IN THE MATTER OF THE REQUEST FOR AGENCY ACTION OF NEWFIELD PRODUCTION COMPANY FOR AN ORDER ESTABLISHING STAND-UP (VERTICAL) 1280-ACRE (OR SUBSTANTIAL EQUIVALENT) DRILLING UNITS FOR THE PRODUCTION OF OIL, GAS AND ASSOCIATED HYDROCARBONS FROM THE LOWER GREEN RIVER-WASATCH FORMATIONS WITHIN TOWNSHIP 4 SOUTH, RANGES 1 EAST AND 1 THROUGH 3 WEST, USM, DUCHESNE AND Uintah COUNTIES, UTAH

**FINDINGS OF FACT,
CONCLUSIONS OF LAW
AND ORDER**

Docket No. 2017-027

Cause No. 139-150

This Cause came on for hearing before the Utah Board of Oil, Gas and Mining (the "Board") on Wednesday, January 31, 2018, at 10:00 a.m., in the Auditorium of the Utah Department of Natural Resources Building in Salt Lake City, Utah. The following Board members were present and participated at the hearing: Chairman Ruland J. Gill, Jr., Michael R. Brown, Gordon L. Moon, Carl F. Kendell and Richard K. Borden. Board members Susan S. Davis and Chris D. Hansen were unable to attend. The Board was represented by Meg Osswald, Esq., Assistant Attorney General.

Testifying on behalf of Petitioner Newfield Production Company ("Newfield") were Reece Cook - Senior Landman, Riley Brinkerhoff - Staff Geologist, and Mike Jensen - Contract Petroleum Engineering Consultant. The Board recognized Mr. Brinkerhoff as an expert in geology and Mr. Jensen as an expert in petroleum engineering

for purposes of this Cause. Frederick M. MacDonald, Esq., of and for MacDonald & Miller Mineral Legal Services, PLLC, appeared as attorney for Newfield.

The Division of Oil, Gas and Mining (the “Division”) did not file a staff memorandum in this Cause but participated in the hearing. The Division neither provided sworn testimony nor submitted any exhibits. John Rogers, Associate Director - Oil & Gas, and Dustin Doucet, Petroleum Engineer, with the Board’s permission, were allowed to ask questions on behalf of the Division. Steven F. Alder, Esq., Assistant Attorney General, appeared as attorney for the Division. In its summary at the conclusion of the hearing, the Division expressed its support for the granting of Newfield’s Request for Agency Action dated September 11, 2017 (the “RAA”) insofar as it relates to the establishment of 1280-acre drilling units for long lateral (greater than one mile) horizontal wells and a 640-acre drilling unit for the Knoll 13-10-4-2-15-7H Well, API No. 43-013-53427 (the “Knoll Well”), but expressed that it also favored establishment of overlapping 40-acre and 640-acre drilling units for vertical/directionally drilled and short lateral (one mile or less) horizontal wells, respectively, similar to other Board orders entered since the Board Order in Cause No. 139-134 was entered, for consistency purposes. The Division also requested the Board to adopt an annual progress reporting requirement and a five-year sunset.

The Board received two letters relating to the RAA. The first letter was received on January 25, 2018 from the Vernal Field Office of the Bureau of Land Management

(“BLM”) expressing its support for the granting of the RAA. The second letter was received on January 29, 2018 from EP Energy E&P Company, L.P. (“EPE”) objecting to the conversion of production allocation for all wells to the 1280-acre drilling unit basis once the first long lateral horizontal well is drilled and begins production, and instead advocating establishment of overlapping 40-acre and 640-acre drilling units for vertical/directionally drilled and short lateral horizontal wells, respectively. Neither party appeared at nor participated in the hearing.

No other party filed a response to the RAA and no other party appeared or participated at the hearing.

The Board, having considered the testimony presented and exhibits received into evidence at the hearing, being fully advised, and pursuant to its Minute Entry entered on February 5, 2018 (the “Minute Entry”) which, by this reference is incorporated herein, hereby makes the following findings of fact, conclusions of law and order in this Cause.

FINDINGS OF FACT

1. Newfield is a Texas corporation with its principal place of business for Rocky Mountain operations in The Woodlands, Texas. Newfield is duly qualified to conduct business in the State of Utah, and is fully and appropriately bonded with all relevant Federal, Indian and State of Utah agencies.

2. The following Duchesne and Uintah County lands, which are the subject of the RAA and to which Newfield references as the “Myton Area,” have not yet been the

subject of a Board order creating drilling units. Consequently, they have remained subject only to the general well siting rule (Utah Admin. Code Rule R649-3-2):

Township 4 South, Range 1 East, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7

Township 4 South, Range 1 West, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7

Township 4 South, Range 2 West, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7
Sections 14, 23 and 26
Sections 15, 22 and 27

Township 4 South, Range 3 West, USM

Sections 1 and 12
Sections 2 and 11

Sections 3 and 10
Sections 4 and 9

(the “Subject Lands”).

3. The oil, gas and associated hydrocarbons underlying the Subject Lands are primarily Tribal, Allotted and fee owned, with scattered State of Utah and Federal ownership. Newfield and its related entity, Newfield RMI, LLC, own the majority of the working interest in the Subject Lands.

4. In the absence of such an order by the Board establishing drilling units, Newfield has drilled, completed and has been producing numerous vertical, or directionally drilled (54 producing; 16 shut-in), and short lateral horizontal (two (2) producing) wells on the Subject Lands with productive intervals within the combined Lower Green River-Wasatch formations, defined for purposes of this Cause as follows:

the interval from the top of the Lower Green River formation (TGR₃ marker) to the base of the Green River-Wasatch formations (top of Cretaceous), which base is defined as the stratigraphic equivalent of the Dual Induction Log depths of 16,720 feet in the Shell-Ute 1-18B5 well located in the S½NE¼ of Section 18, Township 2 South, Range 5 West, U.S.M., and 16,970 feet in the Shell-Brotherson 1-11B4 well located in the S½NE¼ of Section 11, Township 2 South, Range 4 West, U.S.M.,

(the “Subject Formations”).

5. Production from said wells has been allocated on a wellbore basis under the Rule of Capture and the holding of *Cowling v. Board of Oil, Gas and Mining*, 830 P.2d

220 (Utah 1991). One of the short lateral horizontal wells (the Ute Tribal 4-8-4-1 WH Well) is drilled upon a Tribal lease which cover the entirety of Section 8, T4S, R1W, USM, and therefore production allocation on a wellbore basis is exactly the same as if a sectional drilling unit for said well had been established. The other short lateral horizontal well is addressed in Findings of Fact No. 11 below. There is also one vertical well, the JMD 12-4-4-3 Well, operated instead by JMD Energy, Inc., located in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 4, T4S, R3W, USM, which produced from the Subject Formations but which has been in shut-in status since September, 2016.

6. Beginning in late 2012, Newfield conducted several pilot programs with Board authorization to test the viability of long lateral horizontal wells in various productive intervals of the Subject Formations, which ultimately led to the entry of the Board's Order entered on July 21, 2015 in Cause No. 139-134 (the "139-134 Order") covering the lands to which Newfield refers to as the "Central Basin," located directly north of the Subject Lands. Under the 139-134 Order, the Board established stand-up (vertical) 1280-acre drilling units from the Subject Formations authorizing up to 17 long lateral horizontal wells to be drilled and produce thereon (with no more than eight (8) such wells in any one productive interval of the Subject Formations), and additionally up to eight (8) vertical/directionally drilled or short lateral horizontal wells, or any combination thereof, to be drilled within said drilling units, with established setbacks as follows:

- No producing interval of an authorized long lateral horizontal well may be located closer than 330 feet to the north and south, and 560 feet to the east and west, boundaries of each drilling unit so established, and no closer than 330 feet laterally to another horizontal well within the same drilling unit, without obtaining an exception location approval in accordance with Utah Admin. Code Rule R649-3-3. With respect to stacked long lateral horizontal wells within the drilling unit, there shall be no inter-well setback distance laterally required provided the stacked horizontal laterals are located at least 100 feet or greater apart in vertical distance;
- The surface location of any authorized long lateral horizontal well not only may be located anywhere on the drilling unit, but may also be located off the drilling unit so established presuming proper surface and sub-surface authorization for such a location has been obtained from the owners and the well will be cased and cemented to the 330-ft. setback as set forth above, both to be evidenced and satisfied by a self-certification to such effect executed by the Operator of said drilling unit and filed with the Division and the other setbacks for the laterals set forth above are maintained;
- No inter-well setbacks from vertical/directional or short lateral horizontal wells from other wells within the same drilling unit, but providing no vertical or directionally drilled well may have producing intervals closer than 660 feet from a drilling unit boundary, and providing any short lateral horizontal well may not have producing intervals closer than 330 feet from the north and south boundaries, and 560 feet from the east and west boundaries, of the drilling unit, without an exception location approval in accordance with Utah Admin. Code Rule R649-3-3; and
- The surface location of any authorized short lateral horizontal well not only may be located anywhere on the drilling unit, but may also be located off the drilling unit so established presuming proper surface and sub-surface authorization for such a location has been obtained from the owners and the well will be cased and cemented to the 330-ft. setback as set forth above, both to be evidenced and satisfied by a self-certification to such effect executed by the Operator of said drilling unit and filed with the Division, and the other setbacks for the laterals set forth above are maintained.

However, the 1280-acre drilling units only become effective upon production from the first long lateral horizontal well; until then, the existing sectional (640-acre or substantial equivalent) spacing for the Subject Formation under the Board's Order entered in Cause No. 139-90 on May 9, 2012 (the "139-90 Order") remains applicable.

7. In the 139-134 Order, the Board expressly stated in its Findings of Fact as follows:

9. From the Pilot program results, and as supported by the exhibits and testimony received into evidence in this Cause, it appears:

- a) SXL Wells result in a production uplift of between 1.9-2.7 (2.3 ave.) and cost effectiveness (cost increase of 50%-60%) over HZ Wells, and access additional resources that would not otherwise be recovered;
- b) Average hydraulic fracture orientation (N 54° W) supports a stand-up drilling unit orientation;
- c) Average effective fracture half lengths (200' laterally/148' vertically for the Uteland Butte Interval; 334' laterally/215' vertically for the Upper Wasatch Interval), together with the average hydraulic fracture orientation, confirm 330-foot north and south drilling unit boundary setbacks and 560 foot east and west drilling unit boundary setbacks, and 330-foot lateral and 100-foot vertical setbacks from other horizontal wells should result in efficient but limited communication between wells and allow greater flexibility in locating wells to maximize resource recovery, while still protecting correlative rights;

- d) Consistent and uniform stand-up 1280-acre drilling units will dramatically facilitate flexibility and planning of multi-well pads, production facilities and infrastructure (pipeline) corridors which improves economics and reduces surface disturbance, infrastructure duplication and traffic;
- e) It is difficult, if not impossible, to establish uniform setbacks between SXL Wells and vertical or directionally drilled wells. Yet, both may be required to maximize resource recovery. In particular, vertical or directional wells may still be required to recover resources from intervals above the Bar F Interval and below the Upper Wasatch Interval. Separating individual production intervals within the previously established pool of the entirety of the Subject Formations could require separate metering and create additional administrative burdens to, or even prevent, commingling of production;
- f) Based on volumetrics reflected in Exhibit "S" admitted into evidence, up to 17 SXL Wells and up to eight vertical/directionally drilled wells or HZ Wells may be necessary to allow flexibility filling in potential gaps and maximize resource recovery from all productive intervals of the Subject Formations; and
- g) Based on the economic analysis reflected in Exhibit "U" admitted into evidence, SXL Wells are economic with rates of return between 20% and 38%. In addition, if and to the extent vertical/directional wells or HZ Wells are required, they too will be economic under certain geologic and reserve recovery circumstances in the respective drilling unit,

particularly when considering cost savings of multi-well pads and project economics.

10. Although there are separate productive intervals with some geologic barriers therein, the Subject Formations do constitute one “common source of supply.”

11. Given Findings of Fact Nos. 9 and 10 above, allocation of production from any well located on the 1280-acre drilling unit as of the effective date specified below is fair, just and reasonable under the circumstances and deemed most protective of correlative rights. The benefits of SXL Wells and allocation to all production interest owners on a 1280-acre drilling unit basis far outweigh any detriment or dilution of a production interest on an existing individual well sectional allocation basis.

8. From additional drilling and analysis performed by Newfield since the 139-134 Order was entered, and as supported by the exhibits and testimony received into evidence in this Cause, it appears:

- a) Long lateral horizontal wells have proven to be more productive and cost-effective than other wells in this area and access additional resources that would not otherwise be recovered. Newfield estimates an average of 582 MBO per long lateral horizontal well drilled in the Myton Area;
- b) Average hydraulic fracture orientation (N 79° W) supports a stand-up drilling unit orientation;
- c) As evidenced by Exhibit “N” admitted into evidence, average effective fracture half lengths, together with the average hydraulic fracture orientation, confirm 330-foot north and south drilling unit boundary setbacks and 560-foot east and west drilling unit boundary setbacks, and 330-foot lateral and 100-foot vertical setbacks from other horizontal wells should result in efficient but limited communication between wells and allow greater flexibility in locating wells to maximize resource recovery, while still protecting correlative rights;

- d) Consistent and uniform stand-up 1280-acre drilling units will dramatically facilitate flexibility and planning of multi-well pads, production facilities and infrastructure (pipeline) corridors which improves economics and reduces surface disturbance, infrastructure duplication and traffic;
- e) A two-fold increase in original oil in place estimates resulting from small changes in the petrophysical model, an increase from three to five (and possibly up to eight) primary targeted production intervals, and recovery rates slightly lower in the Myton Area than the Central Basin area justify an increase from 17 to 40 authorized long lateral horizontal wells;
- f) Up to eight vertical/directionally drilled wells or short lateral horizontal wells may additionally be necessary to allow flexibility filling in potential gaps and maximize resource recovery from all productive intervals of the Subject Formations; and
- g) Based on the economic analysis reflected in Exhibit “M” admitted into evidence, long lateral horizontal wells in the Myton Area will be economic with rates of return estimated at 22%. In addition, if and to the extent vertical/directional wells or short lateral horizontal wells are required, they too will be economic under certain geologic and reserve recovery circumstances in the respective drilling unit, particularly when considering cost savings of multi-well pads and project economics; albeit, Newfield has no current plans to drill such wells.

As such, extension of the 139-134 Order to the Subject Lands, with the increase in the authorized long lateral horizontal well count to 40, is fair, just and appropriate.

9. Although there are separate productive intervals with some geologic barriers therein, the Subject Formations do constitute one “common source of supply.”

10. Because of the southern boundary of the Uintah Special Meridian, Sections 26 and 27 of T4S, R2W, USM, are partial sections only comprised of lots with acreages as follows:

Sec. 26: Lots 1 (7.45), 2 (7.26), 3 (7.08) and 4 (6.89)

Sec. 27: Lots 1 (6.72), 2 (6.57), 3 (6.41) and 4 (6.89).

As such, and given the southern boundary of these lands abut the Greater Monument Butte Unit, without inclusion in the proposed drilling units comprised of adjacent Sections 14 and 23 and Sections 15 and 22, respectively, it is unlikely these particular lands would be independently developed and therefore resources would be left unrecovered.

11. Pursuant to the Board's Order entered July 26, 2017 in Cause No. 139-145 (the "139-145 Order") and the Board's Emergency Order entered on August 25, 2017 in the same cause, Newfield drilled and completed the Knoll Well within Section 15, T4S, R2W, USM, with a maximum deviation of 54 feet from the western 660-ft. setback as originally required under the 139-145 Order. The Knoll Well has been completed as a producing oil well, with first production achieved on September 7, 2017. However, with no long lateral horizontal well yet drilled through Section 15, a special drilling unit for the Knoll Well is required for the protection of correlative rights in the interim. Sectional drilling units for the Subject Formation are consistent with the 139-134 Order and other orders of the Board (including the 139-90 Order) as relating to short lateral horizontal wells producing from the Subject Formations. Newfield has placed all production proceeds from the Knoll Well in suspense pursuant to Utah Code Ann. § 40-6-9 pending the Board's ruling in this Cause.

12. In Newfield's experience, Federal, Tribal and/or Allotted lands, whether by regulation and guideline or Federal agency practice, will require a Board order establishing the requested drilling units in order to allow conforming communitization agreements to be executed and approved.

13. Based on the testimony received in this Cause and as relating to this Cause only, conversion of all production allocation to a 1280-acre drilling unit basis upon the drilling and production from the first long lateral horizontal well rather than overlapping drilling units is deemed fair, just and reasonable due to the following circumstances:

- a) Newfield cannot with any certainty determine, and is aware of no other technical data submitted to the Board in other causes, justifying an appropriate uniform setback between horizontal and vertical/directionally drilled wells, because of variability in permeability, porosity, and other geological and reservoir characteristics in each productive interval;
- b) Such setbacks are necessary to prevent communication, especially given production allocation for each well would be on a different basis if overlapping drilling units are adopted;
- c) However, any such setbacks may limit the location of, and consequently the number of, long lateral horizontal wells to be drilled, estimated to be between a 25% to 60% reduction depending on such setback distance. This would result in waste by leaving resources unrecovered. A common interest 1280-acre drilling unit provides flexibility in locating the maximum amount of efficient long lateral horizontal wells;
- d) Consistent and uniform stand-up 1280-acre drilling units will dramatically facilitate flexibility and planning of multi-well pads, production facilities and infrastructure (pipeline) corridors which improves economics and reduces surface disturbance, infrastructure duplication and traffic. Different interests in wells in overlapping drilling units will not provide this cost advantage;

- e) The estimated recoveries from long lateral horizontal wells appear to far outweigh any detriment to owners in the existing vertical wells due to dilution once conversion to the 1280-acre drilling unit occurs;
- f) Other than EPE's Letter, no one has objected to conversion as requested by Newfield; and
- g) Newfield has had no complaints or objections to conversions that have occurred under the 139-134 Order.

14. Based on the foregoing, and to prevent premature and unnecessary modification of existing rights to production until such time that the drilling and production from the first long lateral horizontal well on a drilling unit established hereunder occurs and mandates such modification, the Board deems the following effective dates of this Order as fair, just and reasonable under the circumstances:

- (a) as to the Knoll Well and the sectional drilling unit comprised of Sec. 15, T4S, R2W, retroactively to September 7, 2017 (its date of first production) and to remain in effect until the first day of the month following the date of first production from the first long lateral horizontal well is drilled on the 1280-acre (or substantial equivalent) drilling unit comprised of Sections 15, 22 and 27;
- (b) as to any drilling unit where no drilling has occurred, effective as of the date of first production of the first long lateral horizontal well drilled; and
- (c) as to any drilling unit with an existing vertical/directional drilled well or a short lateral horizontal well (except the Knoll Well) but where no long lateral horizontal well has yet been drilled, effective for the vertical/directional well(s) or short lateral horizontal well(s) as of the first of the month following the date of first production of the first long lateral horizontal well drilled, and effective for the long lateral horizontal well as of its date of first production;

provided, however, that the setbacks ordered below shall be effective immediately upon entry of this Order.

15. To the extent there currently are more than eight (8) existing vertical, directionally drilled or short lateral horizontal wells within a proposed 1280-acre (or substantial equivalent) drilling unit, a prohibition on drilling additional vertical, directionally drilled or short lateral horizontal wells without further Board authorization is fair, just and reasonable to allow adequate and efficient planning of long lateral horizontal wells therein and minimize communication with such vertical, directionally drilled or short lateral horizontal wells.

16. A copy of the RAA was mailed, postage prepaid and properly addressed, to all production interest owners within the Subject Lands, to the working interest owners (including unleased owners) in the established drilling units or, if unspaced, the quarter-quarter sections, adjacent to the Subject Lands, and to the Utah Division of Forestry, Fire and State Lands (“DFFSL”), Utah School and Institutional Trust Lands Administration (“TLA”), the Bureau of Indian Affairs - Uintah & Ouray Agency (“BIA”), and the BLM, being the supervising governmental agencies having jurisdiction over the State, Federal, Tribal and Allotted minerals. The mailings were sent to said parties via regular mail at their last addresses disclosed by the relevant DFFSL, TLA, BIA, BLM and Duchesne and Uintah County realty records and/or Newfield’s internal land records. As evidenced by the Certificate of Mailing on file in this Cause, EPE was mailed a copy of the RAA on

September 18, 2017 to the same address reflected on its January 29, 2018 Letter to the Board.

17. Notice of the filing of the RAA and of the hearing thereon was duly published in the Uintah Basin Standard and Vernal Express on October 1, 2017 and in the Salt Lake Tribune and the Deseret Morning News on October 3, 2017.

18. The Board initially took the matter under advisement. The vote of the Board Members present and participating in the hearing on this Cause was unanimous (5-0) in favor of granting the RAA, but with the annual reporting caveat outlined below.

CONCLUSIONS OF LAW

1. Due and regular notice of the time, place and purpose of the hearing was properly given to all parties whose legally protected interests are affected by the RAA in the form and manner as required by law and the rules and regulations of the Board and Division.

2. The Board has jurisdiction over all matters covered by the Request and all interested parties therein, and has the power and authority to render the order herein set forth pursuant to Utah Code Ann. §§ 40-6-5(3)(b) and 40-6-6.

3. EPE's Letter was submitted untimely under Utah Admin. Code Rule R641-105-200, and Newfield objected on that basis. The Board, however, finds that no prejudice resulted from its late filing in this matter because the issues raised in the letter

were raised by the Division and Board at hearing in any event. Under these circumstances, the Board accepted and considered EPE's letter.

4. The Board has a general duty under Utah Code Ann. § 40-6-6 to analyze the aerial extent of pools based upon the best available evidence, and to conform its spacing relief to the evolving understanding of the geologic and engineering realities of an area. Consistent with this mandate, the Board, pursuant to Utah Code Ann. § 63G-4-206(1)(b)(iv) and Utah Admin. Code Rule R641-108-204, takes official notice of the record in Cause No. 139-134 insofar as it aids the Board in satisfying the above-referenced mandate, and notes the general consistency of the findings, conclusions and relief granted herein with those of Cause No. 139-134.

5. The Subject Formations as underlying the Subject Lands constitutes a "common source of supply" as that phrase is defined in the Utah Code Ann. § 40-6-2(19).

6. Up to 40 long lateral horizontal wells and up to eight vertical/directional wells or short lateral horizontal wells may be required to efficiently and economically drain each 1280-acre (or substantial equivalent) drilling unit and to prevent waste (by leaving resources in the ground).

7. Creation of the 1280-acre (or substantial equivalent) stand-up drilling units for the Subject Formations with the provisos outlined below is fair, reasonable and justified under the circumstances.

8. Correlative rights will be protected by the virtue of the setbacks and effective dates outlined below.

9. The relief granted hereby will result in consistent and orderly development and the greatest recovery of oil, gas and associated hydrocarbons from the Subject Formations and underlying the Subject Lands, prevent waste and adequately protect the correlative rights of all affected parties.

10. Newfield has sustained its burden of proof, demonstrated good cause, and satisfied all legal requirements for granting of the RAA.

11. Entry of this Order renders moot any other Board required action in Cause No. 139-145 as to the Knoll Well.

ORDER

Based upon the Request, testimony and evidence submitted, and the findings of fact and conclusions of law stated above, the Board hereby orders:

1. The RAA in this Cause is granted with the annual reporting caveat outlined in No. 13 below.

2. Stand-up (vertical) 1280-acre (or substantial equivalent) drilling units for the production of oil, gas and associated hydrocarbons from the Subject Formations are established as follows:

Township 4 South, Range 1 East, USM

Sections 1 and 12

Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7

Township 4 South, Range 1 West, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7

Township 4 South, Range 2 West, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9
Sections 5 and 8
Sections 6 and 7
Sections 14, 23 and 26
Sections 15, 22 and 27

Township 4 South, Range 3 West, USM

Sections 1 and 12
Sections 2 and 11
Sections 3 and 10
Sections 4 and 9

3. Up to 40 long lateral horizontal wells may be drilled and produce on each such drilling unit so established, with no more than eight (8) such wells in any one

producing interval within the Subject Formations (*e.g.*, the “Uteland Butte” or “Upper Wasatch” intervals).

4. No producing interval of an authorized long lateral horizontal well may be located closer than 330 feet to the north and south, and 560 feet to the east and west, boundaries of each drilling unit so established, and no closer than 330 feet laterally to another horizontal well within the same drilling unit, without obtaining an exception location approval in accordance with Utah Admin. Code Rule R649-3-3. With respect to stacked long lateral horizontal wells within the drilling unit, there shall be no inter-well setback distance laterally required provided the stacked horizontal laterals are located at least 100 feet or greater apart in vertical distance.

5. The surface location of any authorized long lateral horizontal well not only may be located anywhere on the drilling unit, but may also be located off the drilling unit so established presuming proper surface and sub-surface authorization for such a location has been obtained from the owners and the well will be cased and cemented to the 330-ft. setback as set forth in (b) above, both to be evidenced and satisfied by a self-certification to such effect executed by the Operator of said drilling unit and filed with the Division, and the other setbacks for the laterals set forth in (4) above are maintained.

6. Except as provided in (10) below, up to eight (8) vertical directionally drilled or short lateral horizontal wells may also be drilled and produce on each drilling unit so established with no inter-well setbacks from other wells within the same drilling

unit, but providing no vertical or directionally drilled well may have producing intervals closer than 660 feet from a drilling unit boundary, and providing any short lateral horizontal well may not have producing intervals closer than 330 feet from the north and south boundaries, and 560 feet from the east and west boundaries, of the drilling unit, without an exception location approval in accordance with Utah Admin. Code Rule R649-3-3.

7. The surface location of any authorized short lateral horizontal well not only may be located anywhere on the drilling unit, but may also be located off the drilling unit so established presuming proper surface and sub-surface authorization for such a location has been obtained from the owners and the well will be cased and cemented to the 330-ft. setback as set forth in (6) above, both to be evidenced and satisfied by a self-certification to such effect executed by the Operator of said drilling unit and filed with the Division, and the other setbacks for the laterals set forth in (6) above are maintained.

8. The Knoll Well as drilled and completed, is hereby declared to be at a legal location. A special drilling unit for said Well for the Subject Formations, comprised of all of Section 15, T4S, R2W, USM, is hereby established retroactively to September 7, 2017 (its date of first production), and is to remain in effect until the first day of the month following the date of first production from the first long lateral horizontal well is drilled on the 1280-acre (or substantial equivalent) drilling unit comprised of Sections 15, 22 and 27 as ordered above.

9. Except as set forth in (8) above, all existing vertical, directionally drilled and short lateral horizontal wells within the Subject Lands are declared to be at legal locations notwithstanding the foregoing. Production allocation from each such well shall remain on a wellbore basis until the first day of the month following the date of first production from the first long lateral horizontal well drilled on the 1280-acre (or substantial equivalent) drilling unit inclusive of the lands upon which such existing well is located.

10. To the extent more than eight (8) vertical, directional and/or short lateral horizontal wells already exist within any requested 1280-acre (or substantial equivalent) drilling unit, no additional vertical, directionally drilled or short lateral horizontal wells may be newly drilled without further Board authorization.

11. As to any other authorized vertical, directionally drilled or short lateral horizontal wells drilled and completed prior to a long lateral horizontal well, production allocation from a vertical or directional well producing from the Subject Formations shall remain/be on a wellbore basis. A special drilling unit is established for any short lateral horizontal well producing from the Subject Formations comprised of the section (640-acres) in which said short lateral horizontal well is located, either to remain in effect until the first day of the month following the date of first production from the first long lateral horizontal well drilled on the requested 1280-acre (or substantial equivalent) drilling unit inclusive of said section.

12. The setbacks in (4)-(7) above shall be effective immediately upon entry of this Order, but establishment of the requested 1280-acre (or substantial equivalent) drilling units shall be effective only upon the first day of the month following first production from the first long lateral horizontal well drilled thereon.

13. Not more than one year after the anniversary of the entry of this Order, and upon each of the four anniversaries of the same thereafter, the Operator shall report back to the Board on the available non-confidential/proprietary results of its operations on the Subject Lands pursuant to this Order. This reporting requirement may be met by filing a written report with the Division and Board, and may require an oral report at one or more Board hearings at the discretion of the Board.

14. Pursuant to Utah Admin. Code Rules R641 and Utah Code Ann. § 63G-4-204 to 208, the Board has considered and decided this matter as a formal adjudication.

15. This Order is based exclusively on evidence of record in the adjudicative proceeding or on facts officially noted, and constitutes the signed written order stating the Board's decision and the reasons for the decision, all as required by the Administrative Procedures Act, Utah Code Ann. § 63G-4-208 and Utah Administrative Code Rule R641-109.

16. Notice re: Right to Seek Judicial Review by the Utah Supreme Court or to Request Board Reconsideration: As required by Utah Code Ann. § 63G-4-208(e) - (g),

the Board hereby notifies all parties in interest that they have the right to seek judicial review of this final Board Order in this formal adjudication by filing a timely appeal with the Utah Supreme Court within 30 days after the date that this Order issued. Utah Code Ann. §§ 63G-4-401(3)(a) and 403. As an alternative to seeking immediate judicial review, and not as a prerequisite to seeking judicial review, the Board also hereby notifies parties that they may elect to request that the Board reconsider this Order, which constitutes a final agency action of the Board. Utah Code Ann. § 63G-4-302, entitled, “Agency Review - Reconsideration,” states:

(1)(a) Within 20 days after the date that an order is issued for which review by the agency or by a superior agency under Section 63G-4-301 is unavailable, and if the order would otherwise constitute final agency action, any party may file a written request for reconsideration with the agency, stating the specific grounds upon which relief is requested.

(b) Unless otherwise provided by statute, the filing of the request is not a prerequisite for seeking judicial review of the order.

(2) The request for reconsideration shall be filed with the agency and one copy shall be sent by mail to each party by the person making the request.

(3)(a) The agency head, or a person designated for that purpose, shall issue a written order granting the request or denying the request.

(b) If the agency head or the person designated for that purpose does not issue an order within 20 days after the filing of the request, the request for reconsideration shall be considered to be denied.

Id. The Board also hereby notifies the parties that Utah Admin. Code Rule R641-110-100, which is part of a group of Board rules entitled, “Rehearing and Modification of Existing Orders,” states:

Any person affected by a final order or decision of the Board may file a petition for rehearing. Unless otherwise provided, a petition for rehearing must be filed no later than the 10th day of the month following the date of signing of the final order or decision for which the rehearing is sought. A copy of such petition will be served on each other party to the proceeding no later than the 15th day of the month.

Id. See Utah Admin. Code Rule R641-110-200 for the required contents of a petition for rehearing. If there is any conflict between the deadline in Utah Code Ann. § 63G-4-302 and the deadline in Utah Admin. Code Rule R641-110-100 for moving to rehear this matter, the Board hereby rules that the later of the two deadlines shall be available to any party moving to rehear this matter. If the Board later denies a timely petition for rehearing, the party may still seek judicial review of the Order by perfecting a timely appeal with the Utah Supreme Court within 30 days thereafter.

The Board retains continuing jurisdiction over all the parties and over the subject matter of this cause, except to the extent said jurisdiction may be divested by the filing of a timely appeal to seek judicial review of this order by the Utah Supreme Court.

For all purposes, the Chairman’s signature on a faxed or electronic copy of this Order shall be deemed the equivalent of a signed original.

DATED this 23rd day of February, 2018, but effective for all purposes as of the dates set forth in Findings of Fact No. 14 and Order Nos. 8, 9, 11 and 12 above.

FILED

OCT 03 2017

SECRETARY, BOARD OF
OIL, GAS & MINING

**BEFORE THE BOARD OF OIL, GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
STATE OF UTAH**

IN THE MATTER OF THE REQUEST FOR AGENCY ACTION OF NEWFIELD PRODUCTION COMPANY FOR AN ORDER ESTABLISHING STAND-UP (VERTICAL) 1280-ACRE (OR SUBSTANTIAL EQUIVALENT) DRILLING UNITS FOR THE PRODUCTION OF OIL, GAS AND ASSOCIATED HYDROCARBONS FROM THE LOWER GREEN RIVER-WASATCH FORMATIONS WITHIN TOWNSHIP 4 SOUTH, RANGES 1 EAST AND 1 THROUGH 3 WEST, USM, DUCHESNE AND UINTAH COUNTIES, UTAH

ORDER GRANTING CONTINUANCE

Docket No. 2017-027

Cause No. 139-150

The Board of Oil, Gas and Mining, having fully considered Newfield Production Company's Motion for Continuance filed September 25, 2017, and finding good cause therefore, hereby grants said Motion and continues the hearing on this Cause from October 25, 2017 to January 31, 2018.

For all purposes, the Chairman's signature on an electronic version or faxed copy of this Order shall be deemed the equivalent of a signed original.

DATED this 3rd day of October, 2017.

**STATE OF UTAH
BOARD OF OIL, GAS AND MINING**

By:

Rufand J Gill, Jr., Chairman

CERTIFICATE OF SERVICE

I hereby certify that on this 5th day of October, 2017, I caused a true and correct copy of the foregoing **ORDER GRANTING CONTINUANCE** for Docket No. 2017-027, Cause No. 139-150, to be mailed with postage prepaid, via E-mail or First Class Mail, to the following:
