Notice to Utah Oil and Gas Operators

Re: Guidance Documents posted on the Utah Oil and Gas Home Page

The Utah Division of Oil, Gas and Mining (Division) has, and will continue to, developed guidance documents for oil and gas operator and stakeholder use. These guidance documents describe how to best comply with a particular regulations found in The Utah Oil and Gas Conservation General Rules. Many of these documents have replaced and supersede the previously utilized *Environmental Handbook*. The Division will provide detailed direction to operators, contractors and the general public with regards to regulations and policies currently in effect through guidance documents.

Completed guidance documents have been posted to the "Publications" tab under the "Handbooks & Guidance Documents" section within the Utah Oil and Gas Home page: [State of Utah – Oil and Gas Program – Publications](#). Additional guidance documents will be posted as they become available.

Sincerely,

John Rogers
Associate Director, Oil and Gas
