

PRODUCTION BATCH FILE FORMAT - Figure 1.

NOTE: One record must be submitted on the production report for each well even if the well did not produce during the report month.

Required Column Header	Field	Data Description
Acct_num	Company account	DOGM assigned code (example: N9550# where the '#' is a default alternate mailing address code). Must be 6 characters.
Rpt_per	Report period	Date format: MMDDYYYY where DD = 01 (examples: 12012007 and 01012008). Must be 8 characters.
Group	Report group	Identifies report type: Production.
API	API well number	DOGM assigned well identifying number (example: 4301332640). Must be 10 characters.
Type	Well type	Code that describes well type (examples: GW for gas well; OW for oil well). Must be 2 characters.
Status	Well status	Code that describes well status (example: P for producing); only P, S, or TA should be used. Maximum of 3 characters.
Entity	Entity number	DOGM assigned number that describes ownership of a well or group of wells (example: 14686). Maximum of 5 characters.
Formation	Formation	DOGM code for the name of the well's producing formation (example: MVRD for Mesa Verde). Maximum of 5 characters.
Name	Well name	Name of the well (example: LITTLE DOG 1-25). Maximum of 36 characters.
Days	Days operated	Number of days or partial days the well operated (example: 18). Maximum of 2 characters.
Oil	Oil volume	The oil volume produced in barrels, rounded to the nearest whole. No fractions are allowed.
Gas	Gas volume	The natural gas volume produced in MCF (thousand cubic feet), rounded to the nearest whole. No fractions are allowed.
Water	Water volume	The water volume produced in barrels, rounded to the nearest whole. No fractions are allowed.
Amend	Amendment Flag	Used to amend an existing electronic report (1 = amended; 0 not amended).
