Geology/Ground Water:

Shenandoah proposes to set 450' of surface casing at this location. The depth to the base of the moderately saline water at this location is estimated to be at a depth of 5,400'. A search of Division of Water Rights records shows 25 water wells within a 10,000 foot radius of the center of section 16. These wells are owned by Chevron their use is listed as "other". The depth of these wells ranges from 5469-5915 feet and are probably water supply wells for the Red Wash secondary recovery project. The surface formation at this site is the Uinta Formation. The Uinta Formation is made up of interbedded shales and sandstones. The sandstones are mostly lenticular and discontinuous and should not be a significant source of useable ground water. Production casing cement should be brought to above the base of the moderately saline groundwater in order to isolate it from fresher waters uphole.

Reviewer: Brad Hill **Date:** 02/24/2003

Surface:

The predrill investigation of the surface was performed on 2/20/03. Floyd Bartlett with DWR and Ed Bonner with SITLA were invited to this investigation on 2/13/03. Mr. Bartlett was present. He had no concerns regarding the construction of this location or the drilling of this well. This site is very near two dry watercourses, and there are numerous sandstone outcroppings in the area. Reserve pit stakes are missing, but reserve pit must be constructed south of wellbore. Raylene Searle with Shenandoah stated that site would probably be re-surveyed before location construction began. This site is in a very rugged area with extremely steep sided, narrow dry watercourses draining primarily to the north.

Reviewer: David W. Hackford **Date:** 2/20/2003

Conditions of Approval/Application for Permit to Drill:

1. A synthetic liner with a minimum thickness of 12 mils shall be properly installed and maintained in the reserve pit.
2. Reserve pit must be constructed south of wellbore.

Re: Red Wash Unit
Uintah County, Utah

Gentlemen:

On April 12, 2007, we received an indenture dated April 6, 2007, whereby QEP Uinta Basin, Inc. resigned as Unit Operator and Questar Exploration and Production Company was designated as Successor Unit Operator for the Red Wash Unit, Uintah County, Utah.

This indenture was executed by all required parties and the signatory parties have complied with Sections 5 and 6 of the unit agreement. The instrument is hereby approved effective April 23, 2007. In approving this designation, the Authorized Officer neither warrants nor certifies that the designated party has obtained all required approval that would entitle it to conduct operations under the Red Wash Unit Agreement.

Your nationwide oil and gas bond No. ESB000024 will be used to cover all federal operations within the Red Wash Unit.

It is requested that you notify all interested parties of the change in unit operator. Copies of the approved instruments are being distributed to the appropriate federal offices, with one copy returned herewith.

Sincerely,

/s/ Greg J. Noble
