RE: Well No. 7-11  
SESW Sec. 16, T.42S, R.11W  
1310' FSL, 1740' FWL  
Washington County, Utah

Gentlemen:

Insofar as this office is concerned, approval to drill the above referred to oil well on said unorthodox location is hereby granted in accordance with Rule C-3(c), General Rules and Regulations and Rules of Practice and Procedure. Approval is contingent upon receipt by the Division of a certified location survey plat for this well site.

Should you determine that it will be necessary to plug and abandon this well, you are hereby requested to immediately notify the following:

RONALD J. FIRTH - Chief Petroleum Engineer  
Office: 533-5771  
Home: 571-6068

Enclosed please find Form OGC-8-X, which is to be completed whether or not water sands (aquifers) are encountered during drilling. Your cooperation in completing this form will be appreciated.

Further, it is requested that this Division be notified within 24 hours after drilling operations commence, and that the drilling contractor and rig number be identified.

The API number assigned to this well is 43-053-30045.

Sincerely,

  
R. J. Firth  
Chief Petroleum Engineer

Gentlemen:

Re: Well No. 7-11 - Sec. 16, T. 42S., R. 11W.,  
Washington County, Utah - API #43-053-30045

Our records indicate that you have not filed drilling reports for the months of March to present on the above referenced well. Our rules and regulations stipulate that these reports be filed by the sixteenth of each month until the well is completed.

Enclosed are forms for your convenience in filing the necessary reports as soon as possible but no later than July 3, 1985.

Thank you for your cooperation in this matter.

Sincerely,

Pam Kenna  
Well Records Specialist

RE: Oil Reports

Dear Sirs:

We have enclosed for the month of September 1985, in triplicate "Sundry Notices and Reports of Wells" for 5M, Incorporated lease ML-29784 in Washington County, Utah.

Should you have any questions, please do not hesitate to call this office.

Very Sincerely,

A handwritten signature in cursive script, appearing to read 'Jerry Glazier', is written over the typed name.

Mr. Jerry Glazier  
5M Incorporated  
P.O. Box 752  
Hurricane, Utah 84737

Dear Mr. Glazier:

RE: Well No. 7-11, Sec.16, T.42S, R.11W, Washington County, Utah  
State Lease No. ML- 29784

A field inspection was conducted at the referenced location on February 17, 1986. Several noncompliances with the Oil and Gas Conservation Rules, as well as operating violations pertaining to the state oil, gas and hydrocarbon lease were observed during this inspection. A list of the existing violations and the respective rules are attached to this letter.

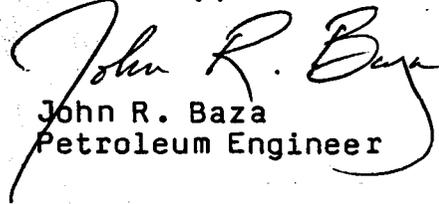

In regards to the time allowed for 5M to correct these violations, the Division of Oil, Gas and Mining requests identification (well sign) to be posted within 30 days. The violations concerning drilling operations (the reserve pit, lack of a functioning B.O.P. and the required casing tests) must be corrected in 15 days of receipt of this notice.

The Division has established regulations concerning drilling operations in the State of Utah. Any drilling operation must comply with these regulations in order to conserve natural resources, to prevent waste, to protect correlative rights of all owners and to realize the greatest ultimate recovery of oil and gas. When drilling on a state lease, you must also comply with all terms of your state oil, gas and hydrocarbon lease.

Page Two  
5M Incorporated  
February 27, 1986

Future field inspections will be conducted on a regular basis on the #7-11 well to insure compliance with the regulations. If you have any questions or comments concerning operating under these regulations or our request for compliance, please contact Dorothy B. Swindel, Oil and Gas Field Specialist at the address and telephone number listed on the heading of this letter.

Sincerely,

John R. Baza  
Petroleum Engineer

Attn: John R. Baza

RE: Well No 7-11 Lease No. ML-29784  
Washington County, Utah.

Dear Mr. Baza:

With respect to your letter to us of Feb. 27, 1986, we appreciate the opportunity to report to you the following information with reference to certain violations and non-compliances which were observed during your recent visit to the 5M well site.

We are posting the identification well sign required at this time.

May we explain to you the 4'x4'x6' cellar pit and box built around the surface conductor pipe, houses the portion of the Blow-out Preventer dual ram assembly below the surface. The cellar is also closed over the top and around the sides of the conductor pipe to keep the pit from filling with cuttings, mud and water. You may not have realized this when you were on site. We have enclosed a picture of the balance of the B.O.P. equipment mounted on the small two axle trailer sitting to the right of the drill rig. Note the lines running back to the well and cellar. The B.O.P. is on site and is functioning and the tests you referenced have been conducted.

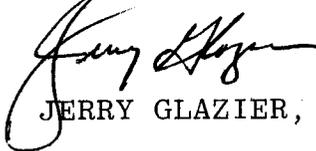

The oil present on the surface of the reserve pit is being used at the present time to circulate down the hole to aid in trying to free the drill string which at present time is stuck at the 2150 ft. level. The crude oil was purchased and brought to the site basically free of any salt water (a concern of Rule 308 & 309). We are not polluting a drainage or causing a fire hazard to be concerned with at this time. We seek your support on this issue while we are trying to free our drill string. It would be greatly appreciated if we could continue to use crude oil in the down hole needs.

We had not recieved a copy of the new rule effective Dec. 2, 1985. We had to request a copy in order to respond to your letter.

Page Two  
J.R. Baza Div. of Oil, Gas & Mining  
March 14, 1986

We look forward to your suggestions and want to do those things  
to conform to your present regulations.

Very Sincerely,

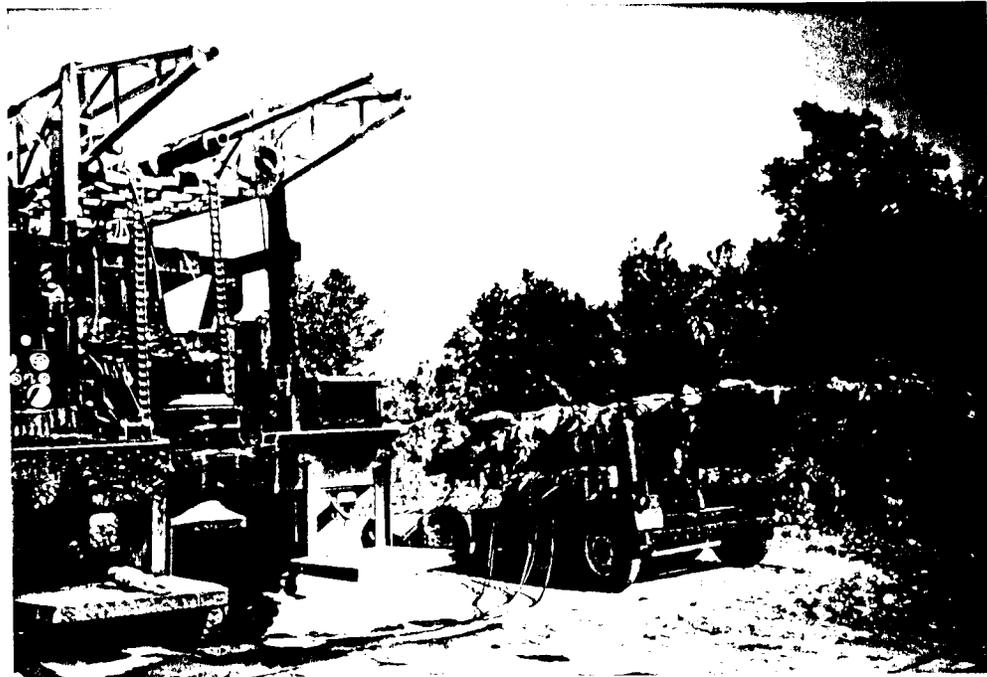

JERRY GLAZIER, President

April 11, 1986

Mr. Jerry Glazier  
5M Incorporated  
P.O. Box 752  
Hurricane, Utah 84737

Dear Mr. Glazier:

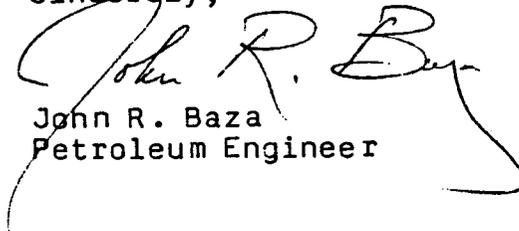

RE: Well No. 7-11, Sec.16, T.42S, R.11W, Washington County, Utah,  
State Lease No. ML-29784

The Division of Oil, Gas and Mining has received and reviewed your letter dated March 14, 1986. We accept your explanation of the current operations and conditions at the referenced well site. A Division inspector will continue to monitor future activities at well to ensure compliance with Oil and Gas Conservation General Rules. Please note that all well operations other than routine maintenance must be reported to the Division in accordance with Rule 807.

Based on previous inspections of the well site, it appears that the condition of the well has not changed for a considerable length of time. Inspection field notes indicate that workover equipment has been on site since the autumn of 1985. We encourage you to proceed as quickly as possible to complete your present operations in order to avoid the long term effects of fluid remaining in the pit and the hazards of an unsecured well site.

Please contact this office if you have any questions or concerns about this matter. Thank you for consideration.

Sincerely,

John R. Baza  
Petroleum Engineer

At 2195 feet we encountered a change in formation in which the drill string became stuck.

Various methods to get loose have been attempted for a two week period in March without success.

A different drill rig was moved to the site and put over the hole. This rig has more pulling power and better rotation while pulling up. The drill string was raised to 2150 feet.

Decisions are being made at this time as how to best unstuck and remove the string at this time.

Dear Mr. Pulsipher:

This office has reviewed the applications under Oil and Gas Lease ML 17253. As you know, this lease covers All of Section 36, T40S, R13W, SLB&M., Washington County, Utah. This lease has been held in force by production from the Anderson Junction Unit State 36-C1 Well. However, there has not been any production from this well for an extended time. I have discussed this matter with Jerry Glazier of S-M Inc. and I indicated that since this well has not been produced for a long time and since there doesn't seem to be any possibility for production from this well, this office wants to get this well plugged. S-M Inc. is ready to cooperate in getting this well plugged. We would urge you to get this well plugged and to get the location reclaimed. You should contact the Division of Oil, Gas, and Mining, 3 Triad Center, Suite 350, Salt Lake City, UT 84180-1203, to design a plugging program for this well.

If you and S-M Inc. do not take care of plugging this well, this office will foreclose on your bond to help take care of this well. You have thirty (30) days in which to take care of this matter before we take legal action to get this well plugged and to terminate this lease.

If you have any questions, please let us know.

Yours very truly,

DONALD G. PRINCE

ATTENTION: JERRY GLAZIER

Dear Mr. Glazier:

RE: Oil, Gas, and Hydrocarbon Lease-ML 29784

On April 17, 1986, I discussed the State 7-11 Well in Sec. 16, T42S, R11W, SLB&M. On April 16, 1986, I visited the location of this well and inspected this site. The rig has been removed from the hole, but it was still on the site. There is still fluid, oil and water, in the mud pit and the location must be reclaimed.

As we agreed, you still intend to try to retrieve some of the stuck drilling pipe in the hole during this week. Then the hole will be plugged in a matter approved by the Division of Oil, Gas, and Mining. The fluids in the mud pit will be removed from the site and the location will be re-contoured and reclaimed and reseeded, the access road will be reclaimed by covering the road and the approach from the county road, and to re-seed the road bed.

As I indicated, I will be in the area on May 8, 1986, and I would like to inspect the location at that time.

If you have any questions, please let me know.

Yours very truly,

DONALD G. PRINCE  
ASSISTANT DIRECTOR

NOTICE OF INTENT TO PLUG AND ABANDON

The well has been drilled to a depth of 2195 feet where drill string was caught and stuck in hole. Drill bit was forced back to 2150 feet where it wouldn't move anymore. We tried to shoot the bit off at that depth but the drill string wouldn't break free.

The drill contractor is in the process now of using a different explosive which has caused some delay in ordering. He still intends to recover his drill steel. At that time plugging of the hole and reclamation of the site will take place.

We have done an initial clean up of site in preparation of recontour of surface.

A log of drilling will be submitted.

No water was encountered in drilling.

ATTENTION: JERRY GLAZIER

Gentlemen:

RE: State 7-11 Well, ML 29784

On May 29, 1986, I called on you at your office, but since you were not in I want to tell you that I visited the location of the State 7-11 well in Section 16, T42S, R11W, SLB&M., ML 29789, on May 28, 1986. I was very surprised to find that you have not done any work on this location despite your promises when I visited you in Hurricane on April 17, 1986, and when you were in Salt Lake City when we held the signing of the Harrisburg leases. This office has been very patient with your company about this well, but it has not helped so we are now going to take action to plug this well and to get the location reclaimed.

5-M Incorporated  
Page Two  
June 3, 1986

In accordance with the terms of this lease you have not properly plugged the well shown above (Sec. 6, (b) (4)) and you have not reclaimed the well location and the road to the site (Sec. 6, (b) (9)). In accordance with the terms of Section 10 of this lease, you have thirty (30) days from the date of this letter to rectify the problems listed above. If you do not take action to take care of this problem, this office will hire a contractor to plug this well and reclaim this well location. You have \$5,000 cash in lieu of a bond on file with this office in accordance with Section 7 of this lease which will be used for this work. I should remind you that if you default under this bond, you will affect any future operations on State lands. You are referred to Rule 6 Bond Requirements al. Rule M6a1. Bonding, (f) which reads:

Any Lessee or designated operator forfeiting a bond is denied approval of any future exploration or mining on State lands except by compensating the State of previous defaults and posting the full bond amount estimated for reclamation or lease performance and reclamation on subsequent operations.

One further item, will you please submit a copy of any logs or reports prepared during the drilling of this well so we may use them to design a plugging program for the State 7-11 Well.

If you have any questions please let us know.

Yours very truly,

DONALD G. PRINCE  
ASSISTANT DIRECTOR

Hurricane, Utah 84737

Dear Mr. Glazier:

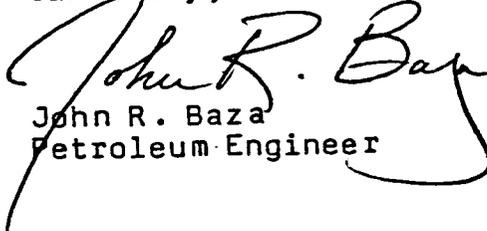

RE: Well No. 7-11, Sec.16, T.42S, R.11W, Washington County, Utah

A sundry notice has recently been received in this office describing your operations on the referenced well. Although you indicate in the sundry notice that you intend to plug and abandon the well, the Division of Oil, Gas and Mining does not accept this submittal as official notice of abandonment. You are requested to submit any available drilling logs or reports showing the condition of well bore along with a proposed plugging program showing depths and sizes of the plugs which will be set. The Division will review such notice for approval when it is submitted.

This office has also received information from the Division of State Lands and Forestry requesting similar action in accordance with the State oil, gas and hydrocarbon lease agreement. Therefore, it is imperative that you act immediately to comply with these requests to avoid any action which could be taken against your bond.

We anticipate your prompt attention to this matter.

Sincerely,

  
John R. Baza  
Petroleum Engineer

Dear Sir:

Attached is a plugging program prepared by John Baza of the Division of Oil, Gas, and Mining, for your Well No. 7-11 in Section 16, T42S, R11W, SLB&M. As you indicated in your letter of June 13, 1986 and in my telephone call today, you will plug this well in accordance with this program. Please notify this office as to the date and time the plugging work will start so we can have an observer on site.

Again, I should emphasize our concern with this well and if you don't plug this well within the next 30 days, this office will take action to foreclose on your bond and get this well plugged.

If you have any questions, please let us know.

Yours very truly,

TO: Well File  
FROM: Jim Thompson  
RE: Well No. 7-11, Sec. 16, 42S, R11W, Washington County, Utah  
State Lease No. ML-29784

On August 18, 1986, I met with Mr. Gail Prince of the Division of State Lands and Forestry. He stated that he had been in contact with Mr. Jerry Glazier of 5-M Inc., about the 7-11 well in Washington County.

According to Mr. Prince, the well was properly plugged and abandoned as per instructions submitted by the Petroleum Engineer of the Division of Oil, Gas and Mining on July 21, 1986. At that time, operations were witnessed by a representative of State Lands.

The reclamation of the drilling site was completed July 31, 1986 to the satisfaction of the Division of State Lands.
