12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

Surface casing was set on this location on 3/14/07 and drilling operations were suspended while the operator evaluated the addition of new wells to be drilled from the same pad location. Upon re-surveying this location, Kerr-McGee discovered the originally permitted coordinates were incorrect to what was actually drilled. The surface location's actual footages are 2028' FSL 1909' FEL. In addition to this update, Kerr-McGee requests to change the Bottom Hole Location due to the well changing to a directional well and to accommodate the addition of new wells being added to the pad. See the attached revised plats, maps and drilling program for additional information. Please contact the undersigned with any questions and/or comments. Thank you.
