Under rule	C 11 we own	4262.37 acres		

Note: This well is planned because the R&D in Geology indicated that a well 50' north west of the present #3b (which produces 97% water) would probably be out of the 95° sulphur type water (estimated seeping per square mile @ thousand tons daily into the Virgin River at several points). As such, this new well would probably be a very high percent oil and the balance of any water could be pumped into the present 3b as it is presently bottomless at 520' below surface. We plan open hole design w/40' surface casing .219 wall 8 $\frac{1}{2}$ " dia. On completion induction, resistivity, gamma - neutron logging, set submergible pump 2" tubing. Copy of logs will be sent you.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

Gentlemen:

Insofar as this office is concerned, approval to drill the above referred to wells is hereby granted in accordance with the General Rules and Regulations (Rule C-3(c)).

Should you determine that it will be necessary to plug and abandon these wells, you are hereby requested to immediately notify the following:

CLEON B. FEIGHT - Director  
HOME: 466-4455  
OFFICE: 328-5771

Enclosed please find Form OGC-8-X, which is to be completed whether or not water sands (aquifers) are encountered during drilling.

The API number assigned to these wells are:

*This report covers the activities of the last quarter in re:  
drilling permits approved Fed & State.  
The only well drilled is 3C to 727'. We will start  
up again next wk. We started 9-1-75. We had  
considerable trouble with equipment. Also a cave-in.  
Our principal concern was geologic understanding and  
how to block off water production mixed with crude.  
This we know today. We will continue on to 900'+  
Cocconino Sands suggested. We expect to be there in  
this area 15 days.*

Permission requested improve waste ~~water~~ disposal procedure for well 3C. We will need approval to disturb the surface in the points

(A) A trench ( 2' deep X 6" wide X approx. 400' long) will be made to allow the installation of a 2" diameter pipe from the oil/water separating tank in our fenced work yard to the 3B well; the waste water from this pipe line will be piped to the bottom of 3B, thereby returning it to the formation from which it came. This pipeline will parallel the present pipeline which connects 3C to the separating tank. The new pipe will be buried.

We request permission to be able to ~~use~~ <sup>mark</sup> the well sites with 3" drill pipe, rather than 4" pipe. We had some old drill pipe on hand; we welded on Company name, well number and location, painted the markers silver, and located them several feet from the appropriate wells. The markers as stated above are in place at this time.

From: Zion Crude Oil Company, POB 370, Hurricane, Utah 84737  
Subject: Pollution Report  
Ref: Oil Spill Lease U-27359

1. Specific Nature and Cause of Incident:  
Two separate incidents similar in nature, but occurred at different times. Both were failures of pipe fittings used in the pipeline connecting Well #3C to its collecting tank.
2. Location: T41S, R12W, SEC 13, NW/4, SW/4
3. Resultant damage and volume discharged:  
Probably less than 1/2 barrel oil and 1/2 barrel water lost in both incidents together. The pipeline crosses a flat area, so that the "spills" were contained in small areas.
4. Date and Time:  
Both occurrences were in 1976, about three months apart. The precise times are not known.
5. Time required to control the incident: The well is checked twice daily. Both leaks in the pipe were very minor and when noticed, the well was immediately shut down, and the pipe repaired. Total time required to repair leak and cover any oil was about two hours.
6. Action to prevent Recurrence:  
Section of defective pipe entirely replaced.
7. Clean up: oil and water was covered with dirt.

Propose to enter 3C. Clean out. Set new pump and tubing. Hopefully produce.

This well has always produced oil in the past. It is shut down at this time. It has been shut and acidized to make it produce more but with no success. It is a 5 to 10 barrel producer. I hope by cleaning it out and using new pump equipment it will produce again. If not it will have to be re-drilled.

Mr. William L. Pulsipher  
68 South Main Street, Suite #200  
Salt Lake City, Utah 84101

Dear Mr. Pulsipher:

We need the following information on the wells listed below. Each well is in Washington County. On each well we need you to file a Change of Operator, we have never received this form on any of the following wells. Please send in Sundry Notices explaining in detail what has been done to each well and its current status. Only one well per Sundry Notice. We also need completion reports with formation tops and any logs that have been run. All in all, we need any and everything you can give us on these wells.

41S 12W Sec. 12 - Federal #23-12

The last thing we received on this well was a Sundry Notice in January 1977. It stated on the Notice that it would be going on production within 10 days. Since that time we have received neither production reports nor Sundry Notices. Our current status on this well is shut-in. We need a completion report with formation tops and any logs that were run.

40S 13W Sec. 36 - Titan State #1

The original footage was 1980 FEL. On the last Sundry Notice we received, June 10, 1980, the footage was 1890 FEL. Which is the correct footage? The name of the well is either Titan State #1 or Anderson Junction 36-C-1. If the name of the well changed, please send in a Sundry Notice making this change.

41S 12W Sec. 12 - Titan #5

We need the correct footage. There are two in our files--2368 FNL 1872 FWL and 2912 FSL 1872 FWL. If there was a change in the location, please send in a Sundry Notice stating this change. Please send in any electric logs, completion report with formation tops, and a Sundry Notice stating when the well was spudded.

Mr. William L. Pulsipher  
October 22, 1982

41S 12W Sec. 12 - Titan Fed. #4

Current status in our files is shut-in and from what I can tell it has been producing. We have received no production reports and the last Sundry Notice we received was 09-27-82 reporting "no pumping in August."

41S 12W Sec. 14 - Fee #4

Any information will be helpful.

41S 12W Sec. 13 - Wilkin Federal #10

Please send any information you have. The last Sundry Notice we received was 08-18-82. It reported "No Pumping During July." We also need a completion report with formation tops. If this well produced, please send in production reports. If you have a plat map, could you also send us a copy of such.

41S 12W Sec. 12 - Federal 23-12A

This well has been shut-in since 1959. We have no completion report or Sundry Notices. Any information would be helpful.

41S 12W Sec. 13 - KGS 10a

This well has been shut-in since 1975. We have no spud date and no completion report. Please send us any information you have.

41S 12W Sec. 13 - KGS (#3c)

Our production records show this well as shut-in and our cards show it as producing. We have no logs and no completion report. I also found three different locations--1760 FSL 230 FWL, 880 FNL 230 FWL, and 955 FNL 230 FWL. If the well was moved, we need a Sundry Notice stating this move.

Mr. William L. Pulsipher

41S 12W Sec. 13 - Walkin #4 (KGS)

The last Sundry Notice we received was February 18, 1982. It stated that on January 25, 1982 "Pumping was resumed." We have received no production reports, no completion reports, and no logs. Please let us know the right footage location. If there was a change in location please send in a Sundry Notice stating this move. We have 1095 FNL 1119 FWL and 659 FNL 940 FWL.

Any help you can give us would be greatly appreciated. If you have any questions, please feel free to write or call me.

Sincerely,

SANDRA CURTIS

DECISION

: Oil and Gas Lease  
: U-27359-A  
:

Lease Terminated

Oil and gas lease U-27359-A was issued effective August 1, 1974 for a five-year term ending July 31, 1979 and for so long thereafter as oil or gas is produced in paying quantities.

The Chief, Branch of Fluid Minerals, advised by letter on or about February 15, 1989, that the operator of the lease was required to initiate bona fide efforts to reestablish production in paying quantities. Sixty days from the receipt of that letter was required to initiate efforts.

This office has been advised that to date no action has been taken to meet the above requirements as allowed under 43 CFR 3107.2-2.

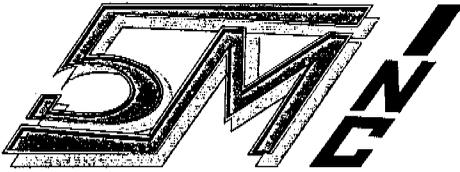

Accordingly, the lease term is exhausted and declared terminated effective April 22, 1989.

Settlement of royalties or rentals due or payable must be made to Minerals Management Service, if not previously done. Bonds must remain in full force and effect until final abandonment of all wells on the lease has been approved, and the account is settled.

The following lands were embraced in this lease:

T. 41 S., R. 12 W., SLM, Utah  
Sec. 13, NW $\frac{1}{4}$ NW $\frac{1}{4}$ , NW $\frac{1}{4}$ SW $\frac{1}{4}$ .

Containing 80.00 acres

REPORTS. THERESA MENTIONED THAT THERE WERE A COUPLE OF WELLS THAT WERE NOT  
COMPLETED (PLUGGED) SATISFACTORILY AND THE BLM WAS NEGOTIATING WITH 5M TO PROPERLY  
PLUG THE WELLS, HOWEVER THE BLM'S RECORDS ARE LISTING THE WELLS AS PA'D EFF  
9-14-89. (THEY DO NOT HAVE AN EXACT DATE OF PLUGGING)

2. DOGM Employee (name) Steve Schneider (Initiated Call )  
 Talked to:

Name Teresa Thompson (Initiated Call ) - Phone No. (      ) 539-4047

of (Company/Organization) BLM - SLC office

3. Topic of Conversation: <sup>Fed.</sup> Prod'n Reports received on 5M since 4/89.

4. Highlights of Conversation: The BLM-SLC office no longer receives the actual prod'n report from the operator → MMS now does. Their office can check the data reflected in the federal computer:

<u>Well</u>	<u>Lease</u>	<u>Last Report</u>	<u>Prod'n Reported</u>
<u>5M #1</u>	<u>U-10843</u>	<u>5/89</u>	<u>0</u>
<u>5M #2</u>	<u>U-10844</u>	<u>5/89</u>	<u>0</u>
<u>5M #3</u>	<u>U-10844B</u>	<u>5/89</u>	<u>0</u>
<u>5M #4</u>	<u>U-12310</u>	<u>5/89</u>	<u>0</u>
<u>Fed #10, Fed 3B</u>	<u>U-27359A</u>	<u>5/89-11/89</u>	<u>0's</u>
<u>3D, #3C, Walkin R#4</u>	<u>U-27359</u>	<u>5/89-11/89</u>	<u>0's</u>

Per Teresa, the federal reg's require prod'n to be reported until 3 months after plugging; thus, they haven't met the fed rule. As previously discussed with our division, termination of leases has occurred due to lack of production by operator.
