrity at least every two years for temporarily abandoned wells. QEP's failure to timely conduct required a mechanical integrity demonstration is a violation.

Pursuant to 40 C.F.R. §144.52(a)(6), if the well is not used for a period of at least two (2) years ("temporary abandonment"), it shall be plugged and abandoned unless EPA is notified and procedures are described to EPA ensuring the well will not endanger underground sources of drinking water ("non-endangerment demonstration") during its continued temporary abandonment. A successful MIT is an acceptable non-endangerment demonstration and would be necessary every two (2) years the well continues in temporary abandonment.

Failure to comply with a UIC Permit, or the UIC regulations found at 40 C.F.R. Parts 144 through 148 constitute one or more violations of the Safe Drinking Water Act, 42 U.S.C. §300h. Such non-compliance may subject you to formal enforcement by EPA, as codified at 40 C.F.R. Part 22.

If you have any questions concerning this letter, you may contact Sarah Roberts at (303) 312-7056. Please direct all correspondence to the attention of Sarah Roberts at Mail Code 8ENF-UFO.

Sincerely,

Sandra A. Stavnes, Director
