12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

Fidelity would like to reenter the Cane Creek 26-3 well as per the attached directional drilling program to drill reentry #1 lateral #1 and make it a producing well. A whipstock will be set at approximately 6,500'. A 6" window will be milled to exit the casing at that depth. Directional drilling tools will then be used to depart from the original wellbore, build a curve and land the sidetrack in the Cane Creek formation at approximately 8,470' MD 17,427' TVD. A 6" lateral will then be drilled a direction 155 degrees azimuth. The planned TD is 13,363' MD if the well conditions are favorable, but may stop any time before then. Fidelity's contact person for this program is Sr. Drilling Engineer Will Alexander at 720-917-3025

Federal Approval for this Action is Necessary
