WASHINGTON COUNTY
Virgin

Hobson & Lowe Well #1
NWNWSE Sec. 12-41S-12W (Pat.) DEC - 1930

Commenced drilling November 26. Set 43' of 27# 6 1/4" casing with two sacks of cement, shutting off surface water at 23'. Drilling at 310' when visited. If this well is successful, it will mean development of heretofore undrilled land northeast of the producing area, and will require offsetting on Lease Salt Lake 033712-A. This new operator also seems impressed with the possibilities of a deep test.

STATUS: New drilling well (Visited 12-9-30)

Hobson & Lowe Well #1
NWNWSE Sec. 12-41S-12W (Pat.) JAN - - 1931

Drilled to 704'. Oil cuts reported at 662' and 675'-87' in brownish gray sandy lime shale. The well was shot, but less than a bailer of oil per day obtained. Drilling will be continued a little deeper to be sure that no oil bearing formations are overlooked. (Letter 1-5-31)

STATUS: Drilling well
Hobson & Lowe Well #1
NWNWSE Sec. 12-41S-12W (Pat.) FEB 1931

Temporarily suspended at 704'. No change since last report as operator was absent from field, and is reported negotiating for a contract on part of Lease Salt Lake 033712-A.

STATUS: Drilling Well
Hobson & Lowe Well #1, NWNWSE
Sec. 12-41S-12W. (Patented) 1931

Suspended at 704' or lower. The operator has left the field. The holders of Lease Salt Lake 033712-A have claimed that the well was drilled into water, and is damaging their property. The present laws of the State of Utah do not offer a very good opportunity to obtain relief in a case of this kind. The status of the well will be changed to DST. (Visited 3-17-31)

STATUS: Changed from Org. to DST
