UTAH STATE OIL & GAS DIVISION  
Attn: Cleon Feight  
1588 W. North Temple  
Salt Lake City, Utah

Dear Mr. Feight:

As per telecon with Mike Minder, this date, we have enclosed a copy of Application for Permit to Drill, a copy of the Multi-Point Surface Use and Operating Plan, Plats of the proposed well locations, signed by James T. Ballard, a Registered Surveyor and maps indicating existing access, graded and paved roads to be used in the drilling operations.

Should you require further information, please do not hesitate to contact us.

Very Sincerely,

  
Jerry Glazier  
P.O. Box 752  
Hurricane, Utah 84737

JG/ad

DISCRIPTION OF PROPOSED ACTION

Proposed Action:

1. Location                    State: Utah  
                                  County: Washington  
1486' FWL, 953' FSL, SE 1/4 SW 1/4  
Section 13, T 41S R 12W, SL M
2. Surface Ownership            Location: Public  
                                  Access Road: Public

Status of  
Reclamation Agreements: Not Applicable.

3. Dates                    APD Filed: January 30, 1980.  
                                  APD Technically Complete: February 8, 1980 .  
                                  APD Administratively Complete: March 18, 1980 .
4. Project Time Frame

Starting Date: Upon Approval.

Duration of Drilling activities: 15 days.

A period of 30 to 60 days is normally necessary to complete a well for production if hydrocarbons are discovered. If a dry hole is drilled, recontouring and reseeding would normally occur within one year, revegetation or restoration may take several years. If the well is a producer, an indefinite period of time would occur between completion and rehabilitation.

5. Related actions of other federal or state agencies and Indian tribes:  
None known.
6. Nearby pending actions which may affect or be affected by the proposed action:  
None known.
7. Status of variance requests:  
Exception to 30 CFR, 221.20 - 200'Rule.

The following elements of the proposed action would/could result in environmental impacts:

1. A drill pad would be leveled conforming to topography in order to set up a truck truck mounted drilling rig. A reserve pit about 10 feet by 25 feet would be dug within the pad area. An access road 16 feet wide by 240 feet long would be constructed from the 5M #3 well. About 0.2 acres of disturbed surface would be associated with the project. Production facilities would consist of a wellhead and flowline running to the 5M #3 well, connecting to a flowline running downslope, crossing North Creek, to an existing operational tank battery site in NW/4 SW/4 Section 13, T41S, R12W.
2. Drilling.
3. Waste disposal.
4. Traffic.
5. Water requirements.
6. Completion.
7. Production.
8. Transportation of hydrocarbons.
9. Details of the proposed action are described in the Application for Permit to Drill.

Environmental Considerations of the Proposed Action:

Regional Setting/Topography: Regional topography consists of deep, rugged canyons and mesas with numerous dendritic, non-perennial drainages dissecting the area. The location is staked on a small terrace on a steeply sloping, west facing, side of a mesa. A non perennial wash runs along the south edge of the location. Igneous float is prevalent at the surface.

PARAMETER

A. Geology The operator anticipates oil in the Moenkopi Formation between 590 and 650 feet. Numerous wells in the area have produced oil from similar depths. Oil accumulations are stratigraphic in nature. Oil produced from the Virgin Fiels is parafin based.

Information Source: APD, Mineral Evaluation. "Virgins Oil Field" - C.W. Bahr.

1. Other Local Mineral Resources to be Protected: None.

Information Source: Mineral Evaluation Report, Mining Report.

2. Hazards:

Information Source:

a. Land Stability: The location would be constructed on the side of a steeply sloping canyon wall. Although possible, no land instability is expected.

Information Source: Field observation.

b. Subsidence: Withdrawal of fluids could cause subsidence, though none is expected.

Information Source: "Environmental Geology" - Keller.

c. Seismicity: The wellsite is in a area of minor to moderate seismic risk. The drilling plan does not reflect this fact.

Information Source: Rocky Mountain Association of Geologists.

d. High Pressure Zones/Blowout Prevention: No high pressure zones are expected. No blowout prevention equipment would be used as cable tool equipment would be employed for the majority of drilling. Past Virgin field wells have drilled with cable equipment and completed. open hole.

*CT can  
have pack  
off -*

Information Source: APD, "Virgin Oil Field" - C.W. Bahr.

B. Soils:

1. Soil Character: Soils are thin red sandy clays. No detailed soil survey has been made in this area, therefore, changes in soil fertility, soil horizons and other characteristics cannot be predicted.

Information Source: Field observation, "Soils of Utah" - Wilson.

2. Erosion/Sedimentation: Erosion/sedimentation would increase as would runoff potential. During periods of heavy rainfall, sedimentation-erosion would increase greatly due to steep slopes.

Information Source: Field observation.

C. Air Quality: The wellsite is in a Class II attainment area about 10 miles southwest of Zion National Park, a Class I attainment area. Machinery and equipment operations would decrease air quality but changes would be negligible.

Information Source: Field observation. R. Dalley, Utah State Health Dept. Pers. Comm.

D. Noise Levels: Noise levels would increase temporarily from machinery and traffic. Impacts to wildlife and people would be minimal.

Information Source: Field observation.

E. Water Resources

1. Hydrologic Character

a. Surface Waters: Siltation could be a problem during heavy rainfall due to steep slopes. North Creek, a perennial stream runs in a southerly direction about 1200 feet west of the wellsite. Water for drilling purposes would be hauled from North Creek. Proper authorization/permit is necessary.

Information Source: APD, Field observation.

b. Ground Waters: No changes to ground water is expected. Useable water may be found in Moenkopi, however the operator reports water at depths below the producing zone.

Information Source: APD, Mineral Evaluation Report.

2. Water Quality

a. Surface Waters: The potential for a spill of oil, water or drilling fluids reaching North Creek is possible, due to slopes involved. The thick parafin based oil of the area would, however reduce the chance of an oil spill migrating to North Creek.

Information Source: Field observation

b. Ground Waters: Groundwaters could be contaminated by the introduction of drilling fluids into an aquifer. However, none is expected as groundwater should be located below the potential production zone.

Information Source: Field observation, APD.

F. Flora and Fauna

1. Endangered and Threatened Species Determination

Based on the formal comments received from BLM on March 6, 1980, we determine that there would be no effect on endangered and threatened species and their critical habitat.

2. Flora: Blackbrush, big rabbitbrush, snakewood, mormon tea, hedgehog cactus, grasses and few juniper trees predominate on the surrounding area. Riparian vegetative types are found near North Creek. Construction would remove vegetation necessitating complete revegetation upon completion of drilling operations.

Information Source: BLM. Field observation.

3. Fauna: Deer, rodents, songbirds and few raptors inhabit the area. Wildlife would be impacted by drilling in a distributional sense.

Information Source: BLM, Field observation.

G. Land Uses

1. General: Recreation and grazing are the major land uses.

Information Source: Field observation.

2. Affected Floodplains and/or Wetlands: None.

Information Source:

H. Aesthetics: The location is situated about 0.5 mile from and in full of a prime scenic route to Kolob Reservoir and North Zion National Park. Drilling would provide a visual intrusion to recreationists/sightseers, however considering the temporary nature of the project and numerous unreclaimed drilling operations in area, impacts to aesthetic would be minimal.

Information Source: BLM, Field observation.

I. Socioeconomics: The effects of one well on the local and regional population and economy would be negligible. Oil production would be minimal at best and coupled with the lack of pipelines and refining facilities impacts on socioeconomics could be considered marginal.

Information Source: Field observation, "Virgin Oil Field" - C.W. Bahr.

J. Cultural Resources Determination: Based on the formal comments received from BLM on March 6, 1980, we determine that there would be no effect on cultural resources subject to this action.

Information Source: BLM.

K. Other: None.

Information Source:

L. Adequacy of Restoration Plans: The restoration plan meets the minimum standards of NTL-6. The areas short growing season and limited precipitation would govern restoration success.

Information Source: Field observation, APD.

Alternatives to the Proposed Action:

1. Disapproving the proposed action or no action - If the proposed action is denied, no action would occur, the existing environment would remain in its present state, the lessee/operator would not realize any return on investments and the public would be denied a potential energy source.
2. Approving the project with the recommended stipulations - Under federal oil and gas leasing provisions, the Geological Survey has a responsibility to approve mineral development if the environmental consequences are not too severe or irreversible. Permanent damage to the surface and subsurface would be prevented as much as possible under USGS and Surface Management Agency supervision. Environmental impacts would be significantly mitigated.
3. Other.

Adverse Environmental Effects:

1. If approved as proposed:
  - a. About 0.2 acres of vegetation would be removed, increasing and accelerating erosion potential.
  - b. Pollution of groundwater systems would occur with the introduction of drilling fluids into the aquifer(s). The potential for interaquifer leakage and lost circulation is ever-present, depending on the casing program.
  - c. Minor air pollution would be induced on a temporary basis due to exhaust emissions from rig engines and support traffic.
  - d. The potential for fires, leaks, spills of gas and oil or water exists.
  - e. During construction and drilling phases of the operation, noise and dust levels would increase.
  - f. Distractions from aesthetics during the lifetime of the project would exist.
  - g. Erosion from the site would eventually be carried as sediment in the Virgin River. The potential for pollution to North Creek would exist through leaks and spills.

2. Conditional Approval:

- a. All adverse impacts described in section one above would occur, except:
- b. Piping any produced oil downslope to the 5M #3 location and subsequently downslope would reduce visual impacts of production facilities.

Recommended Approval Conditions:

Drilling should be allowed, provided the following mitigative measures are incorporated into the proposed APD and adhered to by the operator:

1. See attached Lease Stipulations.
2. See attached BLM Stipulations.
3. The reserve pit will be fenced on three sides during drilling. Once the rig moves out the fourth side of the pit will be fenced until dry and reclamation commences.
4. Production facilities will consist of a well head only on the pad. A flowline would run to the 5M #3 well connecting to a line running downslope crossing North Creek, to an existing operational tank battery site in NW/4, SW/4, Section 13, T41S, R12W. In the event that the 5M #3 well is drilled dry, the flowline will run downslope directly to the tank battery site.

Controversial Issues and Conservation Division Response:

None.

We have considered the proposed action in the preceding pages of this EA and find, based on the analysis of environmental considerations provided therein, no evidence to indicate that it will significantly (40 CFR 1508.27) impact the quality of the human environment.

Determination:

I determine that the proposed action (as modified by the recommended approval conditions) does not constitute a major Federal action significantly affecting the quality of the human environment in the sense of NEPA, Section 102 (2)(C).

## STIPULATION

There is reserved to the United States, its successors and assigns, the prior right to use any of the land herein described to construct, reconstruct, operate, and maintain dams, dikes, levees, reservoirs, canals, wasteways, laterals, ditches, drainage works, flood channels, telephone and telegraph lines, electric transmission lines, roadways, and appurtenant irrigation structures, without any payment made by the United States, or its successors and assigns, for such right, with the agreement on the part of the applicant that if the construction or reconstruction of any or all of such dams, dikes, levees, reservoirs, canals, wasteways, laterals, ditches, telephone and telegraph lines, electric transmission lines, roadways, or appurtenant irrigation structures across, over, or upon said lands should be made more expensive by reason of the existence of improvements or workings of the applicant thereon, such additional expense is to be estimated by the Secretary of the Interior, whose estimate is to be final and binding upon the parties hereto, and that within thirty days after demand is made upon the applicant for payment of such sums, the applicant will make payment thereof to the United States, or its successors and assigns, constructing or reconstructing such dams, dikes, levees, reservoirs, canals, wasteways, laterals, ditches, telephone and telegraph lines, electric transmission lines, roadways, or appurtenant irrigation structures across, over, or upon said lands. There is also reserved to the United States the right of its officers, agents, employees, licensees, and permittees, at all proper times and places freely to have ingress to, passage over, and egress from all of said lands for the purpose of exercising, enforcing, and protecting the rights reserved herein.

Applicant further agrees that the United States, its officers, agents, employees, and assigns, shall not be liable for any damage to the improvements or works of the applicant resulting from the construction, reconstruction, operation, or maintenance of any of the works hereinabove enumerated.

IN REPLY REFER TO

BUREAU OF LAND MANAGEMENT

Dixie Resource Area  
P.O. Box 726  
St. George, Utah 84770

DATE: March 4, 1980

REPLY TO

ATTN. OF: Frank Rowley, Area Manager

SUBJECT: Rehabilitation Stipulations for 5-M Wells #1, 2 and 3

TO: Mr. George Diwachak

George, regarding our field inspection of 5-M's oil wells on 2/28/80 please include the following rehabilitation stipulations in the EAR.

These three sites have been examined and determined free of T&E flora and fauna and archaeological concerns.

Revegetation will be done by broadcasting a mixture of Crested wheatgrass and Indian ricegrass at the following rate: 4 lbs. Crested wheatgrass (*Agropyron desertorum*) and 4 lbs. Indian ricegrass (*Oryzopsis hymenoides*) per acre. Seeding will be done in late August or in December. Deedbed will be the top-soil saved on the site. Seeded areas will be hand raked to 'bury' the seed. The protective fences (constructed for drilling) will remain for 2 years following the seeding to allow for good establishment of seedlings.

Well head and surface equipment will be painted dark olive green on sites #2 and 3 and reddish-brown on site #1.

All sites will be kept free of litter and extraneous machinery.

The gate to site #1 will be constructed according to BLM specifications (attached).

Memorandum

To: District Oil and Gas Engineer, Mr. Edward Guynn

From: Mining, Supervisor, Mr. Jackson W. Moffitt

Subject: Application for Permit to Drill (form 9-331c) Federal oil and gas lease No. U-10844 Well No. 5M #2

1. The location appears potentially valuable for:

- strip mining\*
- underground mining\*\*
- has no known potential.

2. The proposed area is

- under a Federal lease for \_\_\_\_\_ under the jurisdiction of this office.
- not under a Federal lease under the jurisdiction of this office.
- Please request the operator to furnish resistivity, density, Gamma-Ray, or other appropriate electric logs covering all formations containing potentially valuable minerals subject to the Mineral Leasing Act of 1920.

\*If location has strip mining potential:

Surface casing should be set to at least 50 feet below the lowest strip minable zone at \_\_\_\_\_ and cemented to surface. Upon abandonment, a 300-foot cement plug should be set immediately below the base of the minable zone.

\*\*If location has underground mining potential:

The minable zones should be isolated with cement from a point 100 feet below the formation to 100 feet above the formation. Water-bearing horizons should be cemented in like manner. Except for salines or water-bearing horizons with potential for mixing aquifers, a depth of 4,000 feet has been deemed the lowest limit for cementing.

Re: Well No. 5-M #1, Sec. 14, T. 41S, R. 12W., Washington County, Utah  
Well No. 5-M #2, Sec. 13, T. 41S, R. 12W., Washington County, Utah  
Well No. 5-M #3, Sec. 13, T. 41S, R. 12W., Washington County, Utah

Insofar as this office is concerned, approval to drill the above referenced oil wells is hereby granted; however, said approval shall be contingent upon sufficient surface casing being set and properly cemented to protect both surface and ground water. Said approval is granted solely for production from the same stratigraphic interval as other wells produced in the Virgin Oil Field, defined as the Timpoweap member of the Moenkopie formation.

Should you determine that it will be necessary to plug and abandon these wells, you are hereby requested to immediately notify the following:

MICHAEL T. MINDER - Petroleum Engineer  
Office: 533-5771  
Home: 876-3001

Enclosed please find form OGC-8-X, which is to be completed whether or not water sands (aquifers) are encountered during drilling. Your cooperation in completing this form will be appreciated.

Further, it is requested that this Division be notified within 24 hours after drilling operations commence, and that the drilling contractor and rig number be identified.

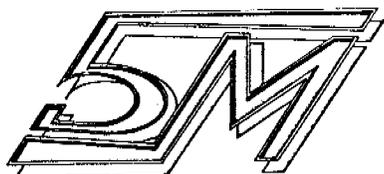

The API number assigned to this well is #1 -- 43-053-30034;  
#2 -- 43-053-30035; #3 -- 43-053-30036.

Sincerely,

DIVISION OF OIL, GAS AND MINING

Michael T. Minder  
Petroleum Engineer

RE: Report of Water Encountered During Drilling

Enclosed are reports of water encountered during drilling for 5-M wells #1 (API #43-053-30034), #2 (API #43-053-30035), and 3# (API #43-035-30036). These wells are still being drilled and none are completed. Well #1 is 10 feet deep, well #2 is 10 feet deep, and well #3 is 335 feet deep as of this date.

No water has been encountered in any of the three wells.

Sincerely yours,

JERRY GLAZIER, President  
5-M, Incorporated

RE: SEE ATTACHED SHEET FOR WELL  
NAMES AND MONTHS DUE.

Gentlemen:

Our records indicate that you have not filed the monthly drilling reports for the month(s) indicated above on the subject well(s).

Rule C-22, General Rules and Regulations and Rules of Practice and Procedure, require that said reports be filed on or before the sixteenth (16) day of the succeeding month. This report may be filed on Form OGC-1B, (U.S. Geological Survey Form 9-331) "Sundry Notices and Reports on Wells", or on company forms containing substantially the same information. We are enclosing forms for your convenience.

Your prompt attention to the above will be greatly appreciated.

Very truly yours,

DIVISION OF OIL, GAS, AND MINING

*Debbie Beauregard*

Re: See attached

Gentlemen:

Our records indicate that you have not filed the monthly drilling reports for the months indicated above on the subject wells.

Rule C-22, General Rules and Regulations and Rules of Practice and Procedure, requires that said reports be filed on or before the sixteenth (16) day of the succeeding month. This report may be filed on Form OGC-1B, (U. S. Geological Survey Form 9-331) "Sundry Notices and Reports on Wells", or on company forms containing substantially the same information. We are enclosing forms for your convenience.

Your prompt attention to the above will be greatly appreciated.

Very truly yours.

Attn: Cari Furse

Dear Ms. Furse:

In compliance with your letter of request dated 6 January 1982, attached are copies, in triplicate, of "Sundry Notices and Report on Wells" for the months of October and November 1981, for 5M Wells #2, #3 and #4, and Reports for 5M Well #2 for the months of May thru September 1981.

We have made xerox copies of the Sundry Reports and copies of our letters of transmittal from our file copies, for your informaton.

Should you have any further questions please do not hesitate to contact us.

Thank you for your consideration.

Sincerely yours,

A handwritten signature in cursive script, appearing to read 'Jerry Glazier'.

# INSTRUCTIONS

**General:** This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 38, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample and core analysis, all types electric, etc.), formations and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be listed on this form, see item 38.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments. Items 22 and 24: If this well is completed for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 38. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement": Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool. Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

Sec. 14, T. 41S, R. 12W.  
Washington County, Utah

Gentlemen:

According to our records, a "Well Completion Report" filed with this office March 31, 1982, from above referred to wells, indicates the following electric logs were run: #2, Drillers Log & #1, Drillers Log. As of today's date, this office has not received these logs.

Rule C-5, General Rules and Regulations and Rules of Practice and Procedure, requires that a well log shall be filed with the Commission together with a copy of the electric and radioactivity logs.

Your prompt attention to the above will be greatly appreciated.

Sincerely,

RE: Sundry Notices and Well  
Reports for July 1982

Dear Ms. Curtis:

We have enclosed, in triplicate, "Sundry Notices and Reports" on 5M oil and gas wells, for the month of July 1982

Should you have any questions, please do not hesitate to call us.

Sincerely yours,

  
JERRY GLAZIER, President

Pumping activities were not conducted during the month of December 1983. The pump is down for repair and cleaning.

Pumping has been temporarily halted due to lack of market and low prices which makes long distance shipping infeasible.

WATER SHUT-OFF <input type="checkbox"/>	REPAIRING WELL <input type="checkbox"/>
FRACTURE TREATMENT <input type="checkbox"/>	ALTERING CASING <input type="checkbox"/>
SHOOTING OR ACIDIZING <input type="checkbox"/>	ABANDONMENT* <input type="checkbox"/>
(Other) <input type="checkbox"/>	

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Pumping activities were not conducted during the month of November 1984. The pump is down for repair and cleaning.

Pumping has been temporarily halted due to the lack of market and low prices which makes long distance shipping infeasible.

DECISION

: Oil and Gas Lease  
: U-10844  
:

Lease Terminated

Oil and gas lease U-10844 was issued effective April 1, 1970 for a ten-year term ending March 31, 1980 and for so long thereafter as oil or gas is produced in paying quantities.

The Chief, Branch of Fluid Minerals, advised by letter on or about February 15, 1989, that the operator of the lease was required to initiate bona fide efforts to reestablish production in paying quantities. Sixty days from the receipt of that letter was required to initiate efforts.

This office has been advised that to date no action has been taken to meet the above requirements as allowed under 43 CFR 3107.2-2.

Accordingly, the lease term is exhausted and declared terminated effective April 22, 1989.

Settlement of royalties or rentals due or payable must be made to Minerals Management Service, if not previously done. Bonds must remain in full force and effect until final abandonment of all wells on the lease has been approved, and the account is settled.

The following lands were embraced in this lease:

- T. 41 S., R. 11 W., SLM, Utah  
Sec. 8, SW $\frac{1}{4}$ .
- T. 41 S., R. 12 W., SLM, Utah  
Sec. 12, SE $\frac{1}{4}$ NE $\frac{1}{4}$ , NE $\frac{1}{4}$ SE $\frac{1}{4}$ , S $\frac{1}{2}$ SE $\frac{1}{4}$ ;  
Sec. 13, NE $\frac{1}{4}$ , SE $\frac{1}{4}$ SW $\frac{1}{4}$ .

Containing 520.00 acres  
Washington County

Ref: BLM letter 3160 (U-922) dated May 23, 1989 Attn: Robert A. Henricks

Notice of Intent: Proposal to plug and abandon open well.

Method of plugging: *delete well*

- (1) Fill the open hole with Bentonite Clay to be obtained from Bentonite Quarry owned by 5M, Inc.
- (2) Surface 5-10 feet of hole to be cemented solid, with the appropriate 4 inch steel pipe extending 4 feet above the surface with well number and location marked thereon.

See Attached Stipulations.

18. I hereby certify that the foregoing is true and correct

2. DOGM Employee (name) Don Staley (Initiated Call   
 Talked to:  
 Name Teresa Thompson (Initiated Call  - Phone No. (      ) 539-4047  
 of (Company/Organization) BLM - SLIC

3. Topic of Conversation: 5m wells (Washington County)

4. Highlights of Conversation: Per Teresa, leases ~~has~~ have been  
terminated because the BLM requested that 5m  
perform wells tests to prove that wells  
were non-productive, and 5m did not  
respond. ~~5m~~ 5m did submit plugging  
proposals for the wells but the BLM said  
they were inadequate and sent them back  
unapproved. Teresa said 5m is still the bonded  
operator of the wells and ~~she~~ is responsible  
for all work and paper work on the wells  
until they are properly plugged.

Other  
SLC  
Prod. File

1. Date of Phone Call: 4-4-90 Time: 8:40AM

2. DOGM Employee (name) Steve Schneider (Initiated Call   
Talked to:

Name Teresa Thompson (Initiated Call  - Phone No. (      ) 537-4047  
of (Company/Organization) BLM - SLC office

3. Topic of Conversation: Fed. Prodtn Reports received on 5M since 4/89.

4. Highlights of Conversation: The BLM-SLC office no longer receives the actual prodtn report from the operator -> MMS now does. This office can check the data reflected in the federal computer:

Well	Lease	Last Report	Prodtn Reported
5M #1	U-10843	5/89	0
5M #2	U-10844	5/89	0
5M #3	U-10844B	5/89	0
5M #4	U-12310	5/89	0
Fed #10, Fed 3B	U-27359A	5/89-11/89	0's
3D, #3C, Walkin #4	U-27359	5/89-11/89	0's

Per Teresa, the federal reg's require prodtn to be reported until 3 months after plugging; thus, they haven't met the fed rule. As previously discussed with our division, termination of leases has occurred due to lack of production by operator.
