## **NOTICE TO OPERATORS**

Concerning

In accordance with a memorandum of agreement signed by the Division of Oil, Gas and Mining (DOGM), the School and Institutional Trust Lands Administration (SITLA), and the Utah Geological Survey (UGS), all Applications for Permit to Drill (APD) that are submitted for areas located within sensitive paleontological areas must include either a paleontological inventory or evidence of a completed paleontological review of the drill site and/or other trust lands to be disturbed by the proposed drilling operation. Before approving the APD, DOGM will require written clearance from SITLA or a lapse of the agreed-upon comment period.

More information and a map of the applicable sensitive areas can be obtained by referring to a document on SITLA's web site at:

http://trustlands.utah.gov/docs/2689.pdf

SITLA's web address is:
