DEPARTMENT OF NATURAL RESOURCES

MICHAEL R. STYLER
Executive Director

Division of Oil, Gas and Mining

JOHN R. BAZA
Division Director

November 27, 2017

TO: Utah Oil and Gas Operators

FROM: John Rogers, Associate Director
Utah Division of Oil, Gas and Mining 

SUBJECT: Response Form and Annual Waste Management Plan for Year 2018

The Oil and Gas Conservation General Rules R649-9-2.4 et al, General Waste Management, require all Utah operators to file an Annual Waste Management Plan by **January 15** to account for the proper disposition of produced water and other E&P Wastes for the upcoming year.

This plan will include: 1) type and estimated volume of wastes to be generated; 2) the disposal facilities (central and commercial) to be used for disposal; 3) description of any waste reduction or minimization procedures; and 4) any onsite disposal/treatment to be implemented by the operator. If changes are made to the plan during the year, then the operator shall notify the Division in writing of this change. Each site and/or facility used for disposal must be permitted and in good standing with the Division. A list of approved pits/facilities can be found at the following website: <http://www.oilgas.ogm.utah.gov/Publications/Publications.htm>.

We request that the attached Annual Waste Management Response Form – 2018 be submitted by all operators. If your company's well(s) are not producing or generating any water or other E&P wastes please submit the Response Form with Option #1 marked.

If any waste will be produced, then mark the appropriate option and submit the Response Form -2018 and attach your Waste Management Plan. All oil & gas operators with active well(s), producing, shut-in or temporarily abandoned regardless of the well type, oil, gas, water injection wells, water disposal wells, are expected to file an Annual Waste Management Plan. There is no specific form to be used for the waste management plan. It should be kept simple and arranged to fit each operator's specific situation. The Division will keep each operator's plan on file during the year to be referred to as needed by public or staff.

If you have already submitted the Response Form-2018 and Waste Management Plan, please disregard this notice. Failure to submit the response form and plan by **January 15, 2018**, will result in a Notice of Violation (NOV). If you have any questions please call Lisha Cordova at (801) 538-5296.

Enclosure

Annual Waste Management Response Form – 2018

The Utah Division of Oil, Gas and Mining requests that all oil and gas operators, who are active in Utah, inform the Division of their waste management plans for their Utah operations by **completing this Response Form and returning it (with an Annual Waste Management Plan attached if any operational waste stream is likely to be produced during calendar year 2018)**. We request this of operators so that they may **comply with Rule R649-9-2.4 et al of the Utah Oil and Gas Conservation General Rules**.

Operator Name: _____

Operator Account # _____

Name and Title of Company Representative: _____

Date: _____ Phone Number: _____

Only one of the three waste stream outcomes provided below will likely fit your operational circumstances. Please select the outcome that seems the most likely by placing an "X" on the underlined space in front of the selection:

1. **No Exploration and Production (E&P) wastes of any kind are anticipated.** An amended Waste Management Plan will be filed when and if E&P wastes are generated during 2018.
2. **An E&P waste stream is probable but it is unlikely to include any produced water.** We will file an amended Waste Management Plan when and if our operations generate any produced water during 2018. **Attached please find our Annual Waste Management Plan** (providing the information specified in Rule R649-9-2.4 et al).
3. **Our operations are likely to produce water so we have attached an Annual Waste Management Plan to address this and any other waste streams in compliance with Rule R649-9-2.4 et al.** We will dispose of our produced water waste stream by the method(s) indicated, and in the approximate percentage(s) specified, below:

_____ % by Permitted Class II Commercial Water Disposal well(s).

_____ % by Permitted Class II Non-commercial Water Disposal well(s).

_____ % by Permitted Class II Injection well(s) in a waterflood project.

_____ % by Permitted Commercial Evaporative Pit(s).

_____ % by Permitted Private, Non-commercial Evaporative Pit(s).

_____ % by R649-9-3-4.4 Onsite (Surface) Pit(s).

_____ % by operations utilizing produced water for drilling, completion and workover activities.

_____ % by Permitted UPDES surface discharge.

_____ % by Out of State Transfer to (specify in Annual Waste Management Plan).

_____ % by Other Means (specify in Annual Waste Management Plan).

100 % Total
