DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important work, surface formation, and date anticipate spudding-in.)

Present condition of well: Total depth as per records available, 1,700'; 8 5/8 casing cemented 1,100'; 6 5/8 casing setting on bottom.

Propose to pull 6 5/8 casing and deepen well to approximately 4,500' or production, If no production is found below present depth, to complete well in shallow zone, approximately 600'.

Objective zones: Pennsylvanian and Mississippian.

I understand that this plan of work must receive approval in writing by the Commission before operations may be commenced.

HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or hauling.

We commenced redrilling on Baker #1 Well on June 6, 1957 and plugged well on August 1, 1957.

Pulled 1,439' of 6" casing and reamed hole to 1,523

After three weeks of fishing for 260' of 6" casing found same to be cemented and collapsed.

Also found 8 5/8" pipe parted at 732' and shoe leaking water from bottom of pipe, crooked hole at 732' and crooked hole at 1,450'

We are in the process of abandoning well and plan on setting four cement plugs to protect all water zones.

Re: Sundry Notice and Report on
Wells

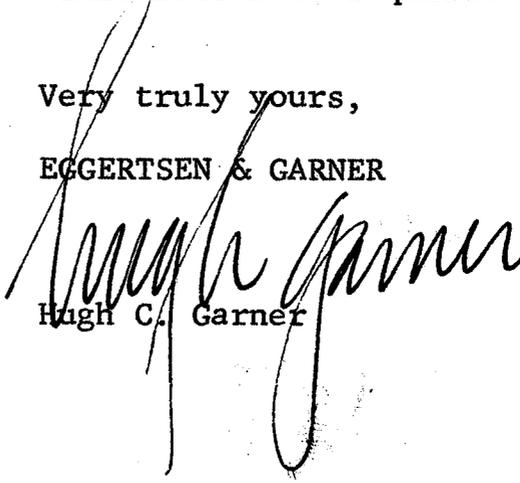

Gentlemen:

At the direction of Mr. Robin R. Nelson, Secretary and Treasurer of Virgin Refining Corporation, we transmit herewith two copies of sundry notices and reports on wells (prepared on form OGCC-1) relating to Baker No. 1 well located on therein more particularly described lands located within Section 14 of Township 41 South, Range 12 West, whereby notice of intention to redrill or repair such well is indicated.

We are advised by Mr. Nelson that a drilling and plugging bond is being obtained and will be filed with your office in the immediate future. To expedite the filing of this bond, we understand that the bonding company will forward same directly to your office. If any further information is required in this respect, please advise.

Very truly yours,

EGGERTSEN & GARNER

Gentlemen:

This is to acknowledge receipt of your notice of intention to rework and deepen Well No. Baker 1, which is located 1740 feet from the south line and 30 feet from the east line of Section 14, Township 41 South, Range 12 West, SEBM, Washington County, Utah.

Please be advised that approval to rework and deepen said well is hereby granted.

However, approval is conditional upon a bond being filed in accordance with Rule C-1 and Rule C-4(e), General Rules and Regulations and Rules of Practice and Procedure, Oil and Gas Conservation Commission, State of Utah.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION

Re: Well No. Baker 1, Sec. 14, Twp. 41
South, R. 12 West, SLEM, Washington
County

Gentlemen:

This is to acknowledge receipt of Form OGCC-3, Log of Oil or Gas Well, covering the above mentioned well.

Upon examination of said log, there appears to be some discrepancy between the location of this well as shown thereon and the location as shown on your notice of intention to redrill or repair. Please clarify.

We are enclosing some Forms OGCC-2, Affidavit and Record of Abandonment and Plugging, and some more of our Form OGCC-3, Log of Oil or Gas Well, for completion and return upon the plugging and abandonment of this well.

Please note that in all future cases, it will be necessary for you to give advance notice of the date and time said plugging will take place to this office in order that Mr. Hauptman our Petroleum Engineer may be present to inspect the manner in which the well is being plugged.

Before any future operations are conducted by your company, you are requested to furnish the necessary notice and bond to this office prior to commencement of operations.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION
